TABLE OF CONTENTS

1	INTRODUCTION	15
1.1	OBJECTIVES OF THE STUDY	15
1.2	MARKET DEFINITION	15
1.3	MARKET SCOPE.....	15
1.3.1	YEAR.....	16
1.4	CURRENCY.....	17
1.5	LIMITATIONS	17
1.6	MARKET STAKEHOLDERS.....	17
2	RESEARCH METHODOLOGY.....	18
2.1	SECONDARY DATA.....	19
2.1.1	KEY DATA TAKEN FROM SECONDARY SOURCES	19
2.1.2	PRIMARY DATA.....	19
2.1.2.1	Key data from primary sources	20
2.1.2.2	Key Industry Insights.....	20
2.2	MARKET SIZE ESTIMATION	21
2.2.1	BOTTOM-UP APPROACH	22
2.2.2	TOP-DOWN APPROACH.....	22
2.3	MARKET BREAKDOWN AND DATA TRIANGULATION	23
2.3.1	ASSUMPTIONS.....	24
3	EXECUTIVE SUMMARY.....	25
3.1	EVOLUTION	28
4	PREMIUM INSIGHTS	30
4.1	ATTRACTIVE MARKET OPPORTUNITIES IN MARKETING ANALYTICS SOFTWARE	30
4.2	MARKETING ANALYTICS SOFTWARE MARKET: APPLICATIONS SEGMENTS	31
4.3	MARKETING ANALYTICS SOFTWARE MARKET SHARE: BY REGION.....	31
4.4	MARKETING ANALYTICS SOFTWARE MARKET: BY REGION	32
4.5	LIFE CYCLE ANALYSIS, BY REGION	32
4.6	MARKET CHASM ANALYSIS.....	33
5	MARKET OVERVIEW.....	34
5.1	INTRODUCTION	35
5.2	MARKET SEGMENTATION	35
5.2.1	MARKETING ANALYTICS SOFTWARE, BY APPLICATION	35
5.2.2	MARKETING ANALYTICS SOFTWARE, BY VERTICAL.....	36
5.2.3	MARKETING ANALYTICS SOFTWARE, BY DEPLOYMENT MODEL	36
5.2.4	MARKETING ANALYTICS SOFTWARE, BY END USER.....	37

5.3	MARKET DYNAMICS.....	37
5.3.1	DRIVERS	38
5.3.1.1	Increase in social media channels.....	38
5.3.1.2	Increasing need to calculate MROI.....	38
5.3.1.3	Increase in budget for marketing analytics software.....	39
5.3.1.4	Need to understand customer behavior	39
5.3.2	RESTRAINTS.....	40
5.3.2.1	High deployment cost of marketing analytics software	40
5.3.2.2	Easy availability of open source solution	40
5.3.3	OPPORTUNITIES.....	40
5.3.3.1	Increase in adoption of cloud-based technology.....	40
5.3.3.2	Increase in trend of marketing analytics	40
5.3.4	CHALLENGES	41
5.3.4.1	Lack of awareness	41
5.3.4.2	Lack of system integration	41
5.3.4.3	Lack of skill	41
6	INDUSTRY TRENDS	42
6.1	INTRODUCTION	42
6.2	VALUE CHAIN ANALYSIS	42
6.3	SUPPLY CHAIN ANALYSIS	43
6.4	INDUSTRY TRENDS	44
6.5	PORTER'S FIVE FORCES ANALYSIS	44
6.5.1	THREAT FROM NEW ENTRANTS	45
6.5.2	THREAT FROM SUBSTITUTES	45
6.5.3	BARGAINING POWER OF SUPPLIERS	45
6.5.4	BARGAINING POWER OF BUYERS	46
6.5.5	INTENSITY OF COMPETITIVE RIVALRY	46
6.6	STRATEGIC BENCHMARKING	47
6.6.1	PRODUCT ENHANCEMENT AND EXPANSION.....	47
6.6.2	MERGERS & ACQUISITIONS, STRATEGIC AGREEMENTS, AND JOINT VENTURES	48
7	GLOBAL MARKETING ANALYTICS SOFTWARE MARKET, BY APPLICATION	49

1 INTRODUCTION

1.1 OBJECTIVES OF THE STUDY

- To define, describe, and forecast the global marketing analytics software market on the basis of application, deployment, vertical, and end user
- To provide a detailed information regarding the major factors influencing the growth of the market (drivers, restraints, opportunities, and industry specific challenges)
- To strategically analyze micro markets with respect to individual growth trends, future prospects, and contribution to the total market
- To analyze the opportunities in the market for stakeholders and details of a competitive landscape for market leaders
- To forecast the size of the market segments with respect to five main regions, namely North America (NA), Europe, Asia-Pacific (APAC), Middle East and Africa (MEA), and Latin America (LA)
- To strategically profile key players and comprehensively analyze their market shares and core competencies
- To track and analyze competitive developments such as joint ventures, mergers and acquisitions, new product developments, and research and developments in the marketing analytics software market

1.2 MARKET DEFINITION

Marketing analytics comprises the process and technologies that enable marketers to evaluate the success of their marketing efforts. It is a practice of measuring, managing, and analyzing the marketing performance to maximize the effectiveness and optimize the Return on Investment (ROI). Beyond the obvious sales and lead generation applications, marketing analytics can offer profound insights into customer preferences and trends. Marketing analytics allows a marketer to monitor the online marketing campaigns and respective outcomes, enabling them to spend each penny as effectively as possible. It can help marketing managers in the areas of product design, customer surveys, industry trends, and customer support

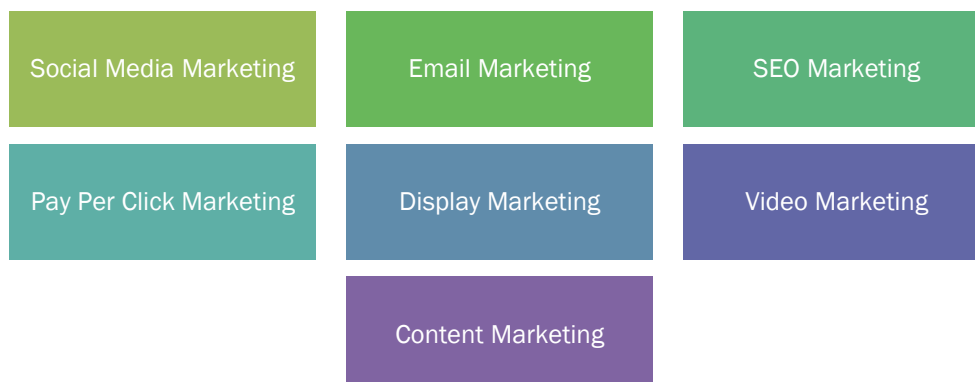

1.3 MARKET SCOPE

In this report, marketing analytics software has been defined as sales and marketing analytical software that helps companies to evaluate the performance of their marketing activities by measuring them using important business metrics, such as Return on Investment (RoI), marketing attribution, and overall marketing effectiveness.

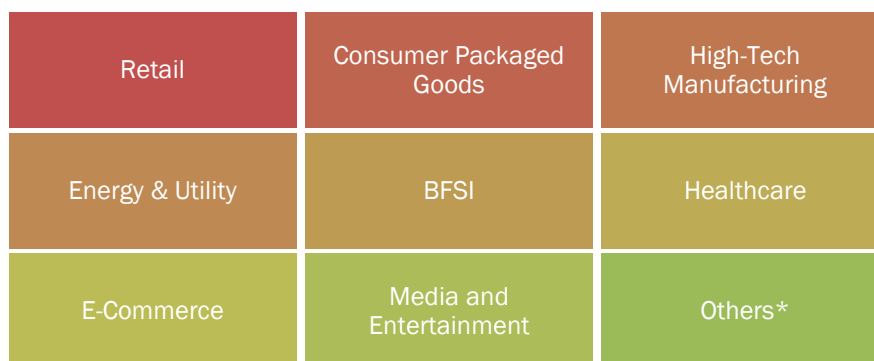

- The market study covers various marketing analytics software applications (including social media marketing, e-mail marketing, Search Engine Optimization (SEO) marketing, pay per click marketing, display marketing, video marketing, and content marketing)
- The market study covers marketing analytics software by vertical (retail; Consumer Packaged Goods (CPG); high-tech manufacturing; energy and utilities; Banking, Financial Services, and Insurance (BFSI); healthcare; e-commerce; media and entertainment; and other verticals)
- The market study covers marketing analytics software by deployment model (on-premises and cloud) and end user (small and medium businesses and enterprises)
- The market has also been covered by region (NA, Europe, APAC, LA, and MEA)

This research report categorizes the marketing analytics software market into the following segments:

Global Marketing Analytics Software Market, By Application

Global Marketing Analytics Software Market, By Vertical

*Others include telecommunication, travel and transport, and real estate

Global Marketing Analytics Software Market, By Deployment Type

- On Premises
- Cloud

Global Marketing Analytics Software Market, By End User

- Small and Medium Businesses (SMBs)
- Enterprises

1.3.1 YEAR

The historical year considered for the report is 2012, whereas the base year considered is 2013. The forecast period is from 2014 to 2019. The Compound Annual Growth Rate (CAGR) is determined from the year 2014 to 2019.

1.4 CURRENCY

The base currency used in the report is U.S. dollars, with market size indicated only in \$million

- For companies reporting their revenue in U.S. dollars, the revenues were picked from their annual reports
- For companies that reported their revenues in other currencies, average annual currency conversion rate was used for that particular year to convert the value in U.S. dollars

1.5 LIMITATIONS

- The study is limited to six types of applications in marketing methods, namely social media marketing, e-mail marketing, SEO marketing, pay per click marketing, display marketing, video marketing, and content marketing
- The report focuses on the marketing analytics carried for the online activities only and not for offline activities
- Services, internal staffing, and related expenses are not considered while forecasting the market size

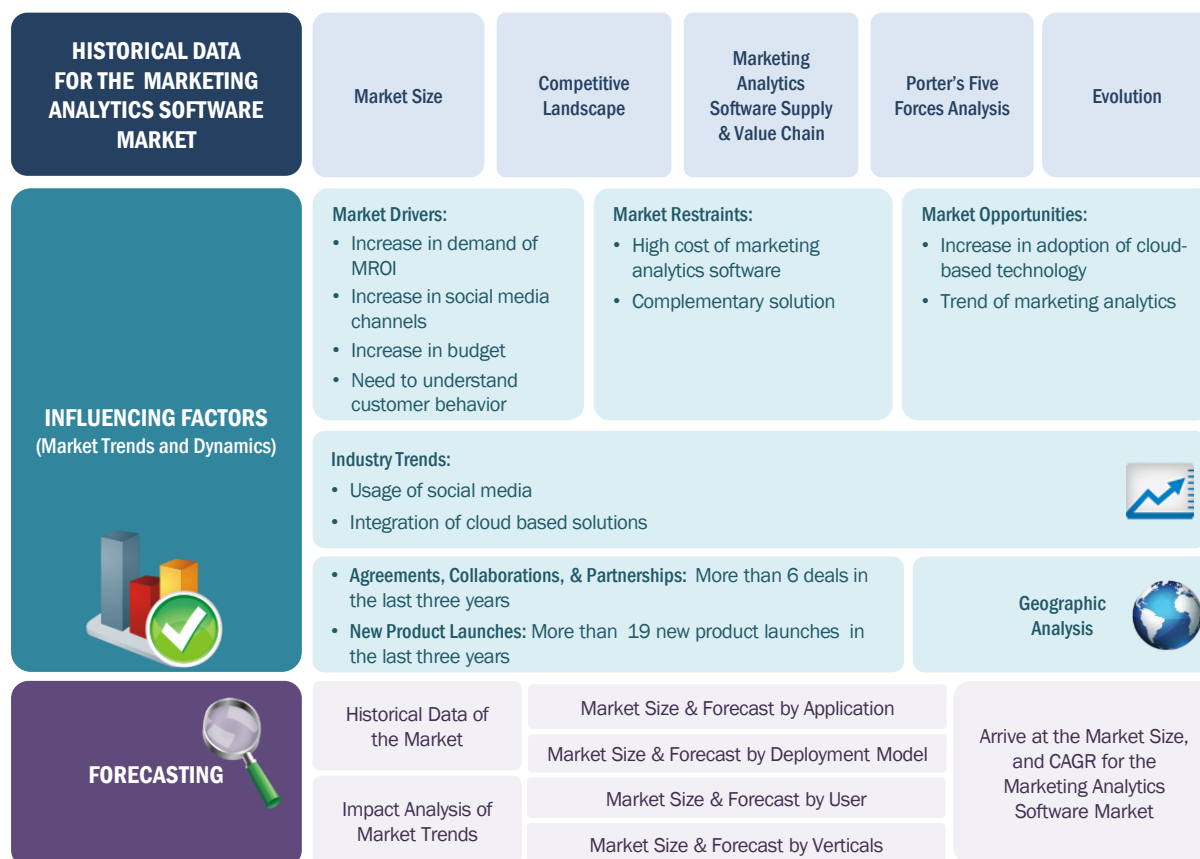

1.6 MARKET STAKEHOLDERS

- Marketing analytics software providers
- Cloud solution providers
- Service professionals
- Investors and venture capitalists
- Market research and consulting firms

2 RESEARCH METHODOLOGY

This research study involved the use of extensive secondary sources, directories, and databases such as Hoovers, Bloomberg Businessweek, Factiva, and OneSource to identify and collect information useful for this technical, market-oriented, and commercial study of the global marketing analytics software market. The primary sources are mainly several industry experts from core and related industries and preferred suppliers, distributors, service providers, reimbursement providers, technology developers, technologists, alliances, standards and certification organizations from companies, and organizations related to all segments of this industry's value chain. In-depth interviews were conducted with various primary respondents that include key industry participants, subject matter experts, C-level executives of key market players, and industry consultants, among other experts to obtain and verify critical qualitative and quantitative information as well as to assess future prospects. The following illustrative figure shows the market research methodology applied in making this report on the global marketing analytics software market.

FIGURE 1 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET: RESEARCH DESIGN

2.1 SECONDARY DATA

In the secondary research process, various secondary sources were referred to for identifying and collecting information for this study. The secondary sources include annual reports, press releases and investor presentations of companies, white papers, journals, certified publications, articles from recognized authors, gold standard and silver standard websites, IT service specific organizations, directories, and databases.

Secondary research was mainly used to obtain key information about the industries supply chain, the market's monetary chain, the total pool of key players, market classification and segmentation according to industry trends to the bottom-most level, geographic markets, and key developments from both market and technology-oriented perspectives.

2.1.1 KEY DATA TAKEN FROM SECONDARY SOURCES

PARAMETERS		SOURCES
1	Market Size	- Company Financials - Magazines - Journals - Press Releases - Paid Databases, and - The MarketsandMarkets Data Repository
2	Revenue of Companies	- Annual Reports - Company Websites - Public Databases, and - The MarketsandMarkets Data Repository
3	Qualitative Information (Market Dynamics, Market Trends)	- Company Websites - Annual Reports - Press Releases, and - The MarketsandMarkets Data Repository

2.1.2 PRIMARY DATA

In the primary research process, various primary sources from both supply and demand sides were interviewed to obtain qualitative and quantitative information for this report. The primary sources from the supply side include industry experts such as CEOs, vice presidents, marketing directors, technology and innovation directors, and related key executives from various key companies and organizations operating in the marketing analytics software market.

After the complete market engineering (which includes calculations for market statistics, market breakdown, market size estimations, market forecasting, and data triangulation), extensive primary research was conducted to gather information and to verify and validate the critical numbers arrived at. Primary research was also conducted to identify the segmentation types; industry trends; porter's analysis; key players; competitive landscape of marketing analytics software products supplied by different types of market players; and key market dynamics such as drivers, restraints, opportunities, industry trends, and key player strategies.

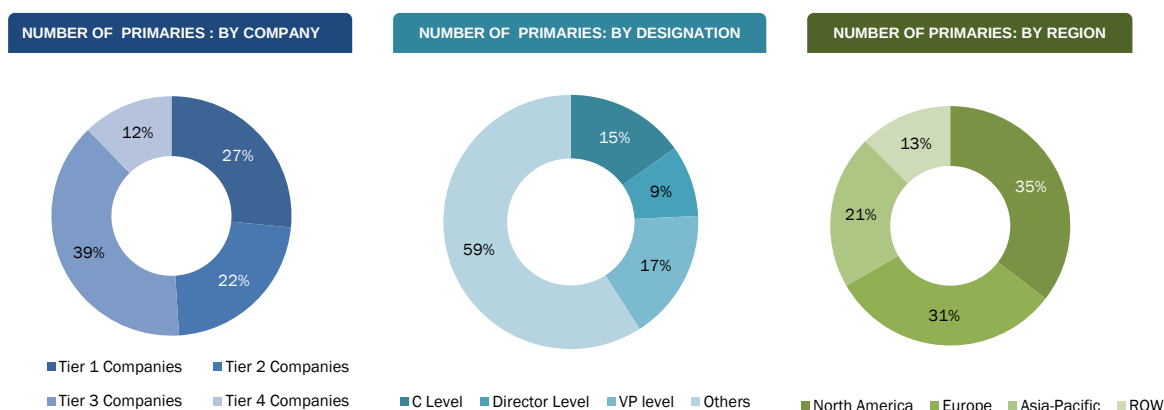

2.1.2.1 Key data from primary sources

	PARAMETERS	KEY DATA
1	Geographic Split - Overall market and sub-segments in 2013 - CAGR of each region in the forecast period (2014 – 2019)	The global marketing analytics software market, by region – North America, Europe, Asia-Pacific, Latin America, and Middle East and Africa
2	Global Market Size - The global market size for the year 2013 - CAGR for the forecast period (2014 – 2019)	- The global marketing analytics software market - The marketing analytics software market by sub segments - The marketing analytics software market by deployment model - The marketing analytics software market by end user
3	Market Split - Social Media Marketing - Email Marketing - SEO Marketing - Pay Per Click Marketing - Display Marketing - Video Marketing - Content Marketing	- Social media marketing, by deployment model and user - Email marketing, by deployment model and user - SEO marketing, by deployment model and user - Pay per click marketing, by deployment model and user - Display marketing, by deployment model and user - Video marketing, by deployment model and user - Content marketing, by deployment model and user

2.1.2.2 Key Industry Insights

Source: Industry Experts and MarketsandMarkets Analysis

FIGURE 2 BREAK DOWN OF PRIMARIES: BY COMPANY TYPE, DESIGNATION, AND REGION

Note: *Others include sales managers, marketing managers, and product managers

*Tier of the companies are defined on the basis of their total revenue, as of 2013; tier 1 = > \$7 Billion, tier 2 = \$500 Million–\$7 Billion, and tier 3 = < \$500 Million

2.2 MARKET SIZE ESTIMATION

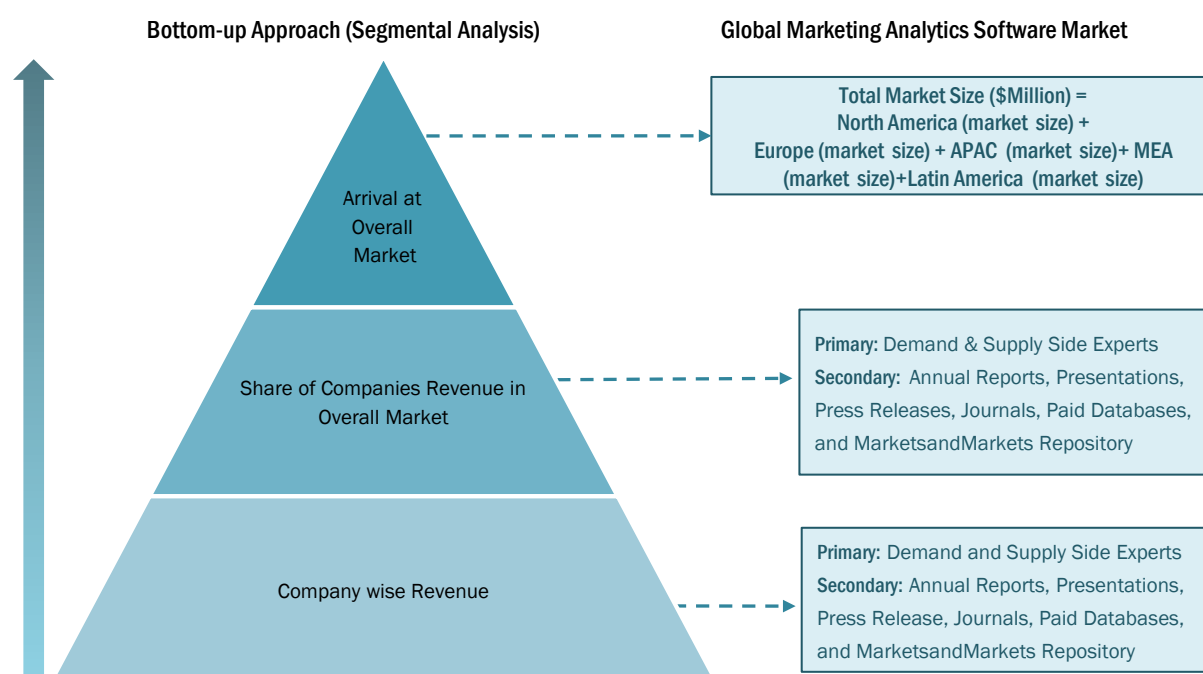

Both top-down and bottom-up approaches were used to estimate and validate the size of the global market and to estimate the size of various other dependent submarkets in the overall marketing analytics software market. The research methodology used to estimate the market size includes the following details: The key players in the market were identified through secondary research and their market shares in respective regions were determined through primary and secondary research. This entire procedure includes the study of the annual and financial reports of top market players and extensive interviews for key insights from industry leaders such as CEOs, VPs, directors, and marketing executives. All percentage shares, splits, and breakdowns were determined by using secondary sources and verified through primary sources. All possible parameters that affect the markets covered in this research study have been accounted for, viewed in extensive detail, verified through primary research, and analyzed to get the final quantitative and qualitative data. This data is consolidated and added with detailed inputs and analyses from MarketsandMarkets and presented in this report.

The following figure shows an illustrative representation of the overall market size estimation process employed for the purpose of this study.

2.2.1 BOTTOM-UP APPROACH

The bottom-up approach was employed to arrive at the overall size of the marketing analytics software market from the revenues of key players and their shares in the market. Calculations based on the revenues of key players identified in the market led to the overall market size.

FIGURE 3 MARKET SIZE ESTIMATION METHODOLOGY: BOTTOM-UP APPROACH

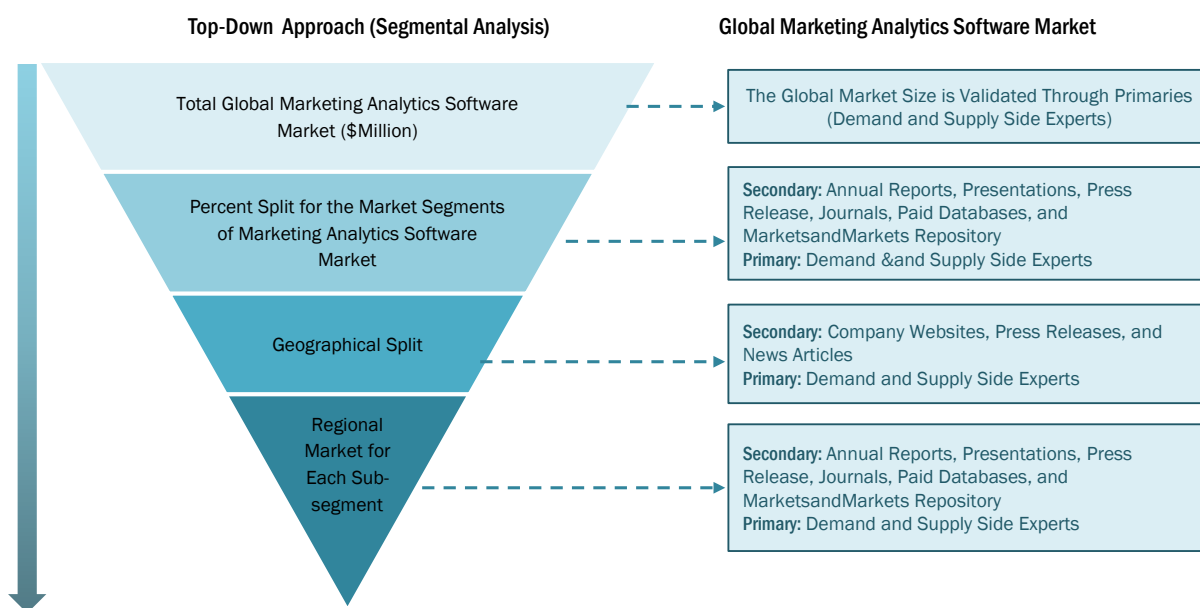

Source: MarketsandMarkets Analysis

2.2.2 TOP-DOWN APPROACH

The overall market size was used in the top-down procedure to estimate the sizes of other individual markets (mentioned in the market segmentation of products, services, categories, end users, and regions) via percentage splits from secondary and primary research.

For the calculation of each type of specific market segment, the most appropriate immediate parent market size was used for implementing the top-down procedure. The bottom-up procedure was also implemented for data extracted from secondary research to validate the market segment revenues obtained.

Market shares were then estimated for each company to verify the revenue shares used earlier in the bottom-up procedure. With the data triangulation procedure and validation of data through primaries, the exact values of the overall parent market size and each individual market size were determined and confirmed in this study. The data triangulation procedure implemented for this study is explained in the next section.

FIGURE 4 MARKET SIZE ESTIMATION METHODOLOGY: TOP-DOWN APPROACH

Source: MarketsandMarkets Analysis

2.3 MARKET BREAKDOWN AND DATA TRIANGULATION

After arriving at the overall market size from the market size estimation process explained above, the total market was split into several segments and sub-segments. In order to complete the overall market engineering process and arrive at the exact statistics for all segments and sub-segments, data triangulation and market breakdown procedures were employed, wherever applicable. The data was triangulated by studying various factors and trends from both the demand and supply sides. Along with this, the market was validated using both top-down and bottom-up approaches.

2.3.1 ASSUMPTIONS

The following assumptions were taken into consideration to complete the overall market engineering of the marketing analytics software market:

FIGURE 5 ASSUMPTION OF THE RESEARCH STUDY

PARAMETERS		ASSUMPTIONS
1	Marketing Analytics Software Market, by Application	The market revolves around social media marketing, e-mail marketing, SEO marketing, pay per click marketing, display marketing, video marketing, and content marketing. It is assumed that these will be the major applications and no other drastic changes will emerge during this period
2	Marketing Analytics Software Market, by Vertical	The market revolves around retail, consumer packaged goods, manufacturing, energy & utilities, BFSI, healthcare, e-commerce, media & entertainment, and other verticals. It is assumed that no major changes will emerge in this vertical during the forecast period
3	Marketing Analytics Software Market, by End User	This section includes organizations segmented into SMEs and enterprises by size. Small businesses are organizations with less than 100 employees and medium businesses have 100–500 employees. Enterprises have the employee strength of more than 500
4	Marketing Analytics Software Market, by Deployment Model	This section includes the deployment modes chosen by the end users of different verticals, namely hosted and on-premises software and solutions. It is assumed that cloud deployments will be widely adopted in the forecast period
5	Government Regulation	It is assumed that there will be an increasing trend of large investments especially across developing countries. Political turmoil and regional tension will not hamper progress. This will lead to increased investment in these sectors for the market during the forecast period

3 EXECUTIVE SUMMARY

Marketing analytics software automates the process of analyzing marketing activities across multiple channels. The software helps the marketers to obtain a complete view of their marketing activities. This holistic view helps them optimize their marketing campaign and expenditure. Thus, the companies are deploying the marketing analytics software to decide their marketing strategy and elevate their customer interaction method.

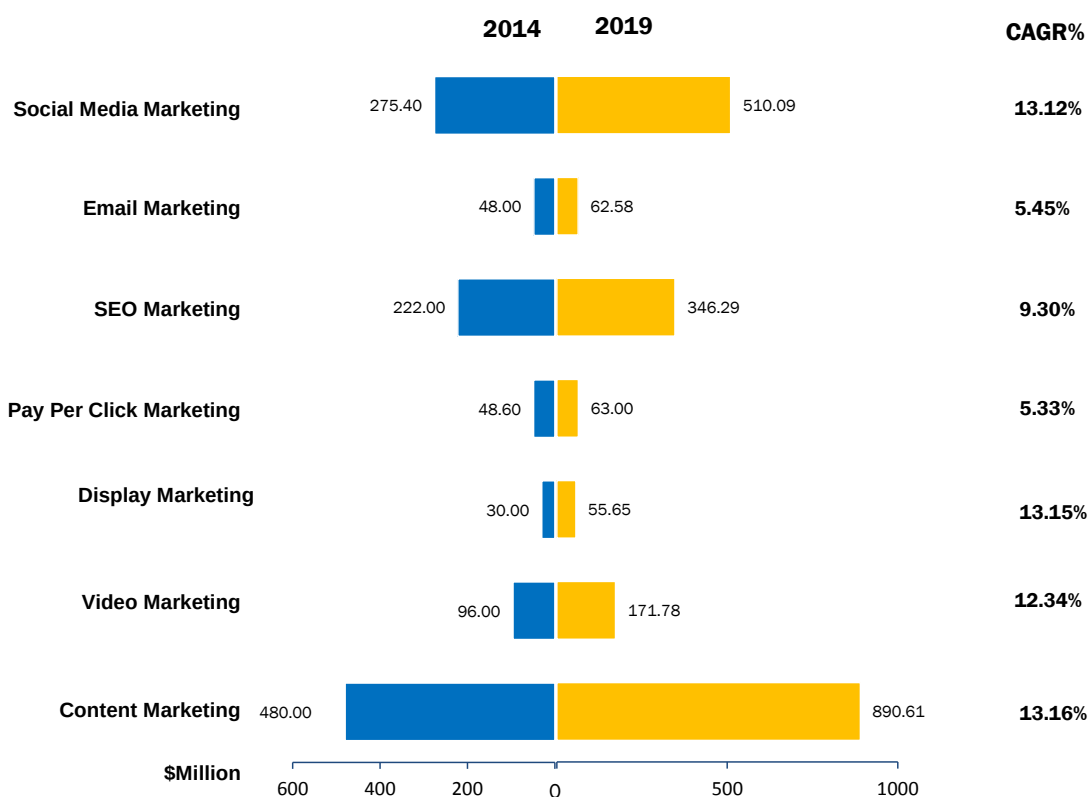

The marketing analytics software market has seen significant growth during recent years as the need for digital marketing has increased. Customer behavior is continuously changing, and it can be tracked and understood from the abundant data available over social media and support channels. Thus, the marketing analytic software takes this complex data available over social media and filters it according to the classifications such as age, gender, choice, color, and much more. This filtered data can help the marketers to know which customers are switching providers, what is the right medium to reach the customer, what are the customers' requirements and so on. The market landscape is shaped by factors like mergers and acquisitions by key players, growth in budget for marketing analytics, and changing customer behavior.

The marketing analytics software provides organizations deeper insights about the market. The software is used in both the marketing methods, Business-to-Consumer (B2C) marketing as well as Business-to-Business (B2B) marketing. The B2C buyers use the software to understand what drives customers to convert and to understand how specific marketing activities affect sales. The B2B buyers require sophisticated analytics software that supports their sales processes and simplifies them.

The marketing analytics software market in the report has been segmented by solutions, deployment models, users, and regions. The solutions include social media marketing, e-mail marketing, SEO marketing, pay per click marketing, display marketing, video marketing, and content marketing. By deployment model, the market is segmented into on premises and cloud. By end users, the marketing analytics software market is segmented into SMBs and enterprises.

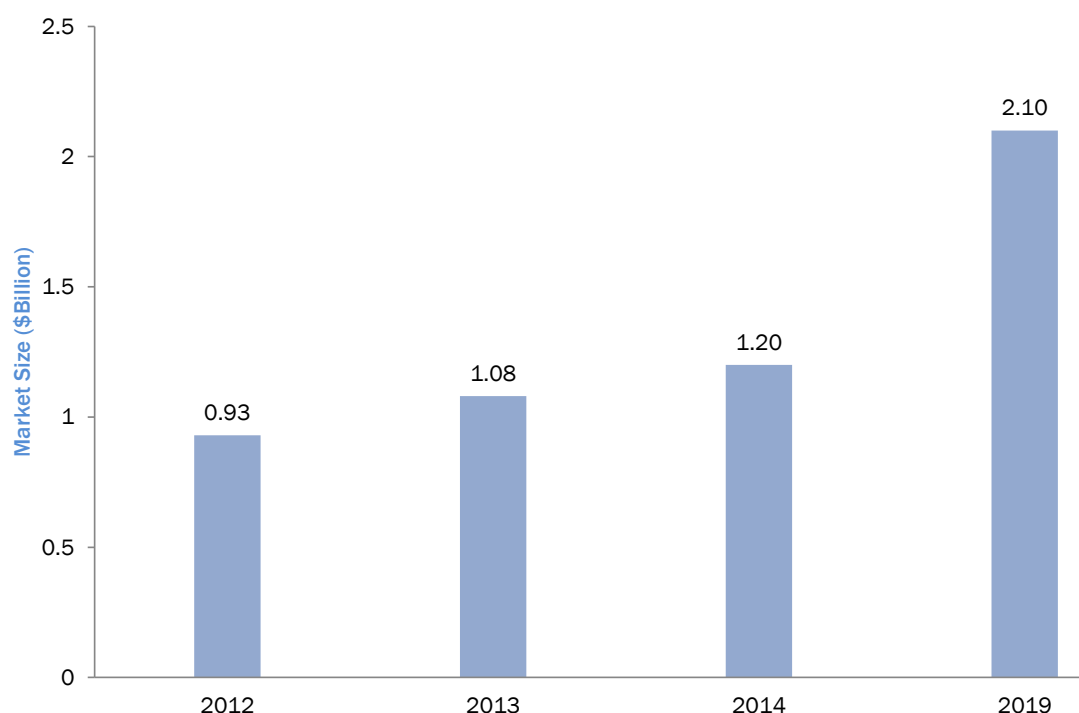

The top key players driving the market are Adobe, Accenture, Harte-Hank, IBM, Oracle, Pega System, Teradata, Wipro, and SAS.

FIGURE 6 MARKETING ANALYTICS SOFTWARE MARKET SNAPSHOT (2014 VS. 2019):
MARKET FOR CONTENT MARKETING IS EXPECTED TO DOUBLE IN THE NEXT FIVE YEARS

Sources: SEC Filings, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

FIGURE 7 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET SIZE, 2012–2019 (\$BILLION)

Sources: SEC Filings, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

TABLE 1 MARKETING ANALYTICS SOFTWARE MARKET SIZE, 2012–2019 (\$MILLION)

Year	2012	2013	2014	2019	CAGR (2014-2019)
Market Size	930	1,080	1,200	2,100	11.84%
Y-O-Y (%)		16.13	11.11	12.90	

Source: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

Note: the 2019 y-o-y growth is based on 2018.

The above table describes the global marketing analytics software market share. The market is expected to grow from \$1,200 million from 2014 to \$2,100 million by 2019 with the CAGR of 11.84%. The increase in complex data and the need to analyze it to have successful marketing strategies are generating more demand for the marketing analytics software across organizations.

3.1 EVOLUTION

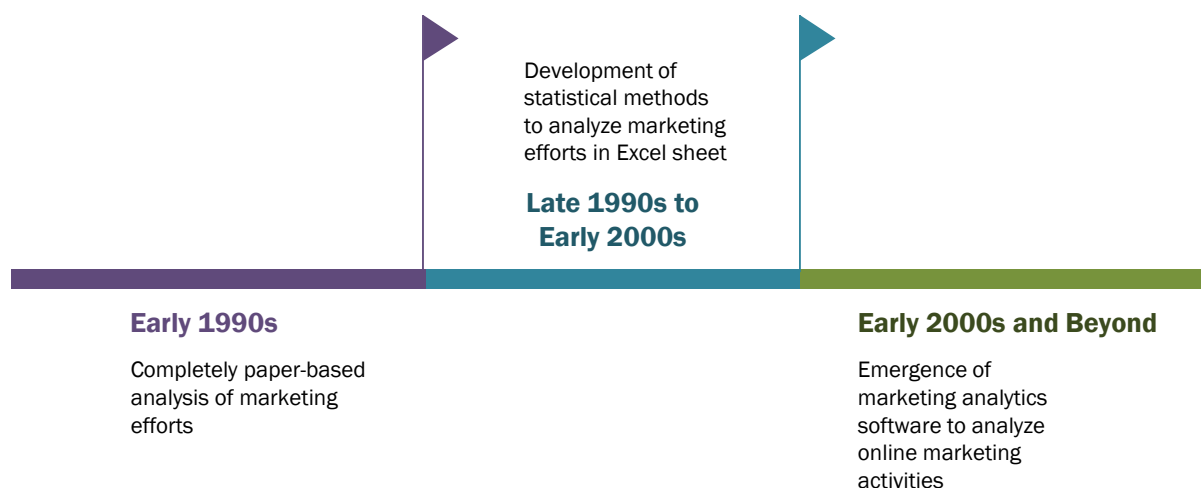

The marketing analytics software market has significantly evolved over the past two decades. Earlier, there was only paper-based record of all marketing efforts done by marketing managers. This very was time consuming and less effective. Due to paper-based records, it required more resources to execute the task of analyzing the marketing efforts. Therefore, the cost involved in this procedure was comparatively high and was providing less return on investment for the companies.

In late 1990s, some statistical and mathematical tools were developed in the Excel sheet to analyze the marketing efforts with the help of various statistical methods. These statistical methods contain various charts like line chart, bar chart, histogram, scatterplot, boxplot, Pareto chart, pie chart, area chart, control chart, and many more. These charts help a marketing manager to analyze data in more effective way in less time.

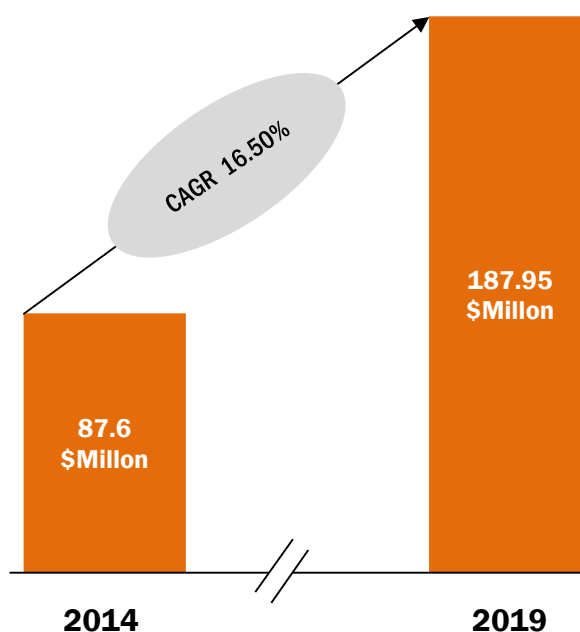

In early 2000s, the era of online marketing began. Keeping track of all online marketing activities became very difficult for marketing managers. This problem created a vacuum in the software market, which was later fulfilled by the invention of marketing analytics software. Marketing analytics comprises the processes and technologies that enable marketers to evaluate the success of their marketing initiatives by measuring their performance using important business metrics such as RoI, marketing attribution, and overall marketing effectiveness.

Marketing analytics gathers data from all marketing channels and consolidates it into a common marketing view. From this, a marketer can extract analytical results that can provide invaluable assistance in driving marketing efforts forward. Marketing analytics considers all marketing efforts across all channels over a span of time, which is essential for sound decision making and effective program execution.

FIGURE 8 EVOLUTION OF MARKETING ANALYTICS SOFTWARE

Sources: Press Releases, Magazines, Industry Journals, and MarketsandMarkets Analysis

FIGURE 9 LATIN AMERICA TO GROW AT THE HIGHEST RATE DURING THE NEXT FIVE YEARS

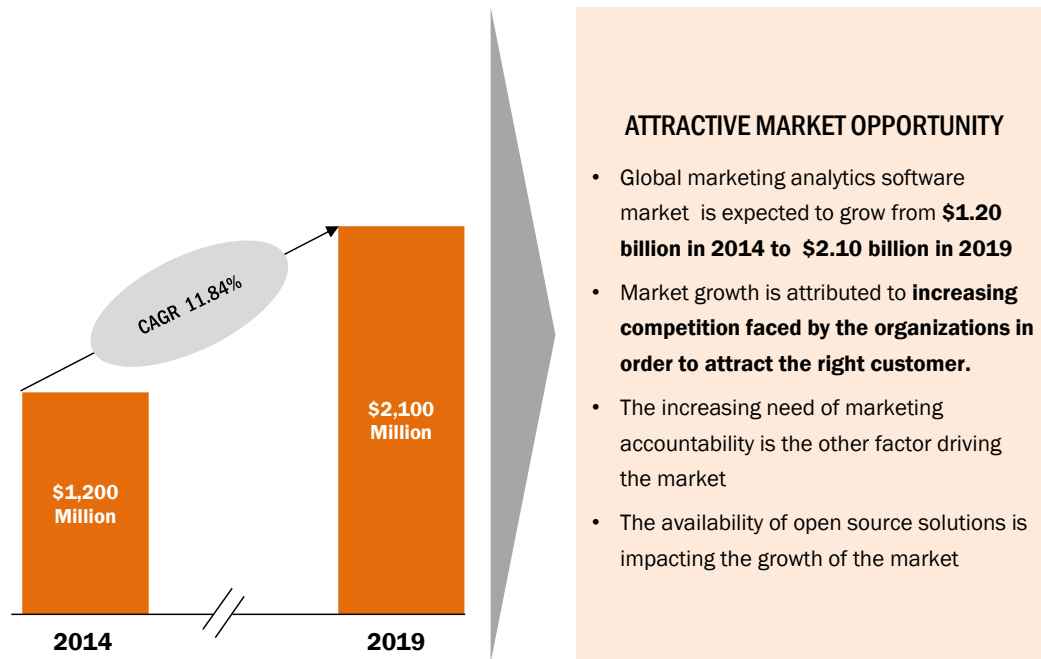

LA is projected to grow at the highest rate during the forecast period, from 2014 to 2019. The marketing analytics software market is expected to reach \$187.95 million in 2019 from \$87.60 million in 2014 with the CAGR of 16.50%. Most of the market in LA is driven by Mexico and Brazil, as these countries are the fastest growing countries in terms of business in LA. Many organizations are entering the emerging markets of LA to strengthen their presence in this region and expand their business successfully. Therefore, companies across LA are adopting the marketing analytics software tool to enhance their marketing activities and attract the maximum number of customers efficiently in the allocated budget. The increase in budget for marketing analytics is driving the marketing analytics software market in LA.

The emerging economy of LA is boosting the marketing analytics software market in this region. However, the cost associated with marketing analytics deployment is restricting the growth of marketing analytics software market in this region. Also, the lack of awareness and skillful labor is acting as a major barrier to the adoption of marketing analytics software by the organizations across this region. Many vendors of marketing analytics software are moving toward the emerging markets of LA.

4 PREMIUM INSIGHTS

4.1 ATTRACTIVE MARKET OPPORTUNITIES IN MARKETING ANALYTICS SOFTWARE

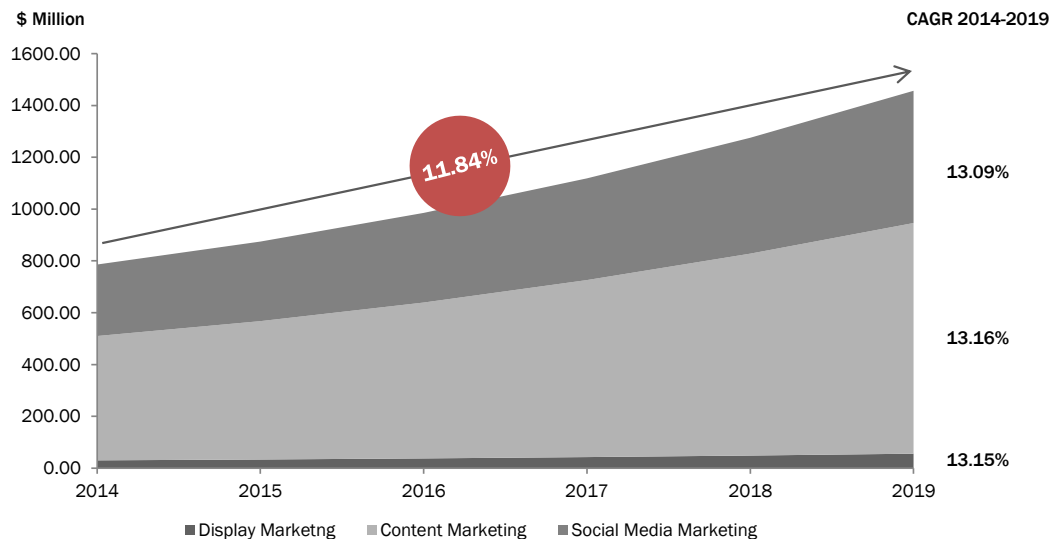

FIGURE 10 INCREASING NEED OF MARKETING ACCOUNTING IS BOOSTING THE MARKETING ANALYTICS SOFTWARE MARKET

Sources: SEC Filings, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

4.2 MARKETING ANALYTICS SOFTWARE MARKET: APPLICATIONS SEGMENTS

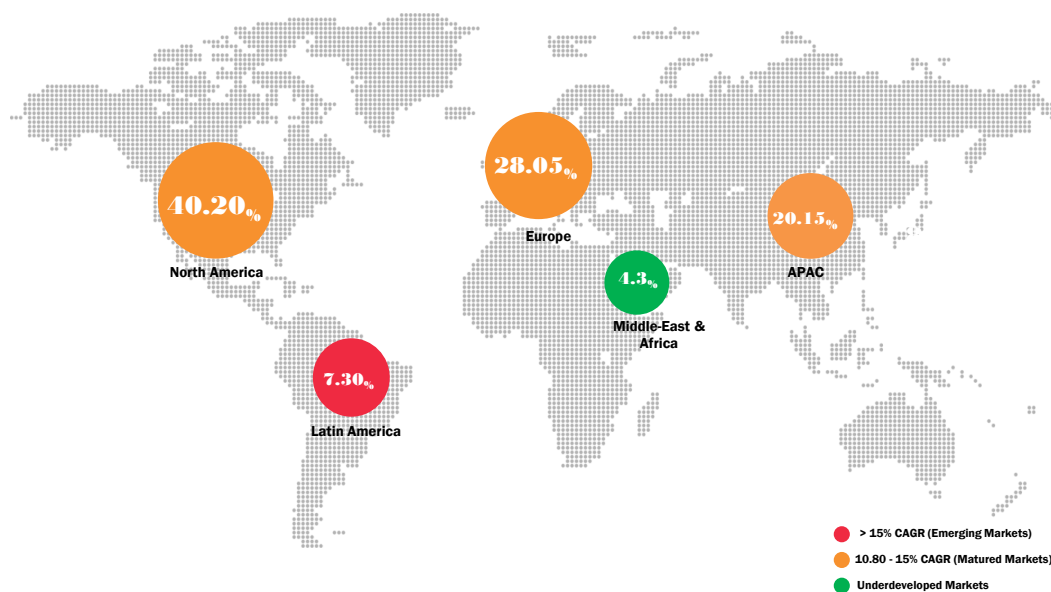

FIGURE 11 CONTENT MARKETING TO GROW AT THE FASTEST RATE AMONG THE SOLUTIONS IN THE MARKETING ANALYTICS SOFTWARE MARKET (EXCLUDING E-MAIL MARKETING, SEO MARKETING, PAY PER CLICK MARKETING, VIDEO MARKETING)

Sources: SEC Filings, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

4.3 MARKETING ANALYTICS SOFTWARE MARKET SHARE: BY REGION

FIGURE 12 NORTH AMERICA COMMANDS OVER TWO FIFTHS OF THE MARKET SHARE

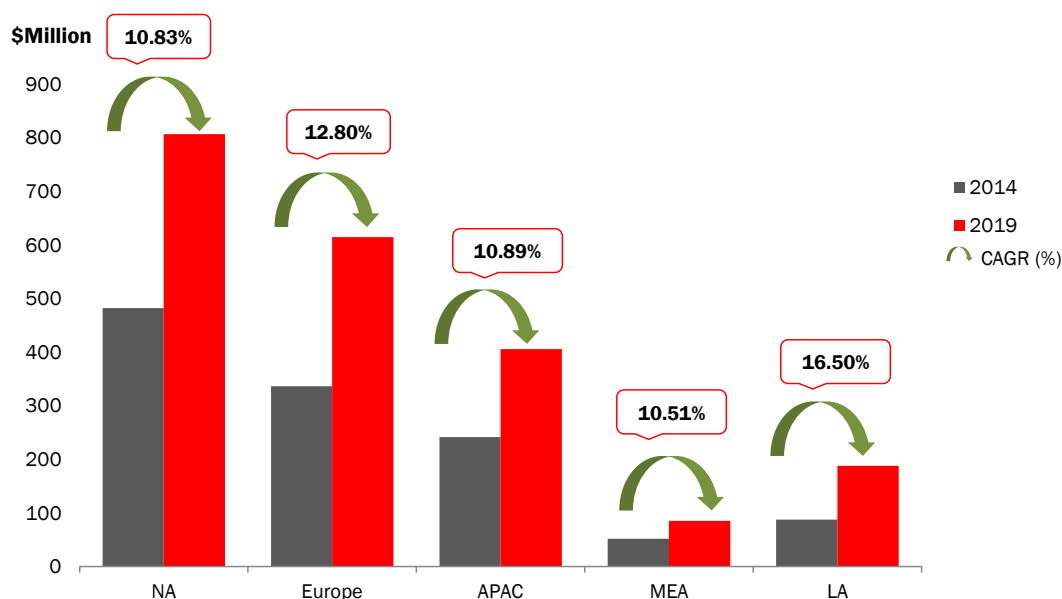

Note: Numbers in the circles denote market share of the individual region in the global marketing analytics software market in 2014

Sources: SEC Filings, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

4.4 MARKETING ANALYTICS SOFTWARE MARKET: BY REGION

FIGURE 13 LATIN AMERICA IS A HIGHLY POTENTIAL MARKET, GROWING WITH 16.5% CAGR

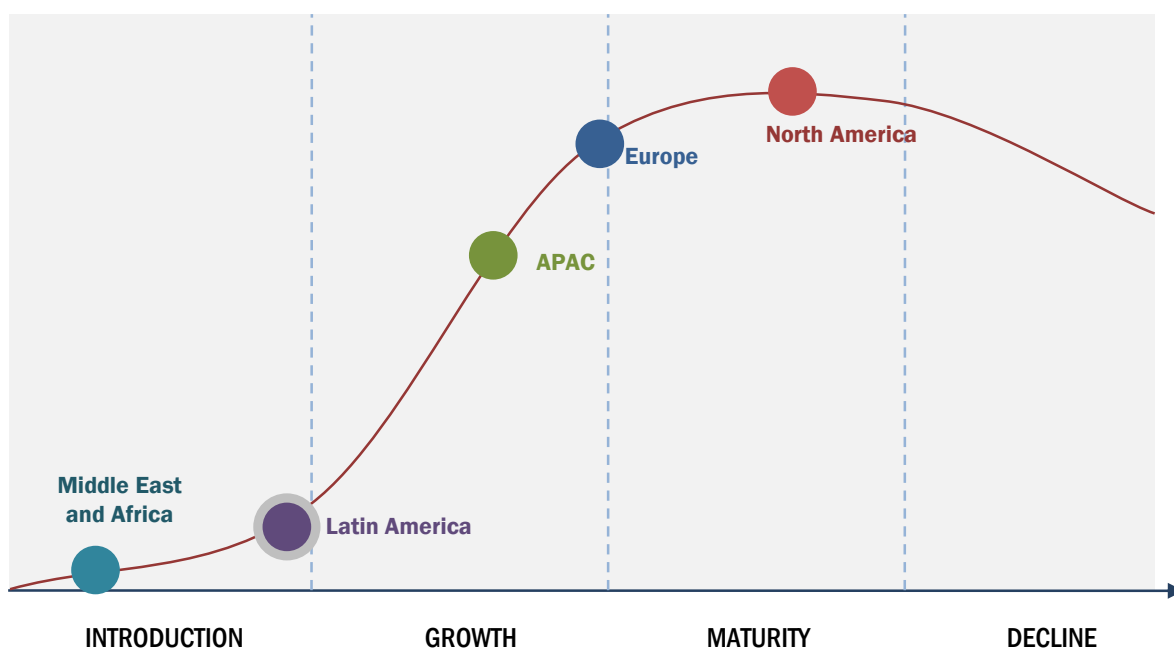

Sources: SEC Filings, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

4.5 LIFE CYCLE ANALYSIS, BY REGION

In this report, the marketing analytics software market is mainly divided into five regions: NA, Europe, APAC, and LA and MEA. High demand is expected from LA, which is expected to grow at a CAGR of 16.5% in the next 5 years.

FIGURE 14 NORTH AMERICAN MARKET IS THE MOST SATURATED MARKET

Source: MarketsandMarkets Analysis

NA is the region with the maximum market share followed by Europe in the marketing analytics software. The NA market is in the maturity phase as the market is well established, and maximum companies across NA deploy the marketing analytics software to have competitive advantage and enhance their marketing activities. Thus, a large number of vendors are observed in the NA market, but as the market is maturing, the vendors are expanding their business in Europe and APAC to attract maximum customers. The APAC marketing analytics software market is in the growth phase and is growing faster than the NA market. The LA and MEA marketing analytics software market is in the introductory phase and is expected to grow rapidly due to the rise in data and the need to calculate the return of marketing investments.

4.6 MARKET CHASM ANALYSIS

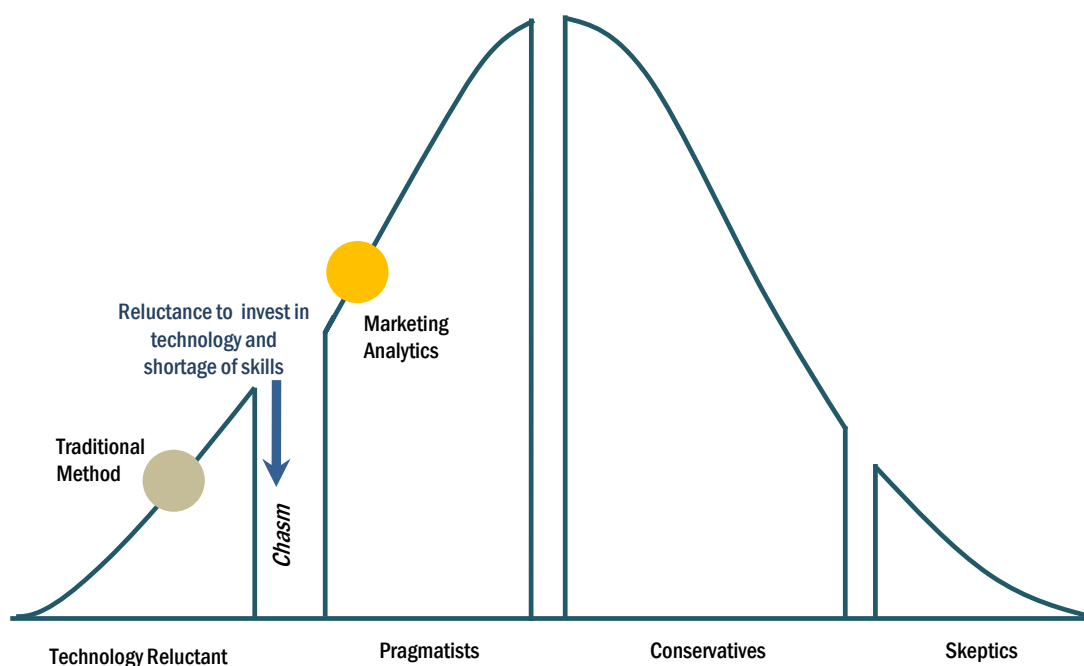

Marketing analytics helps in the growth of organizations and informs them about their Marketing Return on Investment (MROI). The marketing analytics software increases the efficiency of marketing campaigns while decreasing the marketing expenditure. In spite of this, the managers are reluctant to invest into the software.

There are many reasons for this gap in usage. Firstly, the managers are not interested about the benefits of the solution. If the top managers do not use the analytical method, then no one can. The second reason is the lack of awareness about the marketing analytics software. The managers are unaware of the impact marketing analytics can have on companies. Thus, the companies tend to spend their marketing analytics investment on just evaluation of their marketing campaigns.

From our secondary research, it was found out that almost 35% of the B2B companies use marketing analytics software and almost 42% of the B2C companies. Thus, on an average, 38.5% of the companies use marketing analytics software, whereas the rest of them do not. There is wide scope for the growth of the marketing analytics software if these companies adopt the technology.

To cross this chasm, there is a need to create awareness about the marketing analytical tool's benefits and how it can change the way managers conceptualize their marketing actions. This can transform the business.

FIGURE 15 RELUCTANT MANAGERS TO INVEST IN MARKETING ANALYTICS SOFTWARE

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5 MARKET OVERVIEW

KEY FINDINGS

- Overall growth of the marketing analytics software market will be driven by the developed market of Europe and NA which will contribute around 68% of the total market share in 2019
- The increasing need of calculating ROI of the marketing activities is driving the marketing analytics software market across globe
- The wide adoption of the cloud technology is boosting the marketing analytics software to grow at the faster rate.
- Social media marketing and content marketing application will account for the largest market share of around 63% in 2014
- Lack of awareness about the marketing analytics software and its benefits for the organization is the major barrier in the growth of the marketing analytics software market

5.1 INTRODUCTION

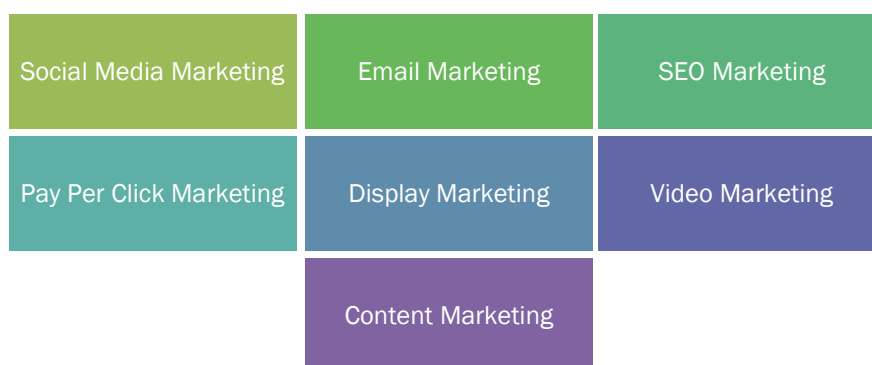

Marketing analytics software consists of data-driven processes that help organizations to increase their marketing efficiency and effectiveness. The report has taken into consideration analytics applications such as social media marketing, e-mail marketing, SEO marketing, pay per click marketing, display marketing, video marketing, and content marketing. The report also focuses on verticals like retail, consumer packaged goods, high-tech manufacturing, energy & utility, BFSI, healthcare, e-commerce, media & entertainment, and others.

5.2 MARKET SEGMENTATION

5.2.1 MARKETING ANALYTICS SOFTWARE, BY APPLICATION

Based on applications, the marketing analytics software market is segmented into social media marketing, e-mail marketing, SEO marketing, pay per click marketing, display marketing, video marketing, and content marketing.

FIGURE 16 MARKET SEGMENTATION: BY APPLICATION

Sources: Annual Reports, SEC Filings, Press Releases, Investor presentations, Expert Interviews, and MarketsandMarkets Analysis

5.2.2 MARKETING ANALYTICS SOFTWARE, BY VERTICAL

Based on verticals, the marketing analytics software market is segmented into retail, consumer packaged goods, high-tech manufacturing, energy & utility, BFSI, healthcare, e-commerce, media & entertainment, and other verticals.

FIGURE 17 MARKET SEGMENTATION: BY VERTICAL

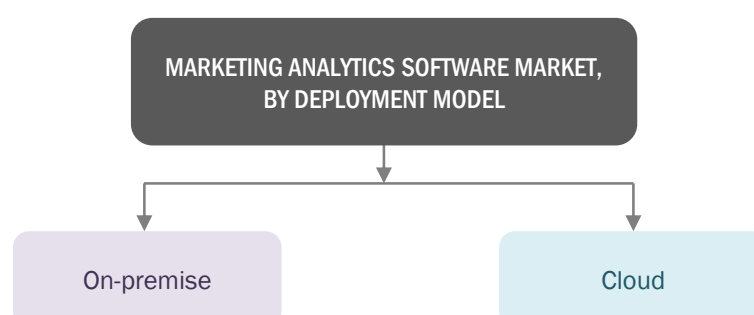

Retail	Consumer Packaged Goods	High-Tech Manufacturing
Energy & Utility	BFSI	Healthcare
E-Commerce	Media and Entertainment	Others*

Sources: Annual Reports, SEC Filings, Press Releases, Investor presentations, Expert Interviews, and MarketsandMarkets Analysis

*Others include telecommunication, travel and transport, and real estate

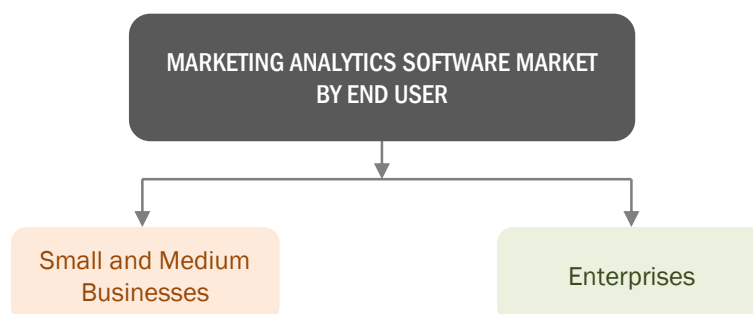

5.2.3 MARKETING ANALYTICS SOFTWARE, BY DEPLOYMENT MODEL

The marketing analytics software market is segmented into on-premises and cloud-based deployment models.

5.2.4 MARKETING ANALYTICS SOFTWARE, BY END USER

The marketing analytics software market is segmented into SMBs and large enterprises on the basis of end users.

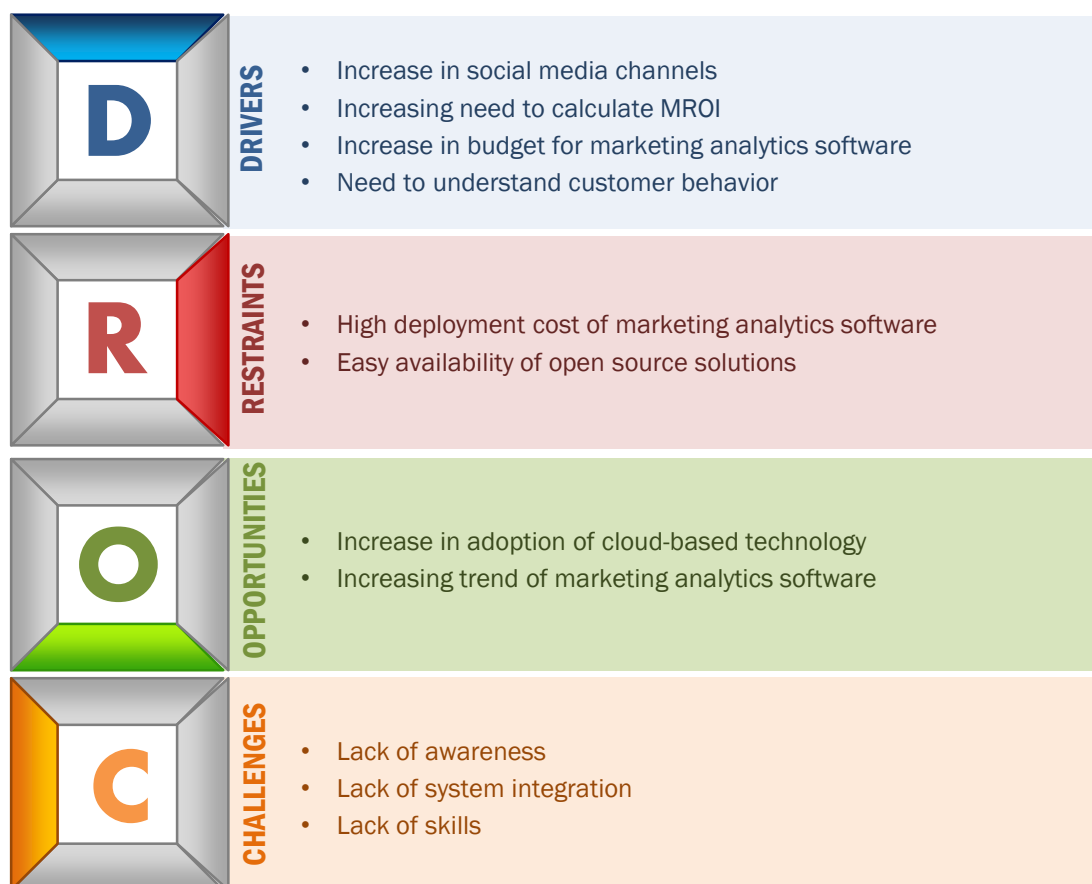

5.3 MARKET DYNAMICS

The global marketing analytics software market is expected to have a high growth rate with a CAGR of 11.84% during the forecast period 2014–2019. This is because of the increasing importance of customers and the need to understand their purchasing behavior, as customers play a crucial role in the growth of the businesses. The market is further driven by increasing social media channel, increasing investment in marketing analytics, and the need to know the Rol of marketing campaigns.

With a large number of consumers on social media channels, organizations can track the performance of their marketing activities on these channels with the help of marketing analytics solutions. The solution helps enterprises in automatically managing a large amount of data at a time. However, factors like easily available open source solution and the cost required to deploy the software pose as major barriers to the growth of the marketing analytics software market.

FIGURE 18 RISE IN SOCIAL MEDIA CHANNEL IS DRIVING THE MARKETING ANALYTICS SOFTWARE MARKET

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5.3.1 DRIVERS

5.3.1.1 Increase in social media channels

The increase in usage of social media has generated huge amounts of data. This data helps organizations to know what exactly both current and prospective customers are talking about a brand or product, as well as of the competitors. However, the difficulties of generating meaningful, and actionable insights from this social data are numerous and scary. There is a need to shift through huge amounts of information scattered across numerous channels, which makes it difficult to aggregate data and assess the comparative value of different interactions. The marketing analytics software plays an important role in analyzing and simplifying this data and deriving crisp information which can be used to make better marketing strategies on time to attract maximum customer as well as retain their current customers.

5.3.1.2 Increasing need to calculate MROI

Organizations are spending millions on their marketing activities and thus it is necessary for them to know their MROI. The marketing analytics software helps not only in finding their MROI but also increases their MROI. Moreover, these days, business leaders are under increased pressure to make their marketing activity more qualitative. The leaders as well as investors need to know how their marketing dollars are being spent, and marketers and advertisers are held more accountable for it. Thus, the demand for the tool that measures marketing accountability is emerging in order to help the marketing and communication

professionals to know how their marketing investments are spent and also how they can spend their dollars to obtain greater return on their marketing investments.

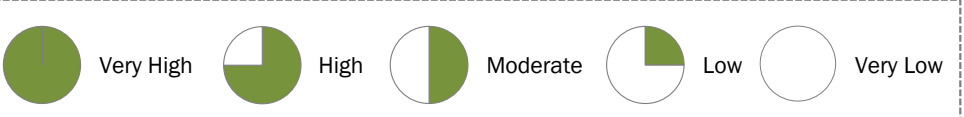

5.3.1.3 Increase in budget for marketing analytics software

The companies are increasingly investing huge amounts on marketing their products and services. Out of this huge budget, almost 10% is used for marketing analytics and it is expected to increase over the next 5 years. Due to this, it is expected that the market will see significant growth during forecast period. The marketing analytics software is playing an important role in managing the social media activities in an organization. As social media is gaining importance, the budget for marketing analytics is also increasing.

5.3.1.4 Need to understand customer behavior

Companies have huge databases about their customers, but it becomes very difficult to extract the useful information out of it. These databases contain in-depth information such as demographics, sources of influence, motivators, average income, and so on about their customers. This information can be used to inform marketing and ad campaigns, if it is rightfully used. Marketing analytics software plays an important role in calculating this information. It can be used to predict purchases, analyze customer behavior and better understand the people buying a product and make marketing strategies accordingly.

TABLE 2 INCREASING NEED TO CALCULATE MROI IS PROPELLING THE GROWTH OF THE MARKETING ANALYTICS SOFTWARE MARKET

S. No	Key Drivers	Description	Importance
1	Increase in social media channels	- Large amount of data is created on the social media channels - These data helps to understand customers behavior and competition - Marketing analytics helps to segment the useful data from the huge complex data	
2	Increase in need to calculate MROI	- Huge amount of budget is allocated for marketing campaigns - There is a need to know whether the amount is invested in the right campaign by calculating MROI	
3	Increase in budget for marketing analytics software	Organization are becoming aware about the benefits of the marketing analytics software	
4	Need to understand customer behavior	- Customers have an important role for every organization - Organizations need to understand the changing customer behavior, so that they can make timely marketing strategies accordingly	
*Key 			

*Note: The definitions for the market importance would remain the same as key seen here for the rest of the moon charts

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5.3.2 RESTRAINTS

5.3.2.1 High deployment cost of marketing analytics software

The cost incurred to deploy the marketing analytics software is more, and compared to it, the tangible RoI is low. This factor acts as a major barrier in the growth of marketing analytics software market. Thus, the companies which lack the resources do not opt for the software due to it being over-expensive, even if they are interested in this statistical modeling technique. The companies with sufficient resources deploy these solutions, but organizations with limited resources do not integrate the solution as they use traditional statistical methods.

5.3.2.2 Easy availability of open source solution

The easy availability of open source solutions like Google Analytics is restraining the growth of the marketing analytics software market globally. The companies instead of buying the expensive solution go for the free solution that is easily available. Thus, the easy availability of the complementary solution is one of the major factors that hold back the marketing analytics software market.

TABLE 3 HIGH DEPLOYMENT COST IS HAMPERING THE GROWTH OF MARKETING ANALYTICS SOFTWARE

S. No	Key Restraints	Description	Importance
1	High deployment cost	- The cost associated with deploying marketing analytics software is very high - Thus the companies with insufficient resource do not deploy the software	
2	Easily available open source solutions	The open source solution are easily available and at free of cost	

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5.3.3 OPPORTUNITIES

5.3.3.1 Increase in adoption of cloud-based technology

There is increase in the trend of cloud-based technology. The marketing analytics software is now available over cloud, and this cloud-based solution reduces the upfront costs and eliminates the maintenance charge of the server. This is the ideal solution for SMBs and companies who find the on-premises solution costlier. Therefore, the increasing adoption of cloud-based technology is an opportunity for the growth of marketing analytics software market which will remove the barrier of high cost solutions.

5.3.3.2 Increase in trend of marketing analytics

Organizations are investing hugely in marketing analytics due to the increase in database and the value derived from it. It is expected that the overall percentage of marketing budget for analytics will grow gradually. To retain customers, attract new prospects, and perform strongly in the market, companies are adopting this solution. The marketing analytics software is gaining popularity because of the need to track the campaigning RoI in order to continuously optimize campaigns for higher returns. Due to the emerging trend of the marketing analytics software, awareness about the solution is created in the market and more enterprises are going for it.

TABLE 4 INCREASING TREND OF MARKETING ANALYTICS SOFTWARE WILL BOOST THE MARKETING ANALYTICS SOFTWARE MARKET

S. No	Key Opportunities	Description	Importance
1	Increase in cloud-based adoption	- The cloud-based marketing analytic software will be less costly - The time required to deploy it will be comparatively less	
2	Increasing trend of marketing analytics	- Marketing analytics is gaining popularity because of the increase in competition - Organizations want to deploy the software to garner the benefits of the latest technology	

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5.3.4 CHALLENGES

5.3.4.1 Lack of awareness

There is lack of awareness about the marketing analytics software among the managers of enterprises. The managers are unaware of how the software can help to maximize their MROI. Most of the managers go for the traditional method and end up with investing huge amounts in marketing campaigns. If the top managers do not use the software, then the associated employees working under the managers also go with the traditional methods to calculate their MROI. Thus, the lack of awareness among organizations has been the key hurdle toward the growth of marketing analytics software market. There is a need to create awareness about the marketing analytics software and how it will benefit organizations.

5.3.4.2 Lack of system integration

Lack of system integration in order to deploy the marketing analytics software is a challenge faced by most of the organizations. Most organizations do not use updated systems, and thus it becomes very inconvenient to change their system to only install the software and also very expensive, as the marketing analytics software needs special specification of hardware and software for the system.

5.3.4.3 Lack of skill

The major challenge for the growth of marketing analytics software market is lack of skills. Even though the enterprises are aware of the software and its benefits, they cannot deploy the software because of the lack of skilled employees to use the marketing analytics software effectively. Simply implementing analytics software and running reports is not enough to improve the results of marketing activities. For the software to be effective, companies must be proactive in understanding the data's implications and limitations and in using it to drive decision making.

TABLE 5 LACK OF AWARENESS AMONG MANAGERS IS THE KEY CONSTRAINT FOR THE GROWTH OF MARKETING ANALYTICS SOFTWARE MARKET

S. No	Key Challenges	Description	Importance
1	Lack of awareness	Enterprises are not aware of the benefits of the marketing analytic software and how can it add value to their organizations	
2	Lack of system integration	Organizations lack systems that are compatible to the marketing analytics software	
3	Lack of skill	Organizations lack skilled employees to successfully use the software

6 INDUSTRY TRENDS

6.1 INTRODUCTION

The marketing analytics technology simplifies the task of the marketing and sales teams, as it delivers a variety of benefits such as tracking engagement with marketing campaigns, improving multi-channel marketing, and providing critical funnel metrics. Sales and marketing platforms can easily be integrated to give a more closed-loop approach to marketing analytics. With the explosion of lead and customer data available at marketer's fingertips, it is no surprise that marketing analytics has become the rising star of business analytics. Companies like Amazon use the marketing analytics software to predict exactly what they want.

6.2 VALUE CHAIN ANALYSIS

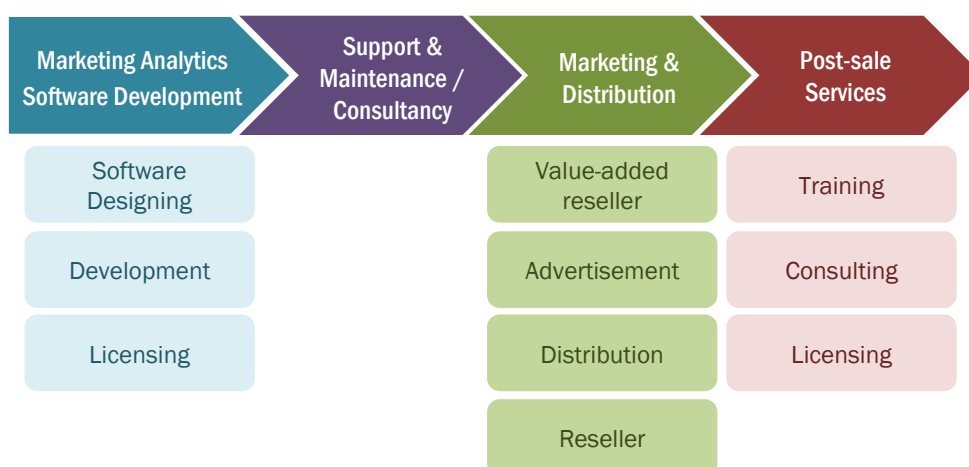

The increasing data over social media and the need to analyze this data to derive valuable information out of it is creating more demand for the marketing analytics software. Moreover, lack of system integration and skilled employee are the main challenges faced by the vendors these days. Therefore, large companies are acquiring small companies that offer marketing analytics services to enhance their product portfolio.

The general trend followed in the marketing analytics software is that the software is designed at the marketing analytics provider's workplace. Here, the solution is designed according to the requirement of the organization. This is followed by testing procedures executed to check for proper functioning of the solution.

The solution designed and tested is integrated into the service providers' network by the system integrators. The system integrators ensure that the solutions are integrated in the service provider's network and function smoothly.

Post sales services are provided by software developers and service providers of marketing analytics software. Training, licensing and consulting services add some precious intangible value that helps marketing analytics software vendors to retain the customers. It also builds the relationship between the vendors and customers and keep things running.

*Others include telecommunication, travel and transport, and real estate

6.3 SUPPLY CHAIN ANALYSIS

The major players who influence the marketing analytics software market are SMBs and enterprises. Other major influencers in this market are system integrators, end users, investors, and research organizations.

Prominent Companies:

The prominent companies in this market are the companies that have strong brand value, are well-established, and have a strong financial stability. These companies are the one who are operating for a long time in the market and who dominate the market with their strategies, strong marketing activities, and product offerings. In this market, there are many prominent players which include IBM, Adobe, Accenture, Oracle, and many others.

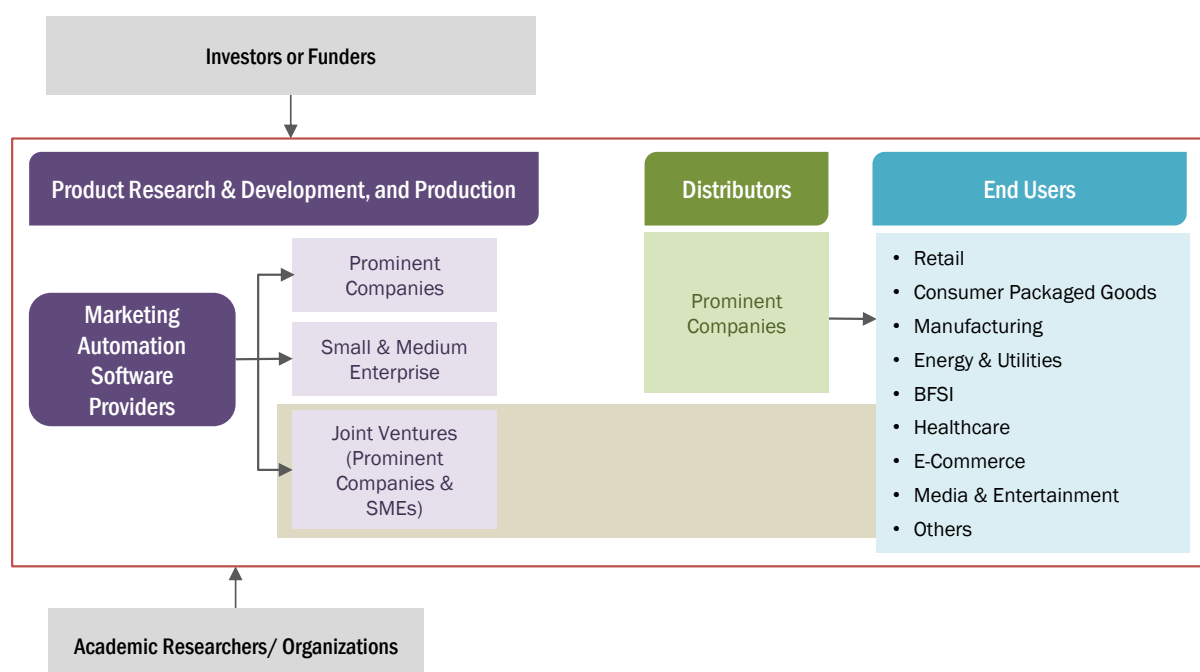

Small and Medium Businesses:

SMBs are companies with a narrow product range and weaker financial strength and distribution networks as compared to prominent companies. Some of these companies strategically enter into partnerships or joint ventures with prominent companies to increase their shares and visibility in the market. This enables them to enhance their distribution network, gain access to new technologies, and acquire the technical/operational know-how of other companies. However, currently, in the marketing analytics software market, SMBs are being acquired by prominent companies to increase their product offerings and geographical reach.

End Users

Retail, consumer packaged goods, high-tech manufacturing, energy & utility, BFSI, healthcare, e-commerce, media & entertainment, and other verticals are the end users who use the marketing analytics software to measure their marketing activities.

6.4 INDUSTRY TRENDS

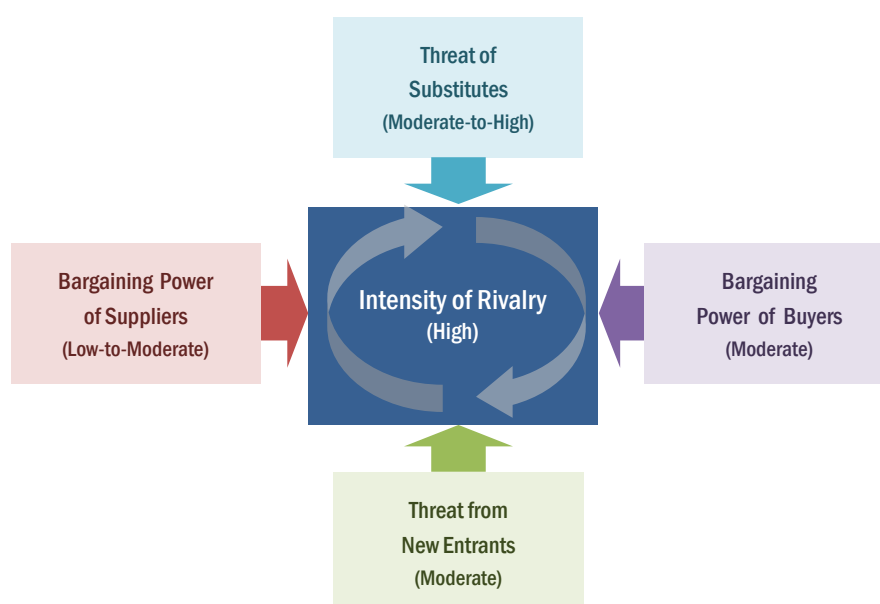

TABLE 6 MOBILE MARKETING ANALYTICS IS THE LEADING TREND IN MARKETING ANALYTICS SOFTWARE MARKET

1	Mobile Marketing Analytics	▪ The use of mobile marketing analytics technology have increased in the marketing analytics software market. ▪ This solution measures key mobile metrics, click-through rates, conversion rates. ▪ The solution also helps to know the number of customer visited the company app and the time spent by them
2	Acquisition of Small Players	▪ The prominent players of the market are acquiring small companies to increase their offerings. ▪ This trend is been obtained by most of the companies.
3	Cloud- based Marketing Analytics Solution	▪ The end users are demanding more for the cloud based analytics solution ▪ As the solution is cheaper as compared to that of the on-premise solution ▪ And also it requires less time for deployment

6.5 PORTER'S FIVE FORCES ANALYSIS

The competitive environment prevailing in the industry can be analyzed through the framework of Porter's five forces analysis.

FIGURE 21 PORTER'S FIVE FORCES ANALYSIS : MARKETING ANALYTICS SOFTWARE MARKET

Sources: Annual Reports, SEC Filings, Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

6.5.1 THREAT FROM NEW ENTRANTS

The threat from new entrants is moderate in the marketing analytics software market and is based on the following factors:

Increasing marketing analytics software vendors: Many companies are entering the marketing analytics software market due to the increasing trend of marketing analytics. As the amount of data is increasing day-by-day at a very fast rate, the need for analytics tool is being strongly felt. Therefore, to enjoy the profits from emerging markets, many companies are entering this market. Thus, there is high threat from new entrants. Even the major companies are acquiring small companies operating into analytics to enter into this emerging market.

High entry barriers: Even though many companies are entering the market, still the entry barriers are high because in order to enter the analytics market they need expensive system integration and highly skilled employees to develop the software. Having skilled employees with the knowledge of analytics is one of the biggest challenges for the vendors of the marketing analytics software. Therefore, even if the company manages to enter the market, it is still difficult to survive in the market because of it being highly volatile.

- Increasing marketing analytics software vendors
- High entry barriers

6.5.2 THREAT FROM SUBSTITUTES

The threat from substitutes is moderate to high in the marketing analytics software market based on the following factors:

Availability of complementary solutions: Open source solutions such as Google analytics are easily available online. As the cost to deploy the marketing analytics software is relatively high, companies with insufficient resources adopt the open source solution to satisfy their analytical needs. Also, the result derived from one software system is different than that of the other, so if a company is not satisfied by a result, it shifts to other software.

High cost sensitivity: The marketing analytics software market is highly cost sensitive, as the cost incurred to deploy the software is very high and the RoI from it is comparatively low. Therefore, the companies are adopting the cloud-based software more than the on-premises, because cloud-based solutions are comparatively of low cost and require less time to derive the result.

Traditional methodology: As the cost to deploy the marketing analytics software is high and it requires special systems to integrate the software, many organizations still follow the traditional method of data mining and use Excel to derive result. Even managers who are aware of the software and its benefits go with the traditional method.

- Availability of complementary solutions
- High cost sensitivity
- Traditional methodology

6.5.3 BARGAINING POWER OF SUPPLIERS

The impact of the bargaining power of the suppliers is moderately low in the marketing analytics software market based on the following factors:

Moderate number of market players: The number of market players is comparatively moderate, so the bargaining power of the suppliers is moderately low. All the organizations are not adopting the technology, as it is mainly adopted by the FMCG sector.

High switching cost: The switching cost from one buyer to another is high in the marketing analytics software market. The software systems of pioneer companies are costlier than that of the small players.

Also, the on-premises solutions cost more than the cloud-based solutions. The RoI of the on-premises solution is also comparatively low.

Online solutions: Open-source solutions are easily available on the Internet. Therefore, companies with insufficient resources use this free open-source solution to derive their result from the complex huge data. As the software systems are usually available through Internet, the users can choose the best solution which is much easier to use and understand. This may cause significant decrease in the power of suppliers.

- Moderate number of market players
- High switching cost
- Online solutions

6.5.4 BARGAINING POWER OF BUYERS

The bargaining power of the buyers is moderately high in the marketing analytics software market based on the following factors:

Moderate number of buyers: All the organizations do not deploy the marketing analytics software because firstly they are not aware of the benefits of the software and secondly the cost incurred to deploy the software is very high. Mostly, Fast-Moving Consumer Goods (FMCG) and the e-commerce sectors install the software to understand their customer behavior and their brand value among customers. Thus, the bargaining power of the buyers is moderately high.

Easy availability of alternate suppliers: Even though there are moderate number of suppliers, the customers can easily reach vendors because of their marketing campaigns. The buyers have full knowledge of their requirement and also about the alternate companies providing the same technology at a comparatively lower cost. If the solution is of very high rate, then the companies go with the traditional method or the substitute method, both of which are easily available.

- Moderate number of buyers
- Easy availability of alternate suppliers

6.5.5 INTENSITY OF COMPETITIVE RIVALRY

The threat from internal competition is high in the marketing analytics software market based on the following factors:

Niche market players: Many small players who are entering the market concentrate on acquiring the niche market of small organizations by providing them low-end solutions that are of comparatively low cost. Small businesses have just started entering the data-driven marketing model, but it is expected to be the largest potential segment in the long run.

High exit barrier: The exit barrier is high for the companies because it is very expensive to develop the marketing analytics software because of low availability of the skilled labor with the complete knowledge of the analytics and also it requires special system integration to develop it. Many companies are not aware of the software and its benefits or they prefer the substitute solution for calculating MROI, so it is difficult to survive in the market.

Increasing demand condition: The demand for the marketing analytics software is increasing and many high professionals are interested in it. The companies are realizing the need for these solutions due to the increasing amount of data over social media and the volatile market. Thus, it becomes beneficial to understand customer behavior and make marketing strategies. Also, the marketing budgets are being increased at a very high rate, so the organizations need to calculate their MROI and for that they need the marketing analytics software.

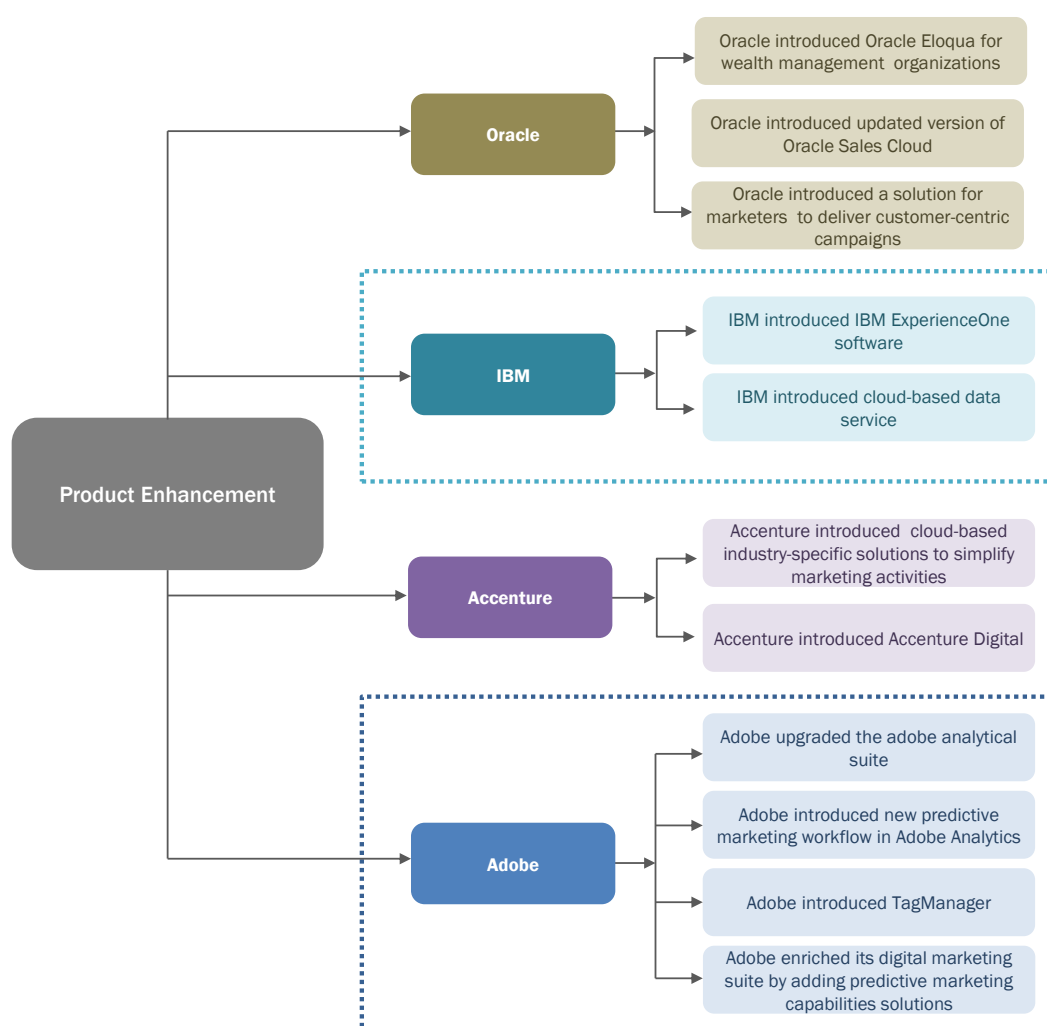

6.6 STRATEGIC BENCHMARKING

The marketing analytics software market is driven by many big players such as Adobe, Accenture, IBM, and Oracle. They have adopted both organic as well as inorganic growth strategies to increase their market shares in the highly competitive marketing analytics software market.

6.6.1 PRODUCT ENHANCEMENT AND EXPANSION

The prominent companies of the marketing analytics software are developing new products or enhancing their offerings to satisfy customer demand. This strategy has enabled these companies to validate the technology, attract new customers and retain old ones by enriching their experience. This helped the companies to increase their revenue, as these new products provide a competitive edge. Players like IBM, Oracle, Adobe, and Accenture adopted this strategy.

FIGURE 22 IBM, ORACLE, ADOBE, AND ACCENTURE LAUNCHED NEW SOLUTIONS AND SERVICES FOR PRODUCT ENHANCEMENT

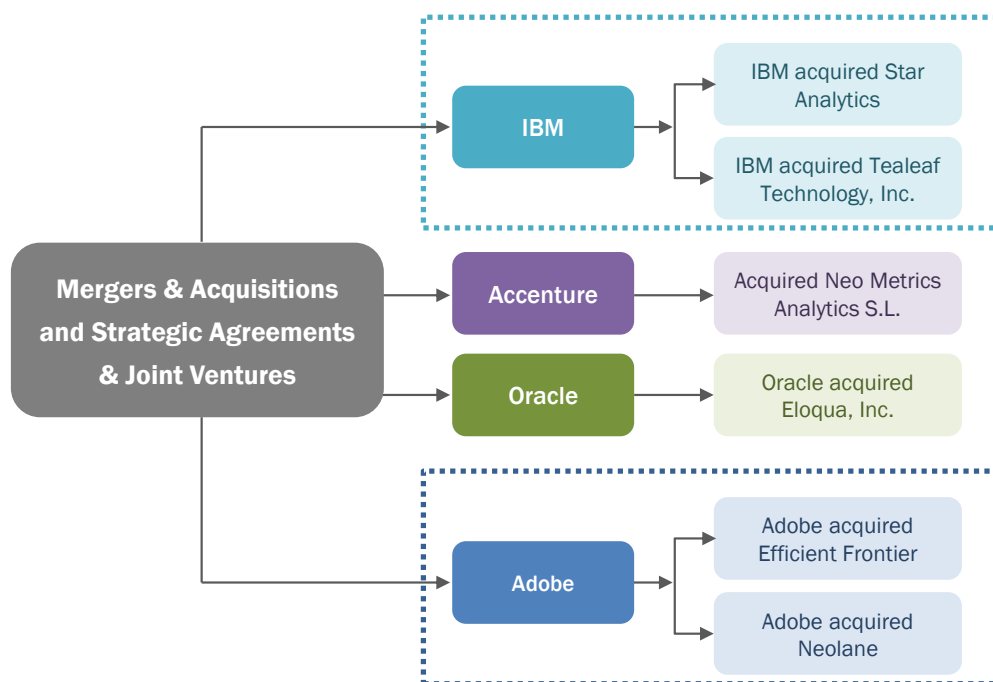

Sources: Press Releases, Annual Reports, Expert Interviews, and MarketsandMarkets Analysis

6.6.2 MERGERS & ACQUISITIONS, STRATEGIC AGREEMENTS, AND JOINT VENTURES

Merger and acquisition is another strategy in the marketing analytics software market. Pioneer companies like IBM, Oracle, and Adobe have adopted this inorganic strategy to grow in the marketing analytics software market. The companies are also adopting this strategy to expand their geographic presence and integrate the technology of the acquired company.

FIGURE 23 IBM, ORACLE, ADOBE, AND ACCENTURE ADOPT INORGANIC STRATEGIES TO GROW IN MARKETING ANALYTICS SOFTWARE MARKET

Sources: Press Releases, Annual Reports, Expert Interviews, and MarketsandMarkets Analysis

7 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET, BY APPLICATION

KEY FINDINGS

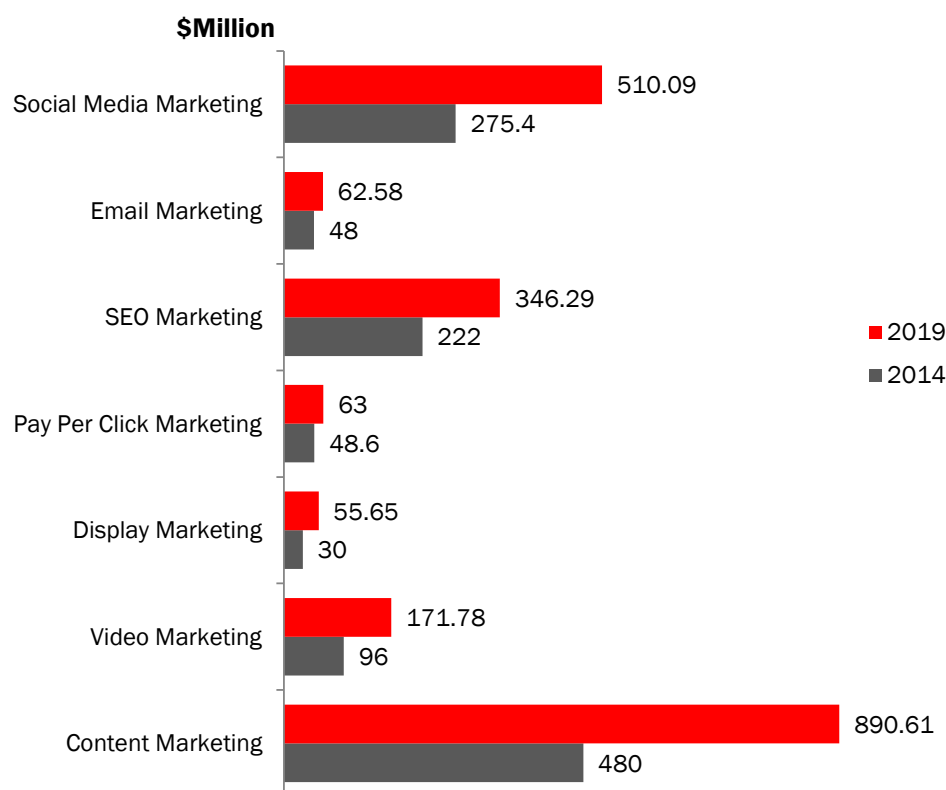

- The marketing analytics software market by application is projected to reach \$2,100 million in 2019 from \$1,200 million in 2014 at a CAGR of 11.84% during the forecast period 2014–2019
- The need to understand customer behavior and the huge investment in the development of new products and services are driving the marketing analytics software market
- The content marketing application is projected to have a market size of \$890.61 million in 2019
- The content marketing application has the highest market share and is projected to grow with a CAGR of 13.16% during the forecast period
- Lack of awareness about the marketing analytics software is the key restraint to the growth of the marketing analytics software market

7.1 INTRODUCTION

Marketing analytics measures and optimizes marketing activities. Marketing analytics comprises the processes and technologies that enable marketers to evaluate the success of their marketing efforts. Marketing analytics is the practice of measuring, managing, and analyzing a marketing performance to maximize its effectiveness and optimize the RoI. Beyond the obvious sales and lead generation applications, marketing analytics can offer profound insights into customer preferences and trends. Marketing analytics allows a marketer to monitor online marketing campaigns and their respective outcomes, enabling them to spend each penny as effectively as possible.

In this report, the marketing analytics software market is segmented into seven applications, namely social media marketing, e-mail marketing, SEO marketing, PPC marketing, display marketing, video marketing, and content marketing.

FIGURE 24 CONTENT MARKETING APPLICATION IS DOMINATING THE MARKETING ANALYTICS SOFTWARE MARKET

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

TABLE 7 **MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)**

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	213.62	248.08	275.40	510.09	13.12%
E-mail Marketing	37.20	43.20	48.00	62.58	5.45
SEO Marketing	172.05	199.80	222.00	346.29	9.30
PPC Marketing	37.48	43.52	48.60	63.00	5.33
Display Marketing	23.25	27.00	30.00	55.65	13.15%
Video Marketing	74.40	86.40	96.00	171.78	12.34
Content Marketing	372.00	432.00	480.00	890.61	13.16
Total	930.00	1,080.00	1,200.00	2,100.00	11.84

Note: e - Estimated; p - Projected

Source: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table above highlights the size of the marketing analytics software market by application in marketing methods. The content marketing application is gaining huge demand because it aims for attracting and retaining customers by providing relevant content about a particular product or brand; thus, content marketing application is projected to reach \$890.61 million in 2019. The social media marketing application is projected to grow to \$510.09 million by 2019 due to increase in the trend of social media. The applications offered by the marketing analytics software help organizations to maximize their revenue and have a competitive edge in the market. The market having the least CAGR is e-mail marketing with 5.45%, as the average open rate of e-mails is declining.

7.1.1 SOCIAL MEDIA MARKETING

Social media marketing is an analytical tool that processes the data extracted from social media channels and segments them into actionable reports and visualizations. These reports and visualizations inform organizations about the online trends, which help the managers to measure the impact of their marketing effort over social media and know the view of their current and prospective customers about their brand. This application of marketing analytics also helps organizations to gather information about their competitors, their strategies, and activities.

7.1.2 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 8 **SOCIAL MEDIA MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)**

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	138.85	143.88	151.47	265.25	11.86
Cloud	74.77	104.19	123.93	244.84	14.59
Total	213.62	248.08	275.40	510.09	13.12

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of social media marketing by deployment type. The on-premises market is projected to have the largest market share during 2019 as it is expected to grow from \$151.47 million in 2014 to \$265.25 million in 2019 at a CAGR of 11.86%. The cloud market is projected to have the highest CAGR of 14.59% during the forecast period.

7.1.3 MARKET SIZE AND FORECAST, BY END USER

TABLE 9 SOCIAL MEDIA MARKETING MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	42.72	62.02	82.62	163.23	14.59
Enterprises	170.90	186.06	192.78	346.86	12.47
Total	213.62	248.08	275.40	510.09	13.12

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of social media marketing by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$192.78 million in 2014 to \$346.86 million in 2019 at a CAGR of 12.47% during the forecast period. The SMBs market is projected to have the highest CAGR of 14.59% during the forecast period.

7.1.4 MARKET SIZE AND FORECAST, BY REGION

TABLE 10 SOCIAL MEDIA MARKETING MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
NA	85.88	99.73	110.71	195.98	12.10
Europe	59.92	69.59	77.25	149.30	14.09
APAC	43.04	49.99	55.49	98.50	12.16
MEA	11.32	10.67	11.84	20.66	11.77
LA	13.46	18.11	20.10	45.65	17.82%
Total	213.62	248.08	275.40	510.09	13.12%

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of social media marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$110.71 million in 2014 to \$195.98 million in 2019 at a CAGR of 12.10%. The market size for LA is expected to grow with the highest CAGR of 17.82% from \$20.10 million in 2014 to \$45.65 million in 2019, during the forecast period 2014–2019. The MEA region has the least CAGR of 11.77% and is projected to reach \$20.66 million in 2019 from \$11.84 million in 2014.

7.2 E-MAIL MARKETING

E-mail marketing is an application of marketing analytics software where the tool reveals the exact effect of the e-mail campaigning done by an organization. The application informs about who read the e-mails and who deleted them. The application helps to identify the interested customers and formulate strategies to satisfy their requirements. Thus, the e-mail marketing tool helps to gather information and data about how the people on an e-mail list are reacting to a campaign. The e-mail marketing tool is a dominating tool in marketing analytics for both enterprises as well as SMBs. But due to evolving technology the end users are moving from the traditional method of e-mail marketing to the automated market so the market is expected to grow at slower space.

7.2.1 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 11 E-MAIL MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	24.18	25.06	26.40	32.54	4.27
Cloud	13.02	18.14	21.60	30.04	6.82
Total	37.20	43.20	48.00	62.58	5.45

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of e-mail marketing by deployment model. The on-premises market is expected to have the largest market share and is projected to grow from \$26.40 million in 2014 to \$32.54 million in 2019 at a CAGR of 4.27%. The cloud market is projected to have the highest CAGR of 6.82% during the forecast period.

7.2.2 MARKET SIZE AND FORECAST, BY END USER

TABLE 12 E-MAIL MARKETING MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	7.44	10.80	14.40	20.03	6.82
Enterprises	29.76	32.40	33.60	42.55	4.84
Total	37.20	43.20	48.00	62.58	5.45

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of e-mail marketing by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$33.60 million in 2014 to \$42.55 million in 2019 at a CAGR of 4.84% during the forecast period. The SMBs market is projected to have the highest CAGR of 6.82% during the forecast period.

7.2.3 MARKET SIZE AND FORECAST, BY REGION

TABLE 13 E-MAIL MARKETING MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
NA	14.95	17.37	19.30	24.04	4.50
Europe	10.43	12.12	13.46	18.32	6.35
APAC	7.50	8.70	9.67	12.08	4.55
MEA	1.97	1.86	2.06	2.53	4.19
LA	2.34	3.15	3.50	5.60	9.83
Total	37.20	43.20	48.00	62.58	5.45

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of e-mail marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$19.30 million in 2014 to \$24.04 million in 2019 at a CAGR of 4.50%. The market size for LA is projected to grow with the highest CAGR of 9.83% from \$3.50 million in 2014 to \$5.60 million in 2019, during the forecast period 2014–2019. MEA has the least CAGR of 4.19% and is projected to reach \$2.06 million in 2019 from \$2.53 million in 2014.

7.3 SEO MARKETING

The SEO marketing application is a fundamental tool employed to make online sites a critical point for the buying process. The SEO marketing application is widely used by CPG and e-commerce verticals. The application analyzes, measures, and reports on the critical factors manipulating the organic search engine rankings. The different types of search engines such as image search, video search, web search, or industry-specific search engines are leveraged by the SEO marketing application.

7.3.1 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 14 SEO MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	111.83	115.88	122.10	180.07	8.08
Cloud	60.22	83.92	99.90	166.22	10.72
Total	172.05	199.80	222.00	346.29	9.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of SEO marketing by deployment type. The on-premises market is expected to have the largest market share and is projected to grow from \$122.10 million in 2014 to \$180.07 million in 2019 at a CAGR of 8.08%. The cloud market is projected to have the highest CAGR of 10.72% during the forecast period.

7.3.2 MARKET SIZE AND FORECAST, BY END USER

TABLE 15 SEO MARKETING MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	34.41	49.95	66.60	110.81	10.72
Enterprises	137.64	149.85	155.40	235.48	8.67
Total	172.05	199.80	222.00	346.29	9.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of SEO marketing by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$155.40 million in 2014 to \$235.48 million in 2019 at a CAGR of 8.67% during the forecast period. The SMBs market is projected to have the highest CAGR of 10.72% during the forecast period.

7.3.3 MARKET SIZE AND FORECAST, BY REGION

TABLE 16 SEO MARKETING MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
NA	69.16	80.32	89.24	133.04	8.31
Europe	48.26	56.04	62.27	101.36	10.23
APAC	34.67	40.26	44.73	66.87	8.37
MEA	9.12	8.59	9.55	14.02	8.00
LA	10.84	14.59	16.21	30.99	13.85
Total	172.05	199.80	222.00	346.29	9.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size SEO marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$89.24 million in 2014 to \$133.04 million in 2019 at a CAGR of 8.31%. The market size for LA is projected to grow with the highest CAGR of 13.85% from \$16.21 million in 2014 to \$30.99 million in 2019, during the forecast period 2014–2019. MEA has the least CAGR of 8.00% and is projected to reach \$9.55 million in 2019 from \$14.02 million in 2014.

7.4 PPC MARKETING

PPC marketing is the application of the marketing analytics software in search engine advertising to increase the clicks for a website. The marketers need to pay for the advertisement only if a web user clicks on the ad. Due to this, the advertisers do not need to make unnecessary payments, as well as they get to know the number of users viewing their advertisement and the impact of the advertisement. The PPC ads are still available, but the activity is growing at smaller rate because of introduction of AdWords system by Google. The level of competition around is also playing a major role in the downward spiral of PPC ads.

7.4.1 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 17 PPC MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	24.36	25.24	26.73	32.76	4.15
Cloud	13.12	18.28	21.87	30.24	6.70
Total	37.48	43.52	48.60	63.00	5.33

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size PPC marketing by deployment type. The on-premises market is expected to have the largest market share and is projected to grow from \$26.73 million in 2014 to \$32.76 million in 2019 at a CAGR of 4.15%. The cloud market is expected to have the highest CAGR of 6.70% during the forecast period.

7.4.2 MARKET SIZE AND FORECAST, BY END USER

TABLE 18 PPC MARKETING MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	7.50	10.88	14.58	20.16	6.70
Enterprises	29.98	32.64	34.02	42.84	4.72
Total	37.48	43.52	48.60	63.00	5.33

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of PPC marketing by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$34.02 million in 2014 to \$42.84 million in 2019 at a CAGR of 4.72% during the forecast period. The SMBs market is projected to have the highest CAGR of 6.70% during the forecast period.

7.4.3 MARKET SIZE AND FORECAST, BY REGION

TABLE 19 PPC MARKETING MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
NA	15.07	17.50	19.54	24.20	4.38
Europe	10.51	12.21	13.63	18.44	6.23
APAC	7.55	8.77	9.79	12.17	4.43
MEA	1.99	1.87	2.09	2.55	4.07
LA	2.36	3.18	3.55	5.64	9.71
Total	37.48	43.52	48.60	63.00	5.33

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size PPC marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$19.54 million in 2014 to \$24.20 million in 2019 at a CAGR of 4.38%. The market size for LA is projected to grow with the highest CAGR of 9.71% from \$3.55 million in 2014 to \$5.64 million in 2019, during the forecast period 2014–2019. MEA has the least CAGR of 4.07% and is projected to reach \$2.55 million in 2019 from \$2.09 million in 2014.

7.5 DISPLAY MARKETING

Display marketing, an application of marketing analytics software, takes the advantage of DoubleClick cookie. The application creates segments based on demographic and Internet data and uses it for the analytics report to make strategic decisions. The display marketing tool is used to target customers with a particular behavior pattern in order to increase an advertisement's effects, as the display marketing application provides commercial messages visually, using text, logos, animations, video, or other graphic methods.

7.5.1 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 20 DISPLAY MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	15.11	15.66	16.50	28.94	11.89
Cloud	8.14	11.34	13.50	26.71	14.62
Total	23.25	27.00	30.00	55.65	13.15

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of display marketing by deployment type. The on-premises market is projected to have the largest market share during 2019 and is expected to grow from \$16.50 million in 2014 to \$28.94 million in 2019 at a CAGR of 11.89%. The cloud market is projected to have the highest CAGR of 14.62% during the forecast period.

7.5.2 MARKET SIZE AND FORECAST, BY END USER

TABLE 21 DISPLAY MARKETING MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	4.65	6.75	9.00	17.81	14.62
Enterprises	18.60	20.25	21.00	37.84	12.50
Total	23.25	27.00	30.00	55.65	13.15

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size display marketing by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$21.00 million in 2014 to \$37.84 million in 2019 at a CAGR of 12.50% during the forecast period. The SMBs market is expected to have the highest CAGR of 14.62% during the forecast period.

7.5.3 MARKET SIZE AND FORECAST, BY REGION

TABLE 22 DISPLAY MARKETING MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
NA	9.35	10.85	12.06	21.38	12.13
Europe	6.52	7.57	8.42	16.29	14.12

Total	23.25	27.00	30.00	55.65	13.15

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of display marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$12.06 million in 2014 to \$21.38 million in 2019 at a CAGR of 12.13%. The market size for LA is projected to grow with the highest CAGR of 17.86% from \$2.19 million in 2014 to \$4.98 million in 2019, during the forecast period 2014–2019. MEA has the least CAGR of 11.81% and is projected to reach \$1.29 million in 2019 from \$2.25 million in 2014.

7.6 VIDEO MARKETING

Video is becoming a popular way to communicate key information and make online selling and marketing activities. Thus, it is necessary to know whether a marketing video has captured attention, engaged audiences, and communicated large volume of information in a short time. The video marketing analytical tool helps to know all this information. The video marketing analytical tool helps to maximize investment in video, understand the audience, and measure the usage and demographics.

7.6.1 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 23 VIDEO MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	48.36	50.11	52.80	89.33	11.09

Total	74.40	86.40	96.00	171.78	12.34

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of video marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$38.59 million in 2014 to \$66.00 million in 2019 at a CAGR of 11.33%. The market size for LA is expected to grow with the highest CAGR of 17.01% from \$7.01 million in 2014 to \$15.37 million in 2019, during the forecast period 2014–2019. MEA has the least CAGR of 11.00% and is projected to reach \$6.96 million in 2019 from \$4.13 million in 2014.

7.7 CONTENT MARKETING

Content marketing, an application of marketing analytics, tells how the content is performing online. The software simplifies the creation, distribution, and analysis of contents from various channels. This simplified data is used by the marketing team to organize marketing campaigns and create a process driven operation. The application also helps to know the content return which can be used to make strategic decision about the content in future.

7.7.1 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 26 CONTENT MARKETING MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)

The table given above highlights the market size of display marketing by region. The NA market is expected to have the largest market share and is projected to grow from \$192.96 million in 2014 to \$342.17 million in 2019 at a CAGR of 12.14%. The market size for LA is expected to grow with the highest CAGR of 17.87% from \$35.04 million in 2014 to \$79.71 million in 2019, during the forecast period 2014–2019. MEA has the least CAGR of 11.81% and is projected to reach \$20.64 million in 2019 from \$36.07 million in 2014.

8 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET, BY VERTICAL

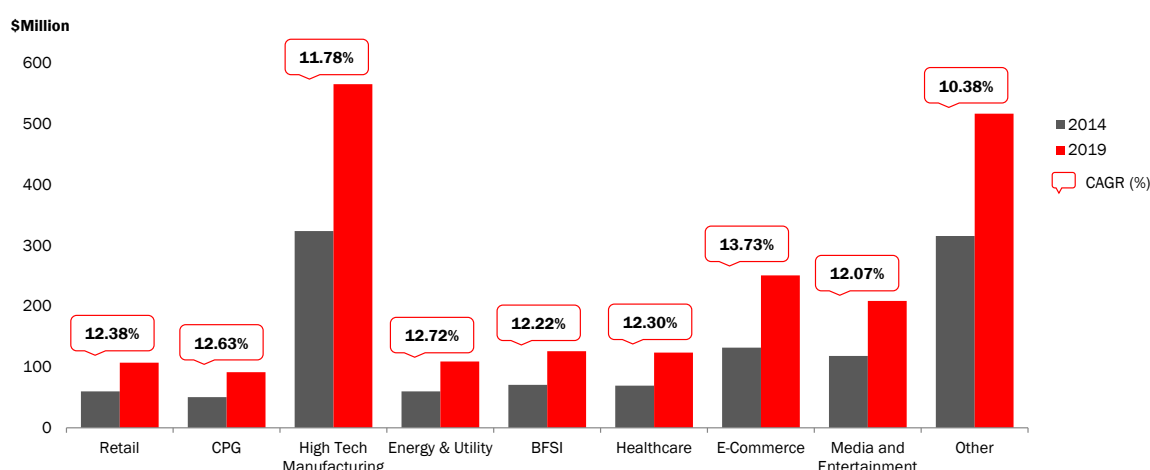

KEY FINDINGS

- The marketing analytics software market by vertical is projected to reach \$2,100 million in 2019 from \$1,200 billion in 2014, at a CAGR of 11.84% during the forecast period 2014–2019
- The e-commerce vertical is projected to have a market size of \$250.95 million in 2019
- The CPG sector is projected to have a CAGR of 12.63% during the forecast period 2014–2019
- The high tech manufacturing vertical has 27% market share of the global marketing analytics market in 2014. This vertical is projected to reach \$565.53 million in 2019
- E-commerce and CPG verticals are growing at very high CAGRs, as the demand for marketing analytics software has increased in these verticals

8.1 INTRODUCTION

In this report, the marketing analytics software market is segmented into nine verticals: retail, CPG, high-tech manufacturing, energy & utility, BFSI, healthcare, e-commerce, media & entertainment, and other verticals. The marketing analytics vendors need to understand the buyer's preference in a particular industry and accordingly design analytical systems to make their marketing activities more flexible and manageable.

FIGURE 25 HIGH TECH MANUFACTURING VERTICAL IS PROJECTED TO HAVE THE HIGHEST MARKET SHARE OF THE GLOBAL MARKETING ANALYTICS SOFTWARE MARKET IN 2019

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

TABLE 29 MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY VERTICAL, 2012–2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Retail	36.27	42.98	59.76	107.10	12.38
CPG	28.83	34.56	50.40	91.35	12.63
High-Tech Manufacturing	232.50	280.80	324.00	565.53	11.78
Energy & Utility	36.27	43.20	60.00	109.20	12.72
BFSI	44.64	52.92	70.80	126.00	12.22
Healthcare	43.52	51.62	69.36	123.90	12.30
E-Commerce	91.98	107.89	131.88	250.95	13.73
Media & Entertainment	81.38	95.58	118.20	208.95	12.07
Others	334.61	370.44	315.60	517.02	10.38
Total	930.00	1,080.00	1,200.00	2,100.00	11.84

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the size of the marketing analytics software market by vertical. The global high-tech manufacturing vertical is projected to reach \$565.53 million in 2019. The market size of the e-commerce sector is estimated to be \$250.995 million by 2019. Verticals such as e-commerce and CPG are

expected to adopt marketing analytics software and grow at an exponential rate in the forecast period. Organizations are deploying the software to increase their efficiency and have a complete view of their customer behavior.

8.2 RETAIL

The retail industry has adopted the techniques of marketing analytics widely to understand their customer preference, as most of the retailers believe in new consumer engagement methods and technology adoption. The vertical is growing at an exponential rate during the forecast period. The retail industry is expanding through online marketing and wants to have many visitors, achieve improved quality traffic, and increase conversion rates. Companies such as SAS, Wipro, and IBM provide marketing analytics software to retail industries.

The retail industry has benefited from social media channels. Now, it can analyze customer behavior easily and with the help of the marketing analytics software can attract maximum customers. In fact, the maximum customers are acquired through Facebook by the retail sector, as the retail sector does the maximum marketing over Facebook.

8.2.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 30 RETAIL MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	8.34	9.89	13.74	26.04	13.63
E-mail Marketing	1.45	1.72	2.39	3.19	5.95
SEO Marketing	6.71	7.95	11.06	17.66	9.82
PPC Marketing	1.46	1.73	2.42	3.21	5.83
Display Marketing	0.91	1.07	1.49	2.84	13.69
Video Marketing	2.90	3.44	4.78	8.76	12.88
Content Marketing	14.50	17.18	23.87	45.40	13.72
Total	36.27	42.98	59.76	107.10	12.38

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the retail market size by application. The market size for content marketing application of marketing analytics is expected to grow from \$23.87 million in 2014 to \$45.40 million in 2019, at a CAGR of 13.72% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 5.83% during the forecast period. Display marketing is closely following content marketing with CAGRs of 13.69% and 13.72%, respectively.

8.3 CONSUMER PACKAGED GOODS (CPG)

CPG companies are the companies who deliver goods that are used for daily needs. The CPG market is a highly competitive market, as the market is completely saturated and the consumer switching cost is low. Therefore, it is very essential to analyze customers and gather information about their behavior, and make marketing strategies accordingly to attract the maximum number of customers and retain them.

There are many companies who have just adopted the software to maximize their value from the investment. Companies which are at the early stage of analytics are slow to put the results of the analytics into their decision making and are thus limiting their ability to gain business advantage.

8.3.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 31 CONSUMER PACKAGED GOODS MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	6.63	7.95	11.59	22.21	13.89
E-mail Marketing	1.15	1.38	2.02	2.72	6.19
SEO Marketing	5.33	6.39	9.32	15.06	10.07
PPC Marketing	1.16	1.39	2.04	2.74	6.07
Display Marketing	0.72	0.86	1.26	2.42	13.95
Video Marketing	2.31	2.76	4.03	7.47	13.13
Content Marketing	11.52	13.81	20.13	38.72	13.97
Total	28.83	34.56	50.40	91.35	12.63

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the CPG market size by application. The market size for content marketing application of marketing analytics is expected to have the largest market share and will grow from \$20.13 million in 2014 to \$38.72 million in 2019, at a CAGR of 13.97% during the forecast period 2014–2019. PPC marketing is expected to have the lowest CAGR of 6.07% during the forecast period. Display marketing is closely following content marketing with CAGRs of 13.95% and 13.97%, respectively.

8.4 HIGH-TECH MANUFACTURING

The high-tech manufacturers market has a different approach for marketing, as these companies prefer channel partner engagement. The high-tech manufacturing industry is mainly driven by highly intense competition, continuous innovation in products, and need for quick responses to market global sourcing strategies in order to address new markets. This industry is growing and adopting marketing analytics techniques, as the industry is moving toward digital channels for marketing and has also increased its budget for online marketing by more than 50%. The most popular applications of marketing analytics in this vertical are e-mail marketing, tradeshow, SEO, and social media.

8.4.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 32 HIGH-TECH MANUFACTURING MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	53.48	64.58	74.52	137.48	13.03
E-mail Marketing	9.30	11.23	12.96	16.85	5.39
SEO Marketing	43.01	51.95	59.94	93.26	9.24

Total	232.50	280.80	324.00	565.53	11.78

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the high-tech manufacturing market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$129.44 million in 2014 to \$239.73 million in 2019, at a CAGR of 13.12% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 5.27% during the forecast period. Display marketing is closely following content marketing with CAGRs of 13.09% and 13.12%, respectively.

8.5 ENERGY AND UTILITY

Marketing analytics software provides detailed information about energy usage. With the help of marketing analytics software, the energy and utility companies can do customer segmentation and provide effective offerings for individual customers. Unlike CPG companies, the energy and utility companies focus on individual customers and make marketing strategies separately. The sector leverages its real-time data sources through the analytical software. Initially, this sector was using marketing analytics software for only generating database, extracting data, and analyzing historical trends, but now it is also deploying it to calculate its MROI.

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the energy and utility market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$23.97 million in 2014 to \$46.29 million in 2019, at a CAGR of 14.07% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 6.16% during the forecast period. Display marketing is closely following content marketing with CAGRs of 14.04% and 14.07%, respectively.

8.6 BANKING FINANCIAL AND INSURANCE (BFSI)

The BFSI sector is widely adopting marketing analytics software, because of economic turmoil, increasing customer profile, and continuous increasing pressure for the survival in the market. The industry has a strong focus on advisors and agent enablement and they use it to improve quality services, which are offered to the customers to satisfy and retain them. The software helps to identify a customer's interacting pattern with the websites, the region where the customer belongs to, and their preference about the products and services offered. The solutions also assist in managing huge data in reports and analyzing it.

8.6.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 34 BFSI MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	10.27	12.17	16.28	30.63	13.47
E-mail Marketing	1.79	2.12	2.83	3.75	5.80

Video Marketing	3.57	4.23	5.66	10.31	12.72
Content Marketing	17.84	21.15	28.28	53.41	13.56
Total	44.64	52.92	70.80	126.00	12.22

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the BFSI market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$28.28 million in 2014 to \$53.41 million in 2019, at a CAGR of 13.56% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 5.68% during the forecast period. Display marketing is closely following content marketing with CAGRs of 13.53% and 13.56% respectively.

8.7 HEALTHCARE

The healthcare sector invests hugely in traditional marketing methods such as direct marketing, tradeshow, conferences, and ads. Thus, they need to calculate their MROI and know whether the investment is done properly and which methods are giving maximum returns. With the help of marketing analytics software, personal attention can be provided to physicians or customers through the delivery of client specific information and offers. Oracle, SAS, and IBM are companies who provide solutions for healthcare industries.

8.7.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 35 HEALTHCARE MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	10.01	11.87	15.95	30.12	13.55
E-mail Marketing	1.74	2.06	2.77	3.69	5.88

Content Marketing	17.40	20.63	27.71	52.52	13.64
Total	43.52	51.62	69.36	123.90	12.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the healthcare market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$27.71 million in 2014 to \$52.52 million in 2019, at a CAGR of 13.64% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 5.76% during the forecast period. Display marketing is closely following content marketing with CAGRs of 13.62% and 13.64%, respectively.

8.8 E-COMMERCE

The e-commerce vertical widely adopts the marketing analytics software to know the buying behavior of a frequent buyer and a onetime buyer. The software helps to obtain a complete insight about the best customers, biggest spenders, churning customers, most frequent buyers, most recent buyers, and more. IBM provides specialized marketing analytics software for the e-commerce vertical.

Total	91.98	107.89	131.88	250.95	13.73

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the e-commerce market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$52.69 million in 2014 to \$106.38 million in 2019, at a CAGR of 15.09% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 7.11% during the forecast period. Display marketing is closely following content marketing with CAGRs of 15.06% and 15.09%, respectively.

8.9 MEDIA AND ENTERTAINMENT

The increasing digital and online media have been the driver of the marketing analytics software in the media and entertainment sector. As the customer's behavior is an important factor for the industry, it has high impact on the market. Hence, the companies in this industry are adopting marketing analytics solution to know their behavior and make strategies accordingly to gain a competitive advantage and generate more revenue. The primary focus of the vendors of marketing analytics is to convert the guests of sports entertainment into fans. Companies such as IBM, SAS, and Adobe offer marketing analytics solutions for this vertical.

8.9.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 37 MEDIA AND ENTERTAINMENT MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	18.72	21.98	27.19	50.80	13.32
E-mail Marketing	3.26	3.82	4.73	6.23	5.66
SEO Marketing	15.05	17.68	21.87	34.46	9.52
PPC Marketing	3.28	3.85	4.79	6.27	5.54

Total	81.38	95.58	118.20	208.95	12.07

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of media and entertainment market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$47.22 million in 2014 to \$88.57 million in 2019, at a CAGR of 13.41% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 5.54% during the forecast period. Display marketing is closely following content marketing with CAGRs of 13.38% and 13.41%, respectively.

8.10 OTHER VERTICALS

Other verticals consist of various industries such as telecommunications, travel and transport, and real estate. These verticals are growing with a CAGR of 10.38% from 2014 to 2019, and the market is projected to reach \$517.02 million in 2019 from \$315.60 million in 2014. The telecommunication industry have started adopting marketing analytics software to understand the trend of its consumers and as well as competitors due to increase in competition. And this sector invest hugely into the marketing activity so it need the analytical tool to calculate MROI.

8.10.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 38 OTHER VERTICALS MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	76.96	85.20	72.59	125.69	11.61
E-mail Marketing	13.38	14.82	12.62	15.41	4.07
SEO Marketing	61.90	68.53	58.39	85.26	7.87
PPC Marketing	13.48	14.93	12.78	15.51	3.95
Display Marketing	8.37	9.26	7.89	13.70	11.67
Video Marketing	26.77	29.64	25.25	42.29	10.87
Content Marketing	133.75	148.06	126.08	219.16	11.69
Total	334.61	370.44	315.60	517.02	10.38

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the others market size by application. The market size for content marketing application of marketing analytics is projected to grow from \$126.08 million in 2014 to \$219.16 million in 2019, at a CAGR of 11.69% during the forecast period 2014–2019. PPC marketing is projected to have the lowest CAGR of 3.95% during the forecast period. Display marketing is closely following content marketing with CAGRs of 11.67% and 11.69%, respectively.

9 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET, BY DEPLOYMENT MODEL

KEY FINDINGS

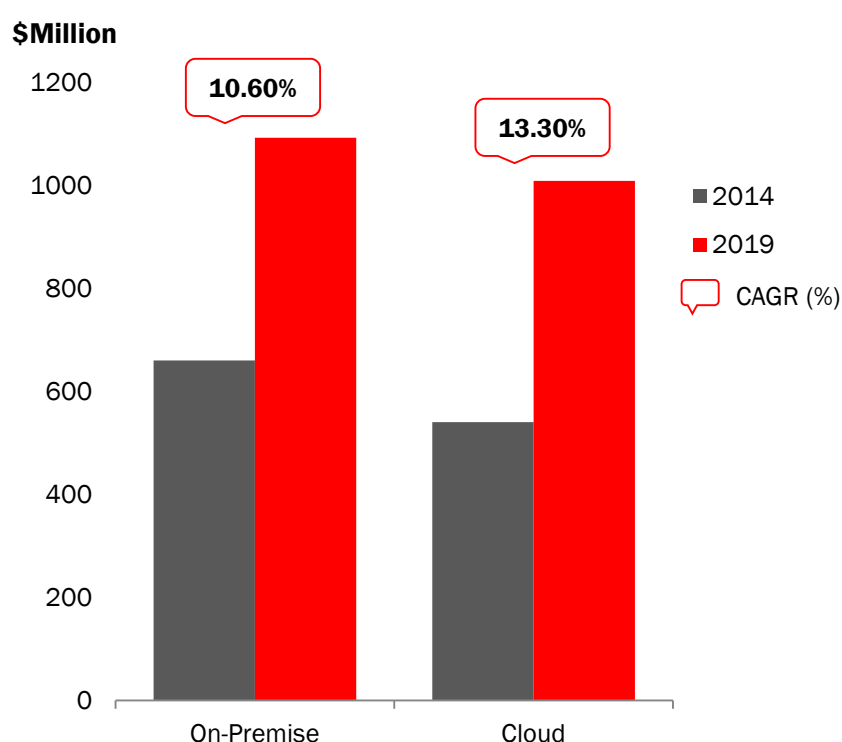

- The global marketing analytics software market by deployment type is projected to grow from \$1,200 million in 2014 to \$2,100 million in 2019, at a CAGR of 11.84% during the forecast period 2014–2019
- The on-premises deployment model is projected to have the market size of \$1,092 million in 2019
- The cloud deployment market is projected to have a CAGR of 13.30% during the forecast period 2014–2019
- The cloud deployment is projected to have 45% market share of the total market in 2019
- The on-premises deployment model's market share is projected to decrease from 55% to 52% during the forecast period, due to the increase in demand of cloud-based software

9.1 INTRODUCTION

The marketing analytics software market is segmented by deployment models into two categories, namely on-premises and cloud. With the increasing awareness of cloud-based services across all verticals, the cloud-based deployment model is forecast to be adopted at a greater rate across various verticals.

The figure and the table given below show the market size of the marketing analytics software segmented by deployment model. The on-premises deployment model has the largest market size and is projected to grow from \$660 million in 2014 to \$1,092 million by 2019, with a CAGR of 10.60% during the forecast period. The cloud market is projected to have the highest growth of 13.30% during the forecast period.

FIGURE 26 MARKETING ANALYTICS SOFTWARE MARKET SIZE BY CLOUD-BASED DEPLOYMENT MODEL IS PROJECTED TO GROW BY 13.30% DURING THE FORECAST PERIOD

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

TABLE 39 MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY DEPLOYMENT MODEL, 2012-2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014-2019)
On-Premises	604.50	626.40	660.00	1,092.00	10.60
Cloud	325.50	453.60	540.00	1,008.00	13.30
Total	930.00	1,080.00	1,200.00	2,100.00	11.84

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the size of the marketing analytics software market by deployment model. The market size for cloud deployment model is projected to grow from \$540 million in 2014 to \$1,008 million with a CAGR of 13.30%. Most of the companies are shifting their technology from on-premises to cloud based to reap the benefits of the cloud-based solutions; thus, the market is experiencing huge demand for this solution.

9.2 CLOUD

The increasing demand of cloud-based solutions is considered as an opportunity for the growth of marketing analytics software market. The market is observing growth, as most of the organizations are adopting the cloud-based marketing analytics software. The cost-effective cloud-based model is a user-friendly technology, which has less system integration requirement and less maintenance cost. It is projected that the cloud-based deployment would grow at an exponential rate during the forecast period.

9.2.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 40 CLOUD MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	74.87	104.33	124.20	245.04	14.56
E-mail Marketing	13.02	18.14	21.60	30.04	6.82
SEO Marketing	60.22	83.92	99.90	166.22	10.72
PPC Marketing	13.12	18.28	21.87	30.24	6.70
Display Marketing	8.14	11.34	13.50	26.71	14.62
Video Marketing	26.04	36.29	43.20	82.45	13.80
Content Marketing	130.10	181.30	215.73	427.29	14.65
Total	325.50	453.60	540.00	1,008.00	13.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the cloud market size by application. Content marketing is projected to have the largest market share and is projected to grow from \$215.73 million in 2014 to \$427.29 million in 2019 with the highest CAGR of 14.65% during the forecast period. PPC marketing is projected to have the lowest CAGR of 6.70% during the forecast period. Display marketing is closely following content marketing with CAGRs of 14.62% and 14.65%, respectively.

9.2.2 MARKET SIZE AND FORECAST, BY VERTICAL

TABLE 41 CLOUD MARKET SIZE, BY VERTICAL, 2012–2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Retail	12.69	18.05	26.89	51.41	13.84
CPG	10.09	14.52	22.68	43.85	14.09

Energy & Utility	12.69	18.14	27.00	52.42	14.19
BFSI	15.62	22.23	31.86	60.48	13.68
Healthcare	15.23	21.68	31.21	59.47	13.76
E-Commerce	32.19	45.31	59.35	120.46	15.21
Media & Entertainment	28.48	40.14	53.19	100.30	13.52
Others	117.11	155.58	142.02	248.17	11.81
Total	325.50	453.60	540.00	1,008.00	13.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the cloud market size by vertical. High-tech manufacturing is projected to have the largest market share and is projected to grow from \$145.80 million in 2014 to \$271.45 million in 2019 with the CAGR of 13.24% during the forecast period. The e-commerce market is projected to have the highest CAGR of 15.21% during the forecast period. CPG and energy & utility verticals are closely following the e-commerce vertical with CAGRs of 14.09% , 14.19%, and 15.21% respectively.

9.2.3 MARKET SIZE AND FORECAST, BY END USER

TABLE 42 CLOUD MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	65.10	113.40	162.00	322.56	14.77
Enterprises	260.40	340.20	378.00	685.44	12.64
Total	325.50	453.60	540.00	1008.00	13.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the cloud market size by end users. The enterprises market is expected to have the largest market share and is projected to grow from \$378 million in 2014 to \$685.44 million in 2019 with the CAGR of 12.64% during the forecast period. The SMBs market is projected to have the highest CAGR of 14.77% during the forecast period.

9.3 ON PREMISES

On-premises solutions are the solutions that have been mostly deployed by enterprises on their premises because of the risk associated with cloud-based solutions. The on-premises solution offering does not lack any feature and have a competitive advantage. The on-premises model has the maximum market share but is growing at a smaller pace because of increase in the adoption rate of cloud-based solutions.

9.3.1 MARKET SIZE AND FORECAST, BY APPLICATION

TABLE 43 ON-PREMISES MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	139.04	144.07	151.80	265.47	11.83
E-mail Marketing	24.18	25.06	26.40	32.54	4.27
SEO Marketing	111.83	115.88	122.10	180.07	8.08
PPC Marketing	24.36	25.24	26.73	32.76	4.15
Display Marketing	15.11	15.66	16.50	28.94	11.89
Video Marketing	48.36	50.11	52.80	89.33	11.09
Content Marketing	241.62	250.37	263.67	462.90	11.91
Total	604.50	626.40	660.00	1,092.00	10.60

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the on-premises market size by application. Content marketing is projected to have the largest market share and is projected to grow from \$263.67 million in 2014 to \$462.90 million in 2019 with the highest CAGR of 11.91% during the forecast period. PPC marketing is expected to have the lowest CAGR of 4.15% during the forecast period. Display marketing and social media marketing are closely following content marketing with CAGRs of 11.89%, 11.83%, and 11.91% respectively.

9.3.2 MARKET SIZE AND FORECAST, BY VERTICAL

TABLE 44 ON-PREMISES MARKET SIZE, BY VERTICAL, 2012–2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Retail	23.58	24.93	32.87	55.69	11.12

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the on-premises market size by end user. The enterprises market is expected to have the largest market share and is projected to grow from \$462 million in 2014 to \$742.56 million in 2019 with the CAGR of 9.96% during the forecast period. The SMBs market is projected to have the highest CAGR of 12.03% during the forecast period.

10 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET, BY END USER

KEY FINDINGS

- The global marketing analytics software market by end user is projected to grow from \$1,200 million in 2014 to \$2,100 million in 2019, at a CAGR of 11.84% during the forecast period 2014–2019
- The enterprise segment is projected to have a market size of \$1,428 million in 2019
- The SMBs segment is projected to have a CAGR of 13.30% during the forecast period
- Enterprises are projected to contribute 68% of the market share in 2019
- The market share of SMBs is expected to increase from 30% in 2014 to 32% by 2019
- The market share of SMBs is expected to increase from 30% in 2014 to 32% by 2019

10.1 INTRODUCTION

The marketing analytics software market has been segmented by end user into SMBs and enterprises. These end users are categorized based on the number of employees working in an organization and the global standards:

- Small businesses (less than 100 employees)
- Enterprises (more than 1,000 employees)

Enterprises use the marketing analytics software in order to optimize and streamline their online marketing activities. However, SMBs have chosen marketing analytics software to synchronize and effectively manage the growing plethora of data and information essential for smooth operations.

The figure and the table given below show the market size of the marketing analytics software segmented by end user. Enterprises have the largest market size during the forecast period. Enterprises are projected to grow from \$840 million in 2014 to \$1,428 million in 2019 with a CAGR of 11.20% during the forecast period. The SMBs market is projected to have the highest CAGR of 13.30% during the forecast period.

FIGURE 27 MARKETING ANALYTICS SOFTWARE MARKET SIZE IN SMALL AND MEDIUM BUSINESSES IS PROJECTED TO GROW BY 13.30% DURING THE FORECAST PERIOD

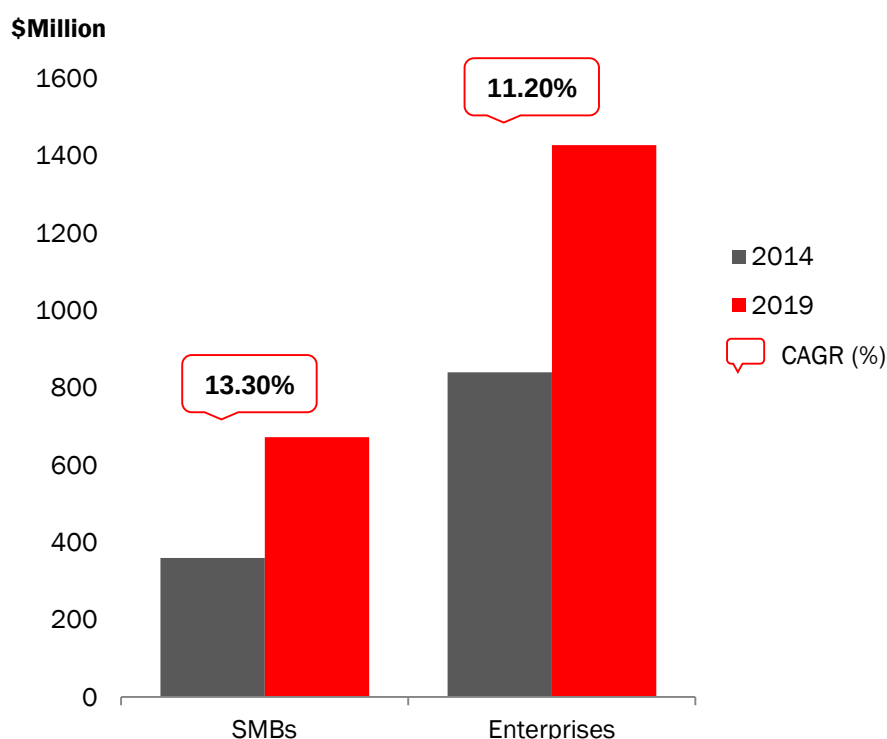

TABLE 46 MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	186.00	270.00	360.00	672.00	13.30
Enterprises	744.00	810.00	840.00	1,428.00	11.20
Total	930.00	1,080.00	1,200.00	2,100.00	11.84

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the size of marketing analytics software market by end user. The market size for SMBs is projected to grow from \$360 million in 2014 to \$672 million in 2019 with the highest CAGR of 13.30% during the forecast period, as there are many pioneer companies such as Act-On Software who concentrate on the niche market of SMBs. There is a huge demand for marketing analytics software from the SMBs so that they can easily calculate MROI of their marketing campaign and make strategic investment accordingly.

10.2 SMALL AND MEDIUM BUSINESSES (SMBS)

The many new companies who have recently entered the market are focusing on the niche market of SMBs, and the market is expected to grow at a faster rate during the forecast year. SMBs are exploiting the new analytical tools to sustain in the competitive market and grow successfully. The market is observing huge investment by SMBs, which is helping the market to grow.

10.2.1 SMBS MARKET SIZE, BY APPLICATION

TABLE 47 SMBS MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	42.78	62.10	82.80	163.36	14.56
E-mail Marketing	7.44	10.80	14.40	20.03	6.82
SEO Marketing	34.41	49.95	66.60	110.81	10.72
PPC Marketing	7.50	10.88	14.58	20.16	6.70
Display Marketing	4.65	6.75	9.00	17.81	14.62
Video Marketing	14.88	21.60	28.80	54.97	13.80
Content Marketing	74.34	107.92	143.82	284.86	14.65
Total	186.00	270.00	360.00	672.00	13.30

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of SMBs by application. Content marketing is projected to have the largest market share and is projected to grow from \$143.82 million in 2014 to \$284.86 million in 2019 with the highest CAGR of 14.65% during the forecast period. PPC marketing is projected to have the lowest CAGR of 6.70%. Display marketing and social media marketing are closely following content marketing with CAGRs of 14.62%, 14.56%, and 14.65% respectively.

10.2.2 SMBS MARKET SIZE, BY VERTICAL

TABLE 48 SMBS MARKET SIZE, BY VERTICAL, 2012–2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Retail	7.25	10.75	17.93	34.27	13.84
CPG	5.77	8.64	15.12	29.23	14.09
High-Tech Manufacturing	46.50	70.20	97.20	180.97	13.24
Energy & Utility	7.25	10.80	18.00	34.94	14.19
BFSI	8.93	13.23	21.24	40.32	13.68
Healthcare	8.70	12.91	20.81	39.65	13.76

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the market size of SMBs by vertical. High-tech manufacturing is expected to have the largest market share and is projected to grow from \$97.20 million in 2014 to \$180.97 million in 2019 with the CAGR of 13.24% during the forecast period. The e-commerce market is projected to have the highest CAGR of 15.21% during the forecast period. CPG and energy & utility verticals are closely following the e-commerce vertical with CAGRs of 14.09%, 14.19%, and 15.21% respectively.

10.3 ENTERPRISES

Enterprises are using marketing analytics solutions to calculate MROI and have a complete view of their customers' behavior. Nowadays, most of the enterprises are building their own cloud-based analytical solutions to analyze their marketing activity. However, Oracle is one of the most popular choices by enterprises for its marketing analytics software.

10.3.1 ENTERPRISES MARKET SIZE, BY APPLICATION

TABLE 49 ENTERPRISES MARKET SIZE, BY APPLICATION, 2012–2019 (\$MILLION)

Application	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Social Media Marketing	171.12	186.30	193.20	347.15	12.43
E-mail Marketing	29.76	32.40	33.60	42.55	4.84
SEO Marketing	137.64	149.85	155.40	235.48	8.67
PPC Marketing	29.98	32.64	34.02	42.84	4.72

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the enterprises market size by vertical. High-tech manufacturing is expected to have the largest market share and is projected to grow from \$226.80 million in 2014 to \$384.56 million in 2019 with the CAGR of 11.14% during the forecast period. The e-commerce market is projected to have the highest CAGR of 13.07% during the forecast period. CPG and energy & utility verticals are closely following the e-commerce vertical with CAGRs of 11.98% and 12.07%, respectively.

11 GEOGRAPHIC ANALYSIS

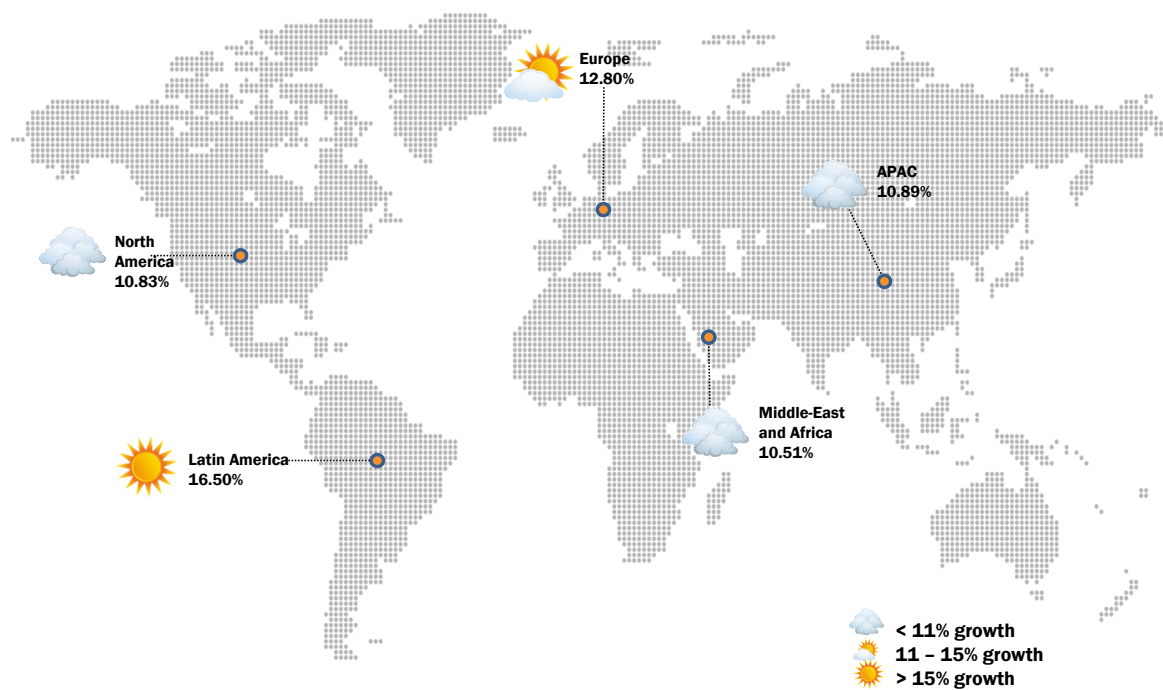

KEY FINDINGS

- The global marketing analytics software market by region is projected to grow from \$1,200 million in 2014 to \$2,100 million in 2019, at a CAGR of 11.84% during the forecast period 2014–2019
- NA is projected to contribute the highest market share of \$806.82 million in 2019
- NA has the highest market share in the marketing analytics software market. However, the market is growing at a slower space, as the NA market of marketing analytics software is at the verge of saturation
- The LA market is growing with the highest CAGR of 16.5% during the forecast period 2014–2019
- The companies in MEA have also started adopting the marketing analytics software due to the rise in competition and amount of data

11.1 INTRODUCTION

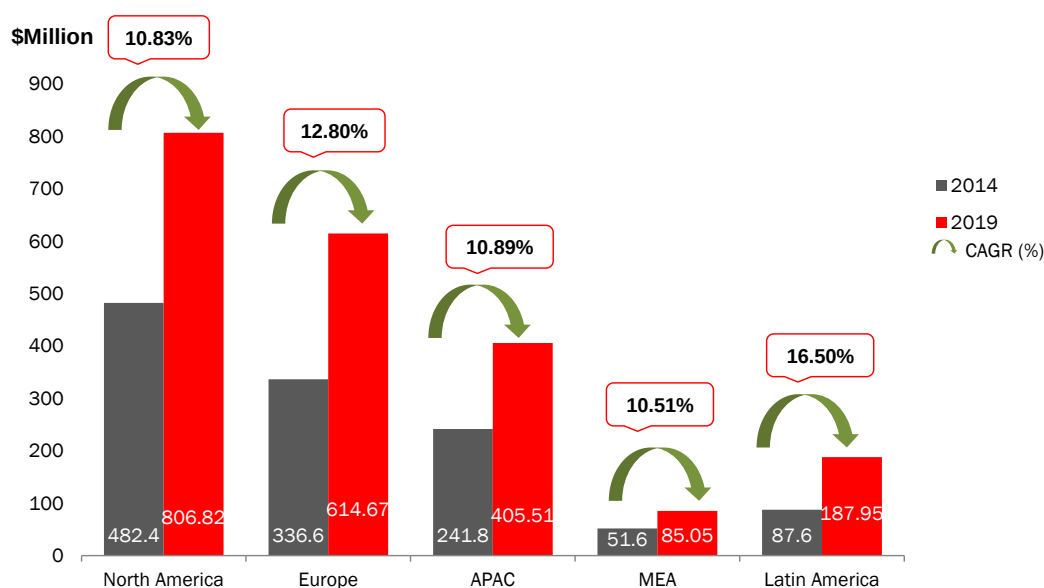

In this report, the marketing analytics software market is divided into five regions: NA, LA, Europe, APAC, and MEA. LA is expected to grow with highest CAGR during the forecast period. The figure below shows the geographic snapshot of the marketing analytics software market.

FIGURE 28 MARKETING ANALYTICS SOFTWARE MARKET: GEOGRAPHIC SNAPSHOT

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

FIGURE 29 MARKETING ANALYTICS SOFTWARE MARKET SIZE IN NORTH AMERICA IS PROJECTED TO GROW BY 10.83% DURING THE FORECAST PERIOD

Sources: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

TABLE 51 MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY REGION 2012–2019 (\$MILLION)

Region	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
NA	373.86	434.16	482.4	806.82	10.83
Europe	260.865	302.94	336.6	614.67	12.80
APAC	187.395	217.62	241.8	405.51	10.89
MEA	49.29	46.44	51.6	85.05	10.51
LA	58.59	78.84	87.6	187.95	16.50
Total	930.00	1,080.00	1,200.00	2,100.00	11.84

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the size of the marketing analytics software market by region. The market size for marketing analytics software by region is estimated to grow from \$1,200 million in 2014 to \$2,100 million in 2019, at a CAGR of 11.84% during the forecast period 2014–2019. The NA market is saturated, and so many companies serving in only the NA region are now expanding in other regions of Europe and APAC. The market across LA is in the growth stage and there is rise in competition. Therefore, to sustain in the rising competition, many enterprises across the region are adopting marketing analytics software. However, there are many companies who still prefer the traditional method in this region as the labor cost is low.

11.2 NORTH AMERICA (NA)

The marketing analytics software is widely accepted in the NA market and thus the region has the highest market share of the global marketing analytics software market. The region has witnessed significant rise in spending on marketing analytics, as the market has grown by around 10% from year 2013 to year 2014 due to increasing competition faced by the organizations to attract new customers, satisfy old customers, and retain them. The NA region is marked by the presence of large players such as IBM, Oracle, and Accenture, which are driving the market.

11.2.1 MARKET SIZE AND FORECAST, BY VERTICAL

TABLE 52 NORTH AMERICA: MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY VERTICAL, 2012–2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Retail	14.58	17.28	24.02	41.15	11.36
CPG	11.59	13.89	20.26	35.10	11.61
High-Tech Manufacturing	93.47	112.88	130.25	217.28	10.78
Energy & Utility	14.58	17.37	24.12	41.95	11.71
BFSI	17.95	21.27	28.46	48.41	11.21
Healthcare	17.50	20.75	27.88	47.60	11.29
E-Commerce	36.97	43.37	53.02	96.41	12.71
Media & Entertainment	32.71	38.42	47.52	80.28	11.06
Others	134.51	148.92	126.87	198.64	9.38
Total	373.86	434.16	482.40	806.82	10.83

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the NA market size by vertical. High-tech manufacturing is expected to have the largest market share and is projected to grow from \$130.25 million in 2014 to \$217.28 million in 2019 with the CAGR of 10.78% during the forecast period. The e-commerce market is expected to have the highest CAGR of 12.71% during the forecast period. CPG and energy & utility verticals are closely following the e-commerce vertical with CAGRs of 11.61% and 11.71%, respectively.

11.2.2 MARKET SIZE AND FORECAST, BY DEPLOYMENT MODEL

TABLE 53 NORTH AMERICA: MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY DEPLOYMENT MODEL, 2012–2019 (\$MILLION)

Deployment Model	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
On-Premises	243.01	251.81	265.32	419.55	9.60
Cloud	130.85	182.35	217.08	387.27	12.27
Total	373.86	434.16	482.40	806.82	10.83

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the size of the NA marketing analytics software market by deployment model. The on-premises market is expected to have the largest market share and is projected to grow from \$265.32 million in 2014 to \$419.55 million in 2019 at a CAGR of 9.60% during the forecast period. The cloud market is projected to have the highest CAGR of 12.27% during the forecast period.

11.2.3 MARKET SIZE AND FORECAST, BY END USER

TABLE 54 NORTH AMERICA: MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY END USER, 2012–2019 (\$MILLION)

End User	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
SMBs	74.77	117.22	135.31	274.32	15.18
Enterprises	299.09	316.94	347.09	532.50	8.94
Total	373.86	434.16	482.40	806.82	10.83

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the NA market size by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$347.09 million in 2014 to \$532.50 million in 2019 at a CAGR of 8.94% during the forecast period. The SMBs market is projected to have the highest CAGR of 15.18% during the forecast period.

11.3 EUROPE

The NA-based vendors of marketing analytics software are expanding their business in Europe to enhance their business and fulfill the growing demands for the analytics software. The region is expected to keep flourishing as many organizations in the region are shifting from the traditional method to the analytical method for their marketing activities. The continuing competition pressure and the online fever are forcing the companies of this region to adopt the technology.

11.3.1 MARKET SIZE AND FORECAST, BY VERTICAL

TABLE 55 EUROPE: MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY VERTICAL, 2012–2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014–2019)
Retail	10.17	12.06	16.76	31.35	13.34

Note: e - Estimated; p - Projected

Sources: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the European market size by end user. The enterprise market is expected to have the largest market share and is projected to grow from \$235.62 million in 2014 to \$417.98 million in 2019 at a CAGR of 12.15% during the forecast period. The SMBs market is projected to have the highest CAGR of 14.26% during the forecast period.

11.4 ASIA-PACIFIC (APAC)

Organizations in APAC are deploying marketing analytics software as there is a huge rise in social media and thus huge amounts of data are available over the social media. There is a need for marketing analytics software to analyze this data and derive meaningful information which will be helpful for organizations to make their marketing strategies on time. Mobile-based applications are expected to be adopted largely because smartphone penetration in APAC has seen exponential growth in the last few years.

11.4.1 MARKET SIZE AND FORECAST, BY VERTICAL

TABLE 58 ASIA-PACIFIC: MARKETING ANALYTICS SOFTWARE MARKET SIZE, BY VERTICAL, 2012-2019 (\$MILLION)

Vertical	2012	2013	2014-e	2019-p	CAGR% (2014-2019)

12.2 MARKET SHARE ANALYSIS, MARKETING ANALYTICS SOFTWARE MARKET

As of 2013, the marketing analytics software market was dominated by IBM with 53%, Oracle with 20%, Accenture with 15%, and Wipro with 4% market share. These top 4 companies together have accounted for 92% of the marketing analytics software market. While the other companies such as Adobe, Experian, SAS Software, Pegasystem, Harte-Hank, and Teradata have accounted 8% of the market share.

FIGURE 32 GLOBAL MARKETING ANALYTICS SOFTWARE MARKET SHARE, BY KEY PLAYER, 2013

Sources: Annual Reports, SEC Filings, Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

12.3 COMPETITIVE SITUATION AND TRENDS

The global marketing analytics software market is highly competitive, with a large number of global and local market players. This segment studies the growth strategies adopted by market players between 2012 and 2014. Players in this market have adopted various strategies to expand their global presence and increase their market shares. Partnerships, agreements, collaborations, joint ventures, mergers, acquisitions, expansions, and new product launches are some major strategies adopted by the market players to achieve growth in the marketing analytics software market.

FIGURE 33 BATTLE FOR MARKET SHARE: NEW PRODUCT LAUNCH WAS THE KEY STRATEGY

New product launches is the key strategy adopted by industry players in order to achieve growth in the marketing analytics software market. This strategy accounted for a share of 47% of all growth strategies adopted by market players. The rising demand for marketing as well as the high growth in emerging markets has encouraged companies to adopt this strategy. Market players are focusing on entering new markets by launching technologically advanced and innovative marketing analytics software solution and services in both existing and emerging markets. IBM, Oracle, Accenture, and Adobe are some of the leading market players who adopted this strategy in order to develop their business.

Besides new product launches, companies adopted the strategy of merger and acquisition, in order to expand their product portfolio and distribution network. This strategy accounted for a share of ~30% of the total number of growth strategies adopted by players in the marketing analytics software market between 2012 and 2014.

12.3.1 NEW PRODUCT LAUNCHES

The strategy of new product launches accounted for the largest share of 47% of the total strategic developments in the marketing analytics software market. Companies adopted this strategy to improve their product portfolio and meet the demand of volatile market. IBM, Oracle, Accenture, Adobe, and Experian are some of the leading companies who have adopted this strategy.

TABLE 67 NEW PRODUCT LAUNCHES, 2011–2014

Date	Company Name	Development	Market Importance
October 2014	IBM	IBM unveiled cloud-based data service that will enhance mobile and web applications with embedded analytics.	
March 2012	Adobe	Adobe enriched its digital marketing suite by adding predictive marketing capabilities solution within it.	
October 2014	Experian	Experian introduced cross-channel marketing platform to help the marketers to develop and optimize real-time, full service marketing campaigns across any channel.	
September 2014	Oracle	Oracle released updated version of Oracle Sales cloud, which includes solutions like mobile application, reporting capabilities, and industry-specific solution.	
September 2014	Oracle	Oracle integrated Oracle Data Management Platform solution with Oracle Cross-Channel Marketing and released the solution to help marketers deliver customer-centric campaigns.	

March 2014	SAS	SAS released updated SAS Customer Intelligence to solve the increasing digital business challenges and make faster decision.	
March 2014	Accenture	Accenture and SAP launched cloud-based industry-specific solutions to simplify the marketing activities.	
December 2013	Accenture	Accenture introduced Accenture Digital, which will integrate the industry-leading digital marketing, analytics, and mobility services across industries and geographic markets	
October 2013	Adobe	Adobe upgraded the adobe analytical suit by including predictive analytics capability, advanced real-time reporting, advanced real-time reporting and data visualizations, video analytics advancements, and powerful mobile app analytics	
October 2013	Experian	Experian unveiled retention-based email solution to help the marketers to have holistic view of their customers by linking traditional databases and insights.	
August 2013	Teradata	Teradata unveiled the marketing analytic service to help companies to measure their outcomes from the marketing campaign. With this launch, Teradata has enhanced its IMM analytics services portfolio.	
June 2013	SAS	SAS introduced new version of marketing analytics solution, SAS Marketing Analytics 6.1. This solution delivers customer-driven features, such as support for control groups, live seeds, enhanced campaign definitions, and improved scheduling and execution.	
March 2013	Adobe	Adobe unveiled new predictive marketing workflow in Adobe Analytics which helps the marketers and marketing analysts to sort data quickly.	
March 2013	Harte-Hank	Harte-Hank unveiled high-speed digital print capabilities which will make direct mail relevant and resonant.	
July 2013	Experian	Experian introduced Prove ID, Hunter Plus, and Tallyman EasyStart; three new solution of Decision Analytics products.	
May 2014	IBM	IBM introduced IBM ExperienceOne software to improve customer engagement by collaborating marketing, sales, and service practices.	
February 2014	Oracle	Oracle introduced Oracle Eloqua, a flexible and scalable solution for wealth management.	
October 2014	Teradata	Teradata introduced data-driven analytical solution, Connection Analytics. The solution delivers high-performance analytics.	
May 2012	Adobe	The company created highly flexible privacy solution, TagManager to help marketers in behavioral advertising.

12.3.3 MERGERS & ACQUISITIONS

Merger & acquisitions strategy is accounted for 30% out of the strategy developments incorporated by the top companies in the marketing analytics software market. The players are using this strategy to increase their customer base and enhance their technological capabilities. The pioneer players such as IBM, Pegasystem, Teradata, Adobe, and Experian are the ones who have adopted this strategy.

TABLE 69 MERGERS & ACQUISITIONS, 2012–2014

Date	Company Name	Development	Market Importance
October 2014	Pegasystem	Pegasystem acquired Ultima Information Technology. This acquisition will help the company to expand its business successfully into the market of Istanbul, Turkey.	
July 2014	Pegasystem	Pegasystem acquired Profeatable Corporation. This acquisition will help the company to enhance its cloud-based analytical offerings.	
May 2014	Pegasystem	The company acquired MeshLabs Software Private Limited. This acquisition will enhance its text analytics and social engagement solutions.	

March 2014	Teradata	Teradata acquired Think Big Analytics, Inc. the hadoop and big data consulting and solution company. This acquisition will strengthen Teradata's position and help the organization to derive data through analytics.	
December 2012	Oracle	Oracle acquired Eloqua, Inc for approximately \$871 million. With this acquisition Oracle will enhance its marketing analytics offerings.	
March 2013	IBM	Star Analytics was acquired by IBM and this acquisition will broaden the product portfolio of the company.	
January 2012	Accenture	Accenture acquired analytical intelligence consultancy company, Neo Metrics Analytics S.L.	
January 2013	Experian	Experian acquired Pacific Micromarketing to deliver enhanced consumer analytics data and services	
May 2012	IBM	IBM acquired Varicent Software Incorporated, and this acquisition will augment its analytical software offering for industries like banking, telecommunications, insurance, and retail.	
May 2012	IBM	IBM acquired Tealeaf Technology, Inc, and with this acquisition, the company will enhance its digital experience in e-commerce sector.	
March 2012	Teradata	Teradata acquired European digital marketing company, eCircle. This acquisition will enhance the cloud-based marketing solution through social media, mobile, web, and e-mail.	
June 2013	Adobe	Adobe acquired Neolane, a private company in Digital Marketing. This acquisition will bring critical cross-channel campaign management technology into the Adobe Marketing Cloud.	
January 2012	Adobe	Adobe acquired Efficient Frontier, and this acquisition will help to provide complete suite of digital capabilities to marketers for reporting and analytics.	

Source: Press Releases

12.3.4 EXPANSION

The strategy of expansions accounted for a share of 8% of all the growth strategies adopted by players in this market. Companies adopted this strategy for expanding their footprints across the globe and strengthening their research and development activities. This key strategy was majorly adopted by Wipro and IBM.

TABLE 70 EXPANSIONS, 2013–2014

Date	Company Name	Development	Market Importance
October 2014	Wipro	Wipro expanded its business in Romania. With its expansion, the company with held the strong footprint in the Eastern European market.	
September 2014	Wipro	Wipro expanded its presence in Oman to meet the increasing business requirement.	
August 2013	IBM	IBM expanded its business in Peru by opening new data center to meet the increasing demand.

13.2 ADOBE SYSTEMS INCORPORATED

13.2.1 BUSINESS OVERVIEW

Founded in 1982 and headquartered in California, U.S., Adobe is a multinational company which provides multimedia and creative software products. It also provides license of all these solutions through sales force, application stores, and also through its own website. The company distributes its products and services through a network of distributors, value-added resellers, systems integrators, independent software vendors, retailers, and original equipment manufacturers. Adobe has a global presence in the regions such as Americas, Europe, Middle East and Africa, and Asia.

FIGURE 35 ADOBE SYSTEMS INCORPORATED: BUSINESS OVERVIEW

Sources: Company Website, Annual Report, and SEC Filings

13.2.2 PRODUCT PORTFOLIO

The company offers the following products:

Category	Product
Adobe Analytics	Adobe analytics is a marketing tool which provides the current scenario of business and leverages the performance across marketing channels.
Adobe Social	Adobe social connects with the tangible data by creating posts, monitoring, and responding to the conversation and measuring the result.
Adobe SEO	Adobe SEO checks the online visibility of site and improves the site's ranking and increase its traffic.
Adobe Media Optimizer	This tool from Adobe analyzes the user media and also manages the search engine marketing and social campaign.

Adobe Campaign	Adobe campaign is an analytics tool that helps to predict the customer's needs.
Adobe Site Catalyst	Adobe Site Catalyst provides real-time intelligence about the online strategies and marketing initiative.
Adobe Tag Manager	Adobe Tag Manager allows to manage the tag distribution.
Adobe Report Builder	Adobe Report Builders allow to manipulate and analyse analytical data from within Excel.
Adobe Genesis	This tool automatically integrates the digital marketing tool into one central location.
Adobe Data Warehouse	Adobe Data Warehouse analyzes and filters the data from the large number of standard reports.
Adobe Discover	Adobe Discover provide complete information about the customers which help the marketers to make timely and accurate strategies.

13.2.1 KEY STRATEGIES

Adobe has consistently been acquiring companies such as Neolane and Efficient Frontier to enhance its cross-channel campaign management technology and digital marketing capabilities as well as to gain a competitive advantage in the marketing analytics software market. For instance, Adobe strategically acquired Neolane to merge its cross-campaigning management tools with Neolane's technology, and optimized the capabilities which provided the company with a more satisfied customer base. Thus, the company added Adobe Campaign solution into its Adobe Marketing Cloud Suite. In 2012, Adobe acquired privately held Efficient Frontier and integrated the cross-channel ad buying and optimization capabilities with its Digital Marketing Suite.

The company provides cost-effective marketing analytics solutions on cloud and insists on providing its superior marketing solutions platform on cloud which attracts more customers. Moreover, to increase the adoption rate of creative cloud offered by Adobe, the company is switching the creative product user's licensing from perpetual to subscription. The company used such strategies to reach various new customers particularly in the small and medium business space.

Adobe is maintaining strategic relationships with its third parties in order to reach new customers and geographies. This strategy also helps to grow revenue and enhance operating results. The company also offers its products on various PCs and mobile device, such as Adobe Photoshop, Adobe Muse, Adobe InDesign, Adobe Kuler, and many more.

13.2.2 RECENT DEVELOPMENTS

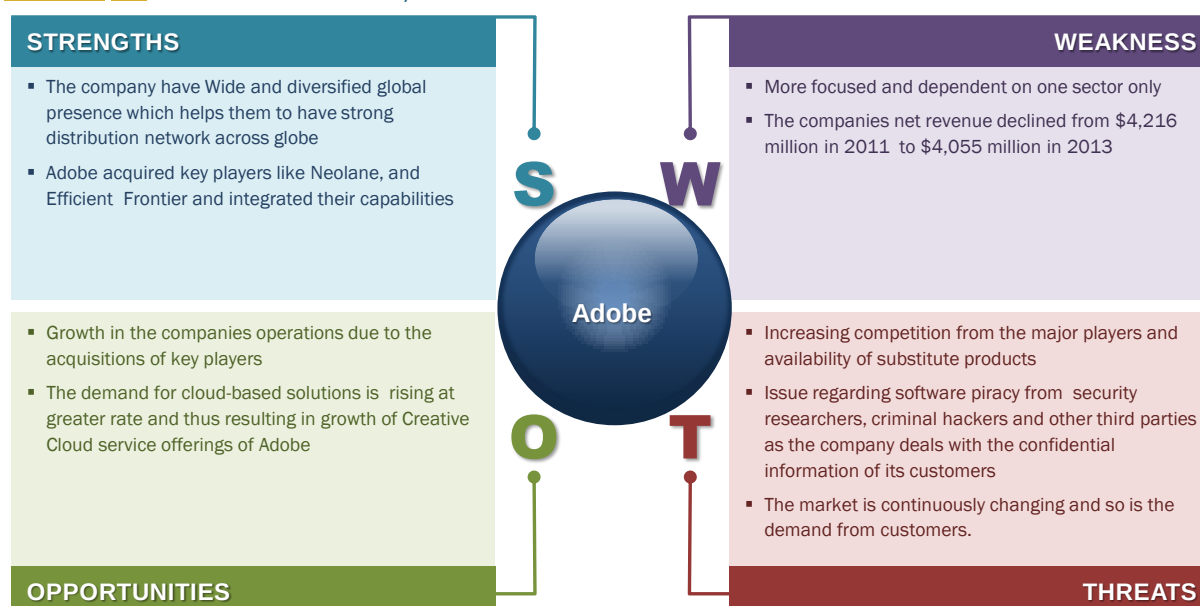

Date	Approach	Description	Importance
October 2013	New Product Development	Adobe upgraded the adobe analytical suit by including predictive analytics capability, advanced real-time reporting, data visualizations, video analytics advancements, and powerful mobile app analytics.	
June 2013	Acquisition	Adobe acquired Neolane, a private company in digital marketing. This acquisition will bring critical cross-channel campaign management technology into the Adobe marketing cloud.	
March 2013	New Product Development	Adobe unveiled new predictive marketing workflow in Adobe Analytics which helps the marketers and marketing analysts to sort data quickly.	
May 2012	New product Development	The company created highly flexible privacy solution, Tag Manager to help marketers in behavioral advertising.	

March 2012	New Product Development	Adobe enriched its digital marketing suite by adding predictive marketing capabilities solution within it.	
January 2012	Acquisition	Adobe acquired Efficient Frontier and this acquisition will help to provide complete suite of digital capabilities to marketers for reporting and analytics.

13.2.3 SWOT ANALYSIS

FIGURE 36 ADOBE SYSTEMS, INC.: SWOT ANALYSIS

Sources: Company Website, Annual Reports, and SEC Filings

13.2.4 MNM VIEW

Adobe offers at the enterprise level, the comprehensive range of marketing analytics software platforms in order to analyze the online visibility, and customer's interest areas on websites. The platform also filters data from huge complex reports and segments it so that the marketers can use it easily. These solutions are easy-to-use and available for deployment both on premises and cloud. These solutions help the marketers to plan timely strategies. The company is constantly involved in enhancing their offering and providing its customers with latest technologies and capabilities.

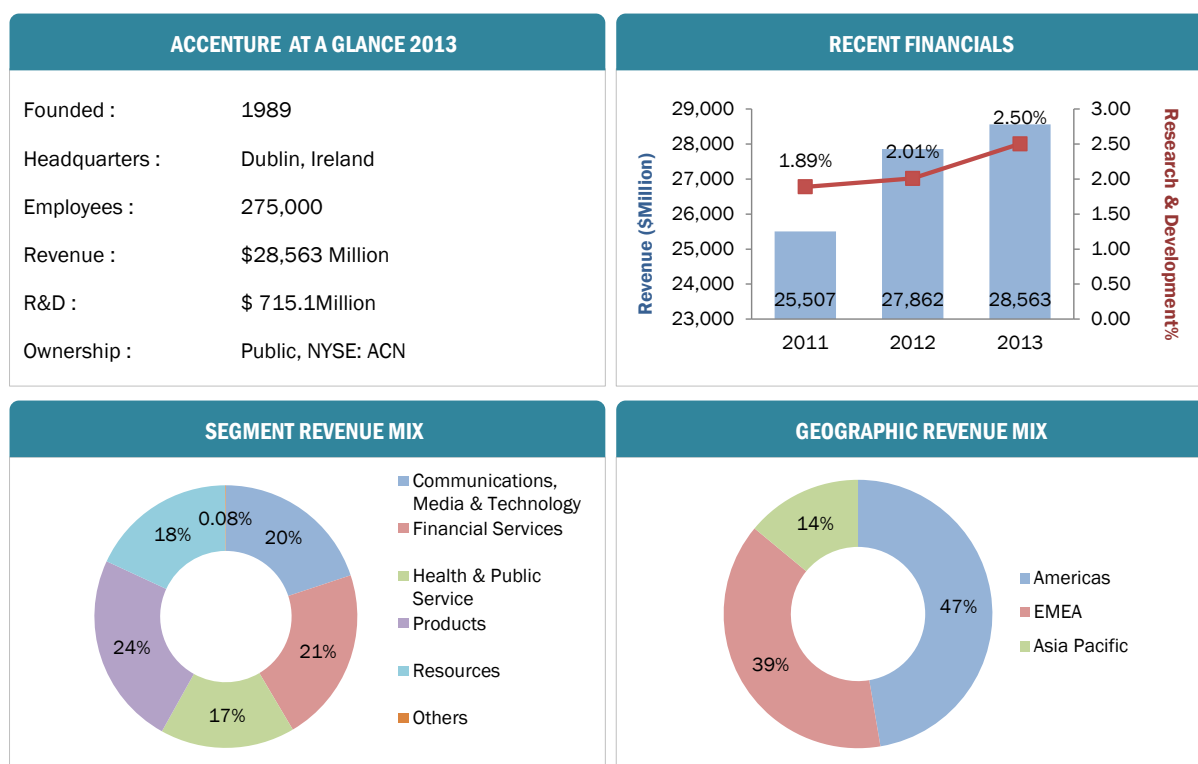

Adobe focuses on its highly diversified software portfolio. This software portfolio helps the organization in the segments of digital media, digital marketing and print and publishing. The increasing trend in digital communication and high data transfer speed are providing the significant market opportunity to Adobe Systems. Apart from this, consumers are accessing to online content and services from their mobile devices and tablets. This in turn is driving changes in consumer behavior and expectations. This will provide huge market opportunity to Adobe Systems.

13.3 ACCENTURE

13.3.1 BUSINESS OVERVIEW

Founded in 1989 and headquartered in Dublin, Ireland, Accenture is a global provider of management consulting, technology, and outsourcing services. Accenture operates through four platforms: Accenture Strategy, Accenture Digital, Accenture Technology, and Accenture Operations to create, acquire, and manage key assets central to the development of integrated services and solutions for their clients. The company offers its services and solutions through 19 focused industries in more than 56 countries with offices in more than 200 cities.

FIGURE 37 ACCENTURE: BUSINESS OVERVIEW

Sources: Company Website, Annual Report, and SEC Filings

13.3.2 PRODUCT PORTFOLIO

The company offers the following products:

Product	Description
Marketing Investment Optimization	The marketing investment optimization solution from Accenture helps in measuring ROI on marketing activities.
Agile Marketing Analytics Platform	Agile Marketing Analytics platform is an infrastructure that helps clients to increase marketing effectiveness by incorporating the current market data and updating marketing analysis.
Causal Forecasting	This solution from Accenture helps the companies to build forecasting models that quantify the impact of base price, promotions, and media among other drivers.
Product Portfolio Optimization	This solution from Accenture creates unparalleled levels of visibility by adding or deleting an item from a given product mix.

13.3.3 KEY STRATEGIES

Accenture is the pioneer company in providing various analytical software and services to the companies across various verticals. The unique selling point of Accenture is however its capability to offer industry-specific professional and management consulting services. The company is investing hugely in the research and development activities, as in 2013 it has invested almost \$715.1 million to develop new products and services, as well as it is investing in high quality advertisements and campaigns as a part of its business expansion strategy to attract maximum customers.

The company plans to focus in incorporating strong business relationships by building extensive network of customers across the globe. Accenture has entered various agreements with global telecom operators such as SAP, Microsoft, and Dell. These developments have made a great impact on the company, and have strengthened its market position in the developing countries like India, China, Russia, Turkey, and many more..

Accenture has continued to implement a strategy focused on industry and technology differentiation as well as geographic expansion. The company has made great strides with its geographic expansion agenda. While it continued to grow market share in the mature markets with significant growth potential, Accenture also sharpened its focus on the following priority emerging markets of ASEAN (Association of Southeast Asian Nations) countries like Brazil, China, India, Mexico, the Middle East, Russia, South Africa, South Korea, and Turkey.

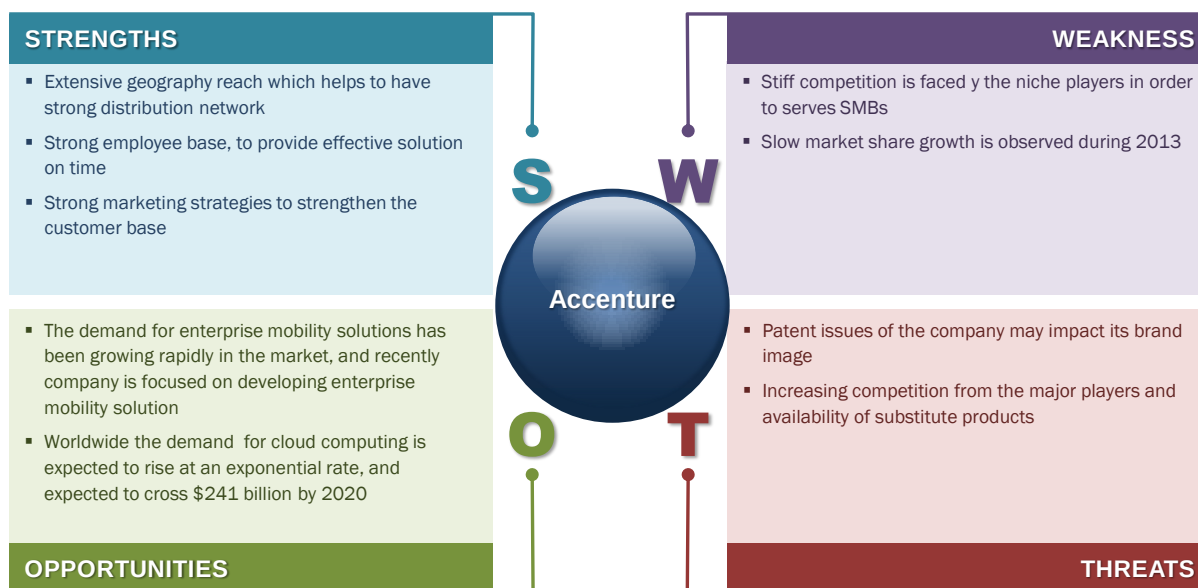

13.3.4 RECENT DEVELOPMENTS

Date	Approach	Description	Importance
March 2014	New Product Development	Accenture and SAP launched cloud-based industry-specific solutions to simplify the marketing activities.	
December 2013	New Product Development	Accenture introduced Accenture Digital, which will integrate the industry-leading digital marketing, analytics and mobility services across industries and geographic markets.	
January 2012	Acquisition	Accenture acquired analytical intelligence consultancy company, Neo Metrics Analytics S.L.	

Source: Press Releases

13.3.5 SWOT ANALYSIS

FIGURE 38 ACCENTURE: SWOT ANALYSIS

Sources: Company Website, Annual Reports, and SEC Filings

13.3.6 MNM VIEW

Accenture's business model is dependent upon the company's global delivery network, which is majorly concentrated in India and Philippines. This could greatly expose the company to major operational risks due to natural disasters or political instability in the regions. Accenture entered an agreement with SAP to accelerate the market by bringing together their technologies so that the customers can harness the benefits of digital technologies including cloud, analytics, and enterprise mobility. This has helped Accenture to catapult its growing coverage of solutions in the Latin American region by various folds.

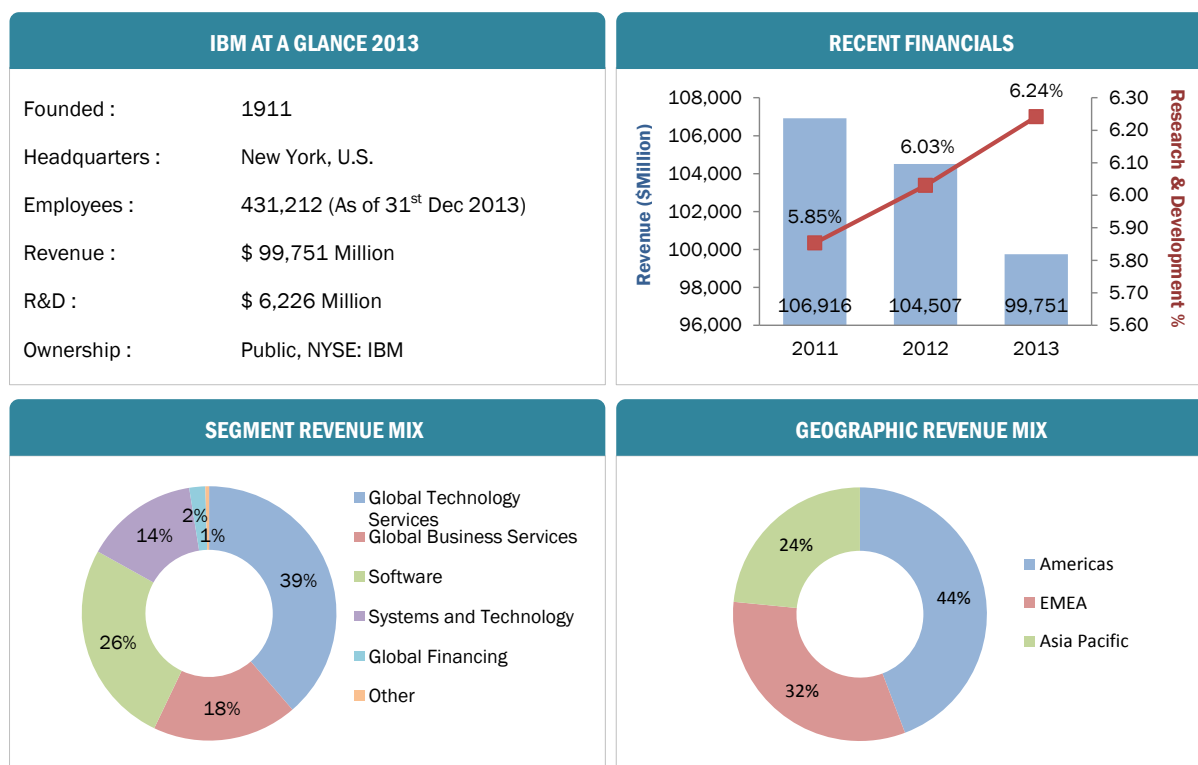

Accenture helps client to achieve specific business outcomes and enhance shareholder value by defining and executing industry specific strategies enabled by technology. Company provides a range of strategy services focused on areas such as digital technology, enterprise architecture and application, enterprise architecture and applications, finance and enterprise performance, all these services are helping its clients to serve their customers in a better way. Henceforth; company is performing consistently in the market and getting the edge over its competitors.

13.4 IBM

13.4.1 BUSINESS OVERVIEW

Founded in 1911 and headquartered in New York, U.S., IBM is a multinational IT company which offers business solution through five segments: global technology services, global business services, software, systems and technology, global financing, and other. The company is primarily engaged in providing hardware and software, and offers infrastructure, hosting, and consulting services.

FIGURE 39 IBM : BUSINESS OVERVIEW

Sources: Company Website, Annual Report, and SEC Filings

13.4.2 PRODUCT PORTFOLIO

The company offers the following products:

Product	Description
Customer Analytics	Customer Analytics helps the marketers to target the best customer.
Marketing Performance Analytics	Marketing performance analytics software from IBM measures ROI and reduces guesswork from marketing program.
Social Media Analytics	This solution unlocks the value of customer sentiment in social media.

13.4.3 KEY STRATEGIES

IBM focuses on the expanding its offerings in mainly three market categories: business analytics, cloud, and smarter planet. The company is also expanding its global presence in new regions to cater the local customer demands. The company targets the improvement of client outcome through the facilitation of innovative infrastructure, software, and solutions. IBM is engaged in continuous development of the software by understanding the changing market and accordingly changing demand and issues.

The company have continuously acquired many pioneer companies in order to broaden its product offering and increase its customer base. By acquiring the companies, IBM has strengthened its technology and has a competitive advantage in the market.

With huge resources and financial backup, IBM provides marketing analytics software across the enterprises and SMBs across the globe.

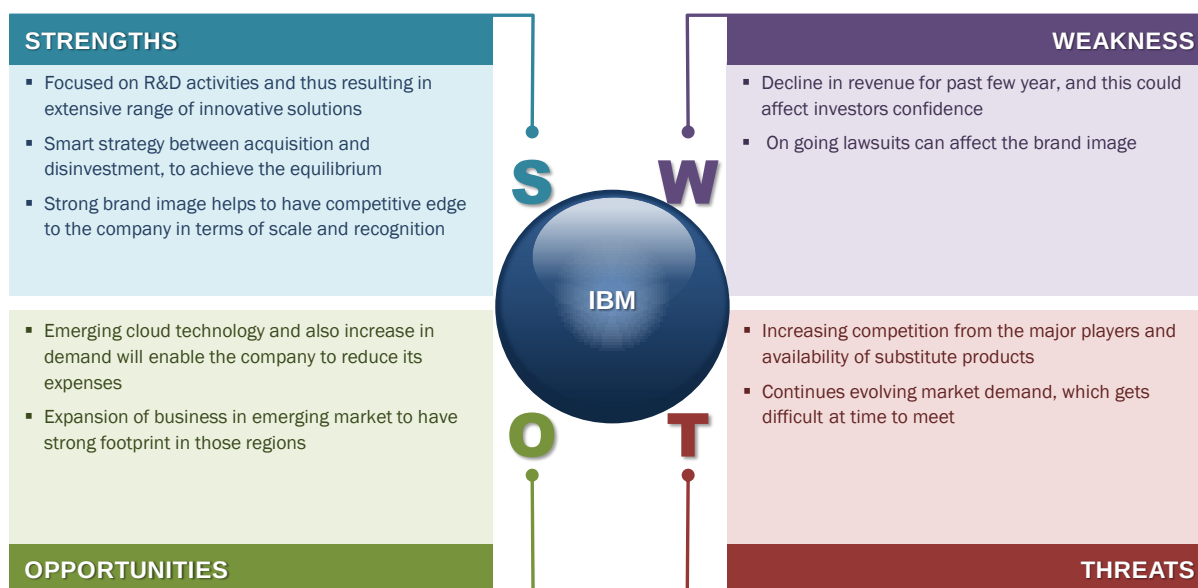

13.4.4 RECENT DEVELOPMENTS

Date	Approach	Description	Importance
October 2014	New Product Development	IBM unveiled cloud-based data service that will enhance mobile and web applications with embedded analytics.	
March 2013	Acquisition	Star Analytics was acquired by IBM and this acquisition will broaden the product portfolio of the company.

The company have acquired many companies who were leaders in analytics and strengthen its offering across the globe. The company strategically introduced the products in the market by predicting the market and its demand, and thus it has a competitive advantage over its competitors.

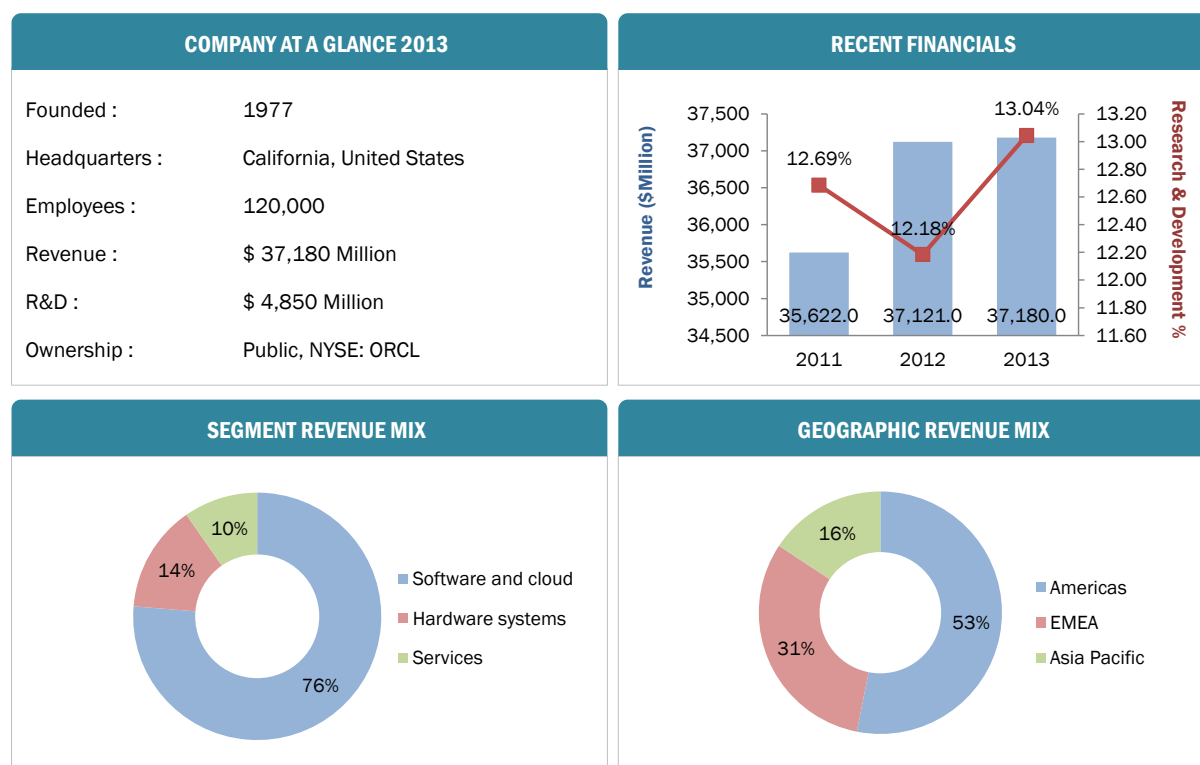

IBM drives business outcomes by applying more sophisticated analytics across more disparate data sources in more part of their organization. The company's growth strategy focuses on technological innovation, mergers and acquisition and partnership to expand its core business portfolio. The company is also focusing on enhancing and delivering its cloud based solutions. The company's unique strategy as venture capitalist investor has helped company in delivering continuous innovative software products and integrated systems. All these strategies are certainly giving the advantage to IBM over the others companies.

13.5 ORACLE

13.5.1 BUSINESS OVERVIEW

Founded in 1977 and headquartered in California, U.S., Oracle is an IT company that operates across three verticals: software, hardware systems, and services. Oracle provides solutions in cloud, enterprise, and infrastructure across business and industry verticals. The company's marketing analytics product portfolio comprises products in cloud and on-premises. Oracle is serving its customer across 140 countries around the world.

FIGURE 41 ORACLE: BUSINESS OVERVIEW

Sources: Company Website, Annual Report, and SEC Filings

13.5.2 PRODUCT PORTFOLIO

The company offers the following products:

Product	Description
PeopleSoft Marketing	PeopleSoft Marketing is a modular product from Oracle that is integrated with customer data management, segmentation, campaign management, resource management, and marketing analytics solutions.
CRM Analytics	CRM Analytics provide complete information about the sales process along with product demand, customer price sensitivity, and overall pricing effectiveness.
Siebel Enterprise Marketing	It is a closed-loop solution for the B2B and B2C solution to improve its marketing activities.
RightNow Analytics Cloud Service	This solution from Oracle gives full information about customers which helps to make decisions on time.
Oracle Marketing Cloud	The Oracle marketing cloud is the combination of cross-channel, content, and social marketing.

13.5.3 KEY STRATEGIES

Oracle is a leading provider of software and hardware products. The company is investing extensively in research and development to ensure rapid growth in its technology domain and provide its customers with the updated solutions. During 2014, the company had invested around \$5.2 billion on R&D in order to broaden its product and services portfolio and shift its focus on innovative product development as per industry requirements. The company wants to expand its foothold in emerging markets by acquiring market players in these regions.

Oracle is mainly focused in keeping the foundation of its three business units— software and cloud, hardware, and services— strong and updated and tap all the markets by expanding its business. In 2014, Oracle launched Oracle Eloqua, a marketing cloud solution for the wealth management and life science organizations. It is focused on adopting inorganic growth strategy. Thus, the company aims to expand its customer base and increase the market reach in terms of product offering and geography. It is increasing its revenue from indirect sales channel. In line with this, it has also expanded its Oracle partner network. The company also plans to change its pricing model for software products as well as subscription charges in order to compete successfully against open source software distribution companies.

13.5.4 RECENT DEVELOPMENTS

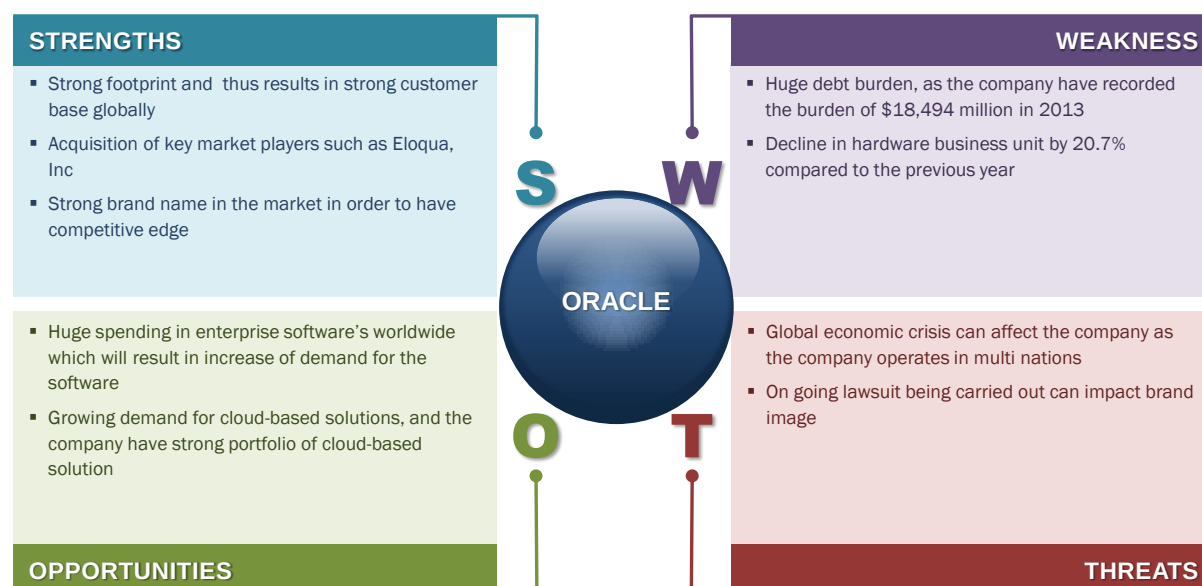

Date	Approach	Description	Importance
October 2014	New Product Development	Oracle introduced Oracle Data-as-a-Service (DaaS), which is expected to help marketing people with third party marketing data in order to get information about cross channel advertising and content.	
September 2014	New Product Development	Oracle released updated version of Oracle Sales cloud which includes solutions like mobile application, reporting capabilities, and industry-specific solution.	
September 2014	New Product Development	Oracle integrated Oracle Data Management Platform solution with Oracle Cross-Channel Marketing and released the solution to help marketers deliver customer-centric campaigns.	
December 2012	Acquisition	Oracle acquired Eloqua, Inc for approximately \$871 million. With this acquisition, Oracle will enhance its marketing analytics offerings.	

February 2014	New Product Development	Oracle introduced Oracle Eloqua, a flexible and scalable solution for wealth management.

13.5.5 SWOT ANALYSIS

FIGURE 42 ORACLE: SWOT ANALYSIS

Sources: Company Website, Annual Reports, and SEC Filings

13.5.6 MNM VIEW

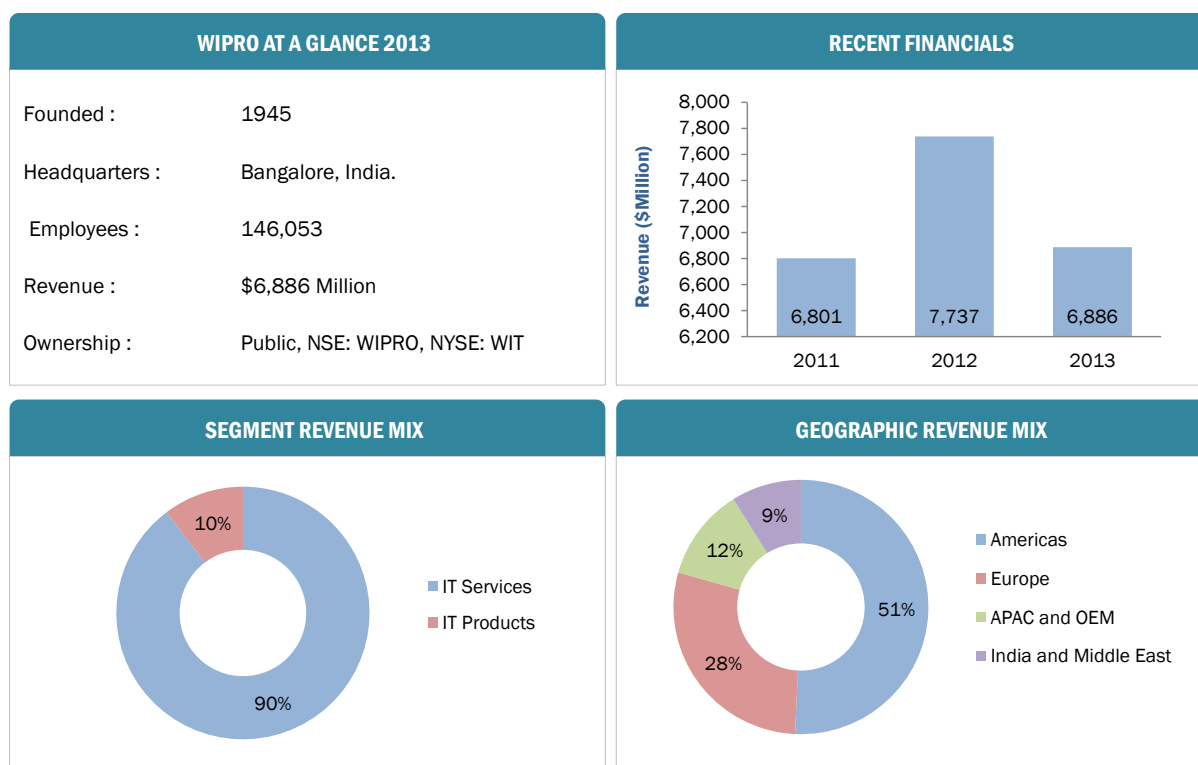

The strategic intent of Oracle is to leverage its existing brand image and increase its product and service offerings in the current global market. Oracle is continuously upgrading and restructuring its product portfolio to remain competitive in the market and has constant customer engagement. Thus, the company has launched many new products to tap the marketing analytics software market. The majority of the company's investment is in research and development and solutions that involve long return on investment cycle. Oracle aims to expand its customer base through geographical expansion and acquisition. The company needs to market out its products more aggressively for better customer response along with greater sales volume.

13.6 WIPRO LIMITED
