

HEALTHCARE DATA STORAGE MARKET

GLOBAL FORECAST TO 2024

BY DELIVERY (REMOTE, HYBRID, ON-PREMISE), ARCHITECTURE (FILE, BLOCK, OBJECT), TYPE (TAPE, FLASH, SOLID), SYSTEMS (DIRECT, NETWORK),
END USER (PHARMA, BIOTECH, CRO, HOSPITAL, CLINIC, RESEARCH CENTER)

MarketsandMarkets™ is the world's largest revenue impact company, serving over 7500 customers. 80% of top 2000 companies globally rely on us for identifying new high growth and niche revenue opportunities.

In the face of constant technology innovation and market disruption, we help organizations plan and operationalize their future revenue mix decisions by identifying over 30,000 high growth opportunities ranging from \$1B to \$500B across 90+ industry trends and markets. Organizations choose MarketsandMarkets™ to stay ahead of the curve and accelerate their revenue decisions and implementations by 6 – 12 months, giving them a unique, first-mover advantage.

Our revenue impact methodology provides quantified and actionable insights on converged, granular and connected market eco-systems that result from disruptive technologies and high-growth markets. We provide an extended lens on not only what will impact our client's revenue but also what will impact their clients' revenues, continually uncovering latent opportunities.

We work across all major B2B industries with C-level executives in functions such as Strategy, Marketing, Sales, R&D, Product, and M&A. MarketsandMarkets™ brings exclusive high-growth markets intelligence generated by over 850 SMEs and analysts along with its proprietary Revenue Impact platform (Knowledge Store).

1 EXECUTIVE SUMMARY

The healthcare data storage market is projected to reach USD XX million by 2024 from USD XX million in 2019, at a CAGR of XX% during the forecast period. Growth in this market is mainly driven by the increasing volume of digital data in healthcare organizations, faster and easier deployment of cloud storage solutions, and increasing adoption of hybrid data storage solutions.

In this report, the healthcare data storage market has been segmented on the basis of type, deployment, storage system, architecture, end user, and region.

FIGURE 1 HEALTHCARE DATA STORAGE MARKET, BY DEPLOYMENT, 2019 VS. 2024 (USD MILLION)

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

Based on deployment, the healthcare data storage market is segmented into on-premise, remote, and hybrid solutions. The on-premise segment accounted for the largest market share of XX% of the market in 2018. On-premise solutions are the most-widely adopted storage solutions in the healthcare data storage market. This deployment model has the ability to make use of multi-vendor architecture and minimize risks associated with data breach and external attacks. Also, users own on-premise storage and have control over their deployment, backup, and data recovery systems. These advantages are driving the growth of the on-premise solutions market.

FIGURE 2 HEALTHCARE DATA STORAGE MARKET, BY ARCHITECTURE, 2019 VS. 2014 (USD MILLION)

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

On the basis of architecture, the market is segmented into file, object, and block storage. The file storage segment accounted for the largest market share of XX% of the market in 2018. File storage offers easy syncing, sharing, and distribution of data, which has driven the demand for this architecture type. The object storage segment is expected to witness high growth in this market, mainly due to its capability to handle large volumes of unstructured data, as opposed to file storage which can only handle structured data.

FIGURE 3 HEALTHCARE DATA STORAGE MARKET, BY TYPE, 2019 VS. 2014 (USD MILLION)

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

Based on type, the market is segmented into magnetic storage and flash & solid-state storage. The flash & solid-state storage segment accounted for the largest share of XX% of the healthcare data storage market in 2018 and is also expected to grow at the highest CAGR of XX% during the forecast period. The rapidly growing volume of data being generated from various imaging procedures has increased the demand for storage in data centers. Magnetic disks (hard drives) and flash & solid-state drives are used to store such large volumes of data. Over the years, the capacities of flash & solid-state drives have surpassed that of magnetic disks. Moreover, the price of flash and solid-state drives has also declined to a great extent, which has resulted in their increased adoption by end users.

FIGURE 4 HEALTHCARE DATA STORAGE MARKET, BY STORAGE SYSTEM, 2019 VS. 2024 (USD MILLION)

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

Based on storage system, the healthcare data storage market is segmented into direct-attached storage (DAS), network-attached storage (NAS), and storage area network (SAN). The SAN segment accounted for the largest share of XX% of the healthcare data storage market in 2018. SAN storage facilitates the pooling of storage among data centers. This allows for the centralization of storage management, which redistributes storage resources to other servers.

FIGURE 5 HEALTHCARE DATA STORAGE MARKET, BY END USER, 2019 VS. 2024 (USD MILLION)

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

Based on end user, the healthcare data storage market is segmented into pharmaceutical & biotechnology companies, CROs, and CMOs; research centers, academic & government institutes, and clinical research labs; hospitals, clinics, and ASCs; diagnostic & clinical laboratories; and other end users. The pharmaceutical & biotechnology companies, CROs, and CMOs segment accounted for the largest share of XX% of the healthcare data storage market in 2018. This can be attributed to the fact that extensive research on drug discovery is done in pharmaceutical & biotechnology companies, which generate a massive amount of data.

FIGURE 6 GEOGRAPHICAL SNAPSHOT: HEALTHCARE DATA STORAGE MARKET

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

Based on region, the healthcare data storage market is segmented into North America, Europe, Asia, and the Rest of the World (RoW). In 2018, North America dominated the market, followed by Europe. The market in RoW is projected to grow at the highest CAGR of XX% during the forecast period. The increasing volume of unstructured healthcare data across and rapid technological advancements have led to an increased demand for secure, reliable, and cost-efficient storage infrastructure in North America.

The healthcare data storage market is consolidated, with a small number of players competing for market shares. Dell (US), IBM Corporation (US), NetApp (US), Hewlett Packard Enterprise Development LP (US), Pure Storage, Inc. (US), Hitachi, Ltd. (Japan), Toshiba Corporation (Japan), Western Digital Corporation (US), Scality (US), Huawei Technologies Co., Ltd. (China), Fujitsu (Japan), Samsung (South Korea), Drobo (US), Tintri (US), and Cloudian (US) are the prominent players operating in this market.

The majority of companies are focusing on adopting organic as well as inorganic growth strategies such as product launches/upgrades, expansions, acquisitions, partnerships, agreements, and collaborations to increase their product offerings, cater to the unmet needs of customers, increase their profitability, and expand their presence in the global market.

2 MARKET OVERVIEW

2.1 INTRODUCTION

The healthcare data storage market is projected to grow at a high CAGR of XX% during the forecast period from 2019 to 2024. Growth in this market can largely be attributed to factors such as the increasing volume of digital data in healthcare organizations, faster and easier deployment of cloud storage solutions, and increasing adoption of hybrid data storage solutions.

2.2 MARKET DYNAMICS

FIGURE 7 HEALTHCARE DATA STORAGE MARKET: DRIVERS, RESTRAINTS, OPPORTUNITIES, AND CHALLENGES

 DRIVERS	▪ Massive growth in digital data volume in healthcare organizations ▪ Faster and easier deployment of cloud storage solutions ▪ Increasing adoption of hybrid data storage solutions
 OPPORTUNITIES	▪ Increasing need of data analytics ▪ Emergence of social media and its impact on healthcare delivery
 CHALLENGES	▪ Rising security concerns related to cloud-based image processing and analytics ▪ Lack of structured data

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

3 HEALTHCARE DATA STORAGE MARKET, BY DEPLOYMENT

3.1 INTRODUCTION

On the basis of deployment, the healthcare data storage market is segmented into on-premise, remote, and hybrid solutions. The difference between these three types of deployments is their storage location. In 2018, the on-premise deployment segment accounted for the largest market share of XX%.

TABLE 1 HEALTHCARE DATA STORAGE MARKET, BY DEPLOYMENT, 2017–2024 (USD MILLION)

Deployment	2017	2018	2019	2024	CAGR (2019–2024)
On-premise	XX	XX	XX	XX	XX%
Hybrid	XX	XX	XX	XX	XX%
Remote	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

In 2018, the on-premise deployment segment accounted for the largest share of the healthcare data storage market. The on-premise segment is the most preferred option for deployment as it offers the advantage of data security, as compared to remote and hybrid deployments.

3.2 ON-PREMISE

3.2.1 ON-PREMISE DEPLOYMENT MINIMIZES RISKS ASSOCIATED WITH DATA BREACH AND EXTERNAL ATTACKS

On-premise solutions are deployed at a place from where users access data. These are located within the walls of the data center. The data center includes servers, operating systems, and other required hardware. The user is responsible for the safety of the tangible system, as the devices are mobile in nature.

On-premise solutions are the most-widely adopted storage solutions in the healthcare data storage market. This deployment model has the ability to make use of multi-vendor architecture and minimize risks associated with data breach and external attacks. Also, users own on-premise storage and have control over their deployment, backup, and data recovery systems. These advantages are driving the growth of the on-premise solutions market.

However, on-premise storage solutions, servers, and applications are stored onsite, and the responsibility of the server management remains with the user where the systems are housed and includes maintenance of the required infrastructure, such as cooling equipment, power delivery tools, and system upgrades. Also, these servers, when deployed onsite, consume a significant amount of electricity. Although the new-generation devices are designed to be energy-efficient, they still consume a large amount of electricity. Cooling the device also adds up to the cost of operation. This can result in a high operating cost for large healthcare organizations, leading to a decrease in the net profit. These factors are expected to hamper the growth of the on-premise segment.

4 HEALTHCARE DATA STORAGE MARKET, BY ARCHITECTURE

4.1 INTRODUCTION

Based on architecture, the healthcare data storage market is segmented into file, object, and block storage.

TABLE 2 HEALTHCARE DATA STORAGE MARKET, BY ARCHITECTURE, 2017–2024 (USD MILLION)

Architecture	2017	2018	2019	2024	CAGR (2019–2024)
File Storage	XX	XX	XX	XX	XX%
Block Storage	XX	XX	XX	XX	XX%
Object Storage	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

In 2018, the file storage segment accounted for the largest share of XX% of the healthcare data storage market. This segment is projected to reach USD XX million by 2024 from USD XX million in 2019, at a CAGR of XX% during the forecast period. File storage offers easy syncing, sharing, and distribution of data, which has driven the demand for this architecture type. The object storage segment is expected to witness high growth in this market, mainly due to its capability to handle large volumes of unstructured data, as opposed to file storage which can only handle structured data.

4.2 FILE STORAGE

4.2.1 FILE LEVEL STORAGE IS USUALLY USED IN NAS DEVICES AS IT OFFER COMPARATIVELY MORE STORAGE SPACE

In file storage, also called file-level or file-based storage, data is stored as a single piece of information inside a folder. File-based architecture stores information in a hierarchical structure. This storage shows uniformity while storing data as well as retrieving it. File storage manages the layout, the structure of the file, and directories on physical storage. It is used to establish a client/server relationship over NAS. File-level storage offers simplicity when there is a common platform to place raw files. File-level storage is usually used in NAS devices, which offer comparatively more storage space.

TABLE 3 FILE STORAGE MARKET, BY REGION, 2017–2024 (USD MILLION)

Region	2017	2018	2019	2024	CAGR (2019–2024)
North America	XX	XX	XX	XX	XX%
Europe	XX	XX	XX	XX	XX%
Asia	XX	XX	XX	XX	XX%
RoW	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

5 HEALTHCARE DATA STORAGE MARKET, BY TYPE

5.1 INTRODUCTION

On the basis of type, the healthcare data storage market is segmented into magnetic storage and flash & solid-state storage. Among these, the flash & solid-state storage segment accounted for the largest share of XX% of the healthcare data storage market in 2018.

TABLE 4 HEALTHCARE DATA STORAGE MARKET, BY TYPE, 2017–2024 (USD MILLION)

Type	2017	2018	2019	2024	CAGR (2019–2024)
Flash & Solid-state Storage	XX	XX	XX	XX	XX%
Magnetic Storage	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

The flash & solid-state storage segment accounted for the largest share of the healthcare data storage market in 2018. The rapidly growing volume of data being generated from various imaging procedures has increased the demand for storage in data centers. Magnetic disks (hard drives) and flash & solid-state drives are used to store such large volumes of data. Over the years, the capacities of flash & solid-state drives have surpassed that of magnetic disks. Moreover, the price of flash and solid-state drives has also declined to a great extent, which has resulted in their increased adoption by end users.

5.2 FLASH & SOLID-STATE STORAGE

5.2.1 FLASH & SOLID-STATE STORAGE SEGMENT TO REGISTER THE HIGHEST CAGR DURING THE FORECAST PERIOD

Flash storage is a data storage technology based on high speed and electrically programmable memory. Flash storage uses a type of nonvolatile memory called flash memory. Nonvolatile memory does not require power to maintain the integrity of the stored data, so even if the power goes out, you do not lose your data.

Solid-state storage (SSS) is a type of flash memory storage device, architected to house data without reading or writing on rotating disks such as hard disk drives (HDD). SSS is non-volatile and accesses data faster than traditional rotating platter storage. SSS offers better data integrity, consumes far less energy, and is more resilient than HDD. SSD consumption is driven by all-flash arrays and hybrid-flash arrays. The use of flash is becoming increasingly integral for both data center operators and storage vendors, as it enables high performance. Some of the solid-state storage devices include USB pen drives, SD cards, and micro SD cards.

TABLE 5 FLASH & SOLID-STATE STORAGE MARKET, BY REGION, 2017–2024 (USD MILLION)

Region	2017	2018	2019	2024	CAGR (2019–2024)
North America	XX	XX	XX	XX	XX%
Europe	XX	XX	XX	XX	XX%
Asia	XX	XX	XX	XX	XX%
RoW	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

TABLE 6 NORTH AMERICA: FLASH & SOLID-STATE STORAGE MARKET, BY COUNTRY, 2017–2024 (USD MILLION)

Country	2017	2018	2019	2024	CAGR (2019–2024)
US	XX	XX	XX	XX	XX%
Canada	XX	XX	XX	XX	XX%
Mexico	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

6 HEALTHCARE DATA STORAGE MARKET, BY STORAGE SYSTEM

6.1 INTRODUCTION

On the basis of the storage system, the healthcare data storage market is segmented into direct-attached storage (DAS), network-attached storage (NAS) and storage area network (SAN).

TABLE 7 HEALTHCARE DATA STORAGE MARKET, BY STORAGE SYSTEM, 2017–2024 (USD MILLION)

Storage System	2017	2018	2019	2024	CAGR (2019–2024)
SAN	XX	XX	XX	XX	XX%
DAS	XX	XX	XX	XX	XX%
NAS	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

In 2018, the SAN segment accounted for the largest share of XX% of the healthcare data storage market. This segment is projected to reach USD XX million by 2024 from USD XX million in 2019, at a CAGR of XX% during the forecast period. SAN storage facilitates the pooling of storage among datacenters. This allows for the centralization of storage management, which redistributes storage resources to other servers.

Currently, large healthcare organizations are the dominant adopters of SAN storage; however, the demand for SAN storage is expected to grow among small and mid-size companies owing to its decreasing implementation costs.

6.2 STORAGE AREA NETWORK

6.2.1 SAN HELD THE LARGEST SHARE OF THE HEALTHCARE DATA STORAGE MARKET IN 2018

A SAN is a storage system connected to a switch through a fiber channel, which allows it to be easily accessed from different servers. SAN-based storage-as-a-service (StaaS) provides a secure multitenant environment through storage virtualization. It allows an organization to host all its business units through the same shared storage. SAN supports block-based data storage, and the file systems are maintained by the clients.

SAN allows each server to access shared storage directly. It is typically arranged using three principal components—cabling, host bus adapters, and switches. These are physically interconnected and support bandwidth levels required to control the data access. SAN can be developed on virtual networks, unified storage, and converged infrastructure. In SAN storage, the raw data is centrally managed and allocated as per the individual need. This system allows for multiple data paths and, at the same time, improves storage utilization and effectiveness.

TABLE 8 STORAGE AREA NETWORK MARKET, BY REGION, 2017–2024 (USD MILLION)

Region	2017	2018	2019	2024	CAGR (2019–2024)
North America	XX	XX	XX	XX	XX%
Europe	XX	XX	XX	XX	XX%
Asia	XX	XX	XX	XX	XX%
RoW	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

7 HEALTHCARE DATA STORAGE MARKET, BY END USER

7.1 INTRODUCTION

On the basis of end user, the healthcare data storage market is segmented into pharmaceutical & biotechnology companies, CROs, and CMOs; research centers, academic & government institutes, and clinical research labs; hospitals, clinics, and ASCs; diagnostic & clinical laboratories; and other end users. The pharmaceutical & biotechnology companies, CROs, and CMOs segment accounted for the largest market share of XX% in 2018, while the research centers, academic & government institutes, and clinical research labs segment is projected to register the highest CAGR during the forecast period.

TABLE 10 HEALTHCARE DATA STORAGE MARKET, BY END USER, 2017–2024 (USD MILLION)

End User	2017	2018	2019	2024	CAGR (2019–2024)
Pharmaceutical & Biotechnology Companies, CROs, and CMOs	XX	XX	XX	XX	XX%
Hospitals, Clinics, and ASCs	XX	XX	XX	XX	XX%
Research Centers, Academic & Government Institutes, and Clinical Research Labs	XX	XX	XX	XX	XX%
Diagnostic & Clinical Laboratories	XX	XX	XX	XX	XX%
Other End Users	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

In 2018, the pharmaceutical & biotechnology companies, CROs, and CMOs segment accounted for the largest share of the healthcare data storage market. This can be attributed to the fact that extensive research on drug discovery is done in pharmaceutical & biotechnology companies, which generate a massive amount of data.

8 HEALTHCARE DATA STORAGE MARKET, BY REGION

8.1 INTRODUCTION

The healthcare data storage market is segmented into four major regions—North America, Europe, Asia, and the Rest of the World (RoW).

TABLE 11 HEALTHCARE DATA STORAGE MARKET, BY REGION, 2017–2024 (USD MILLION)

Region	2017	2018	2019	2024	CAGR (2019–2024)
North America	XX	XX	XX	XX	XX%
Europe	XX	XX	XX	XX	XX%
Asia	XX	XX	XX	XX	XX%
RoW	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

In 2018, North America accounted for the largest share of XX% of the healthcare data storage market. This regional segment is projected to reach USD XX million by 2024 from USD XX million in 2019, at a CAGR of XX% during the forecast period. The increasing volume of unstructured healthcare data across and rapid technological advancements have led to an increased demand for secure, reliable, and cost-efficient storage infrastructure in North America. North America, being the early adopter of advanced data storage technologies, captures the largest share of the healthcare data storage market followed by Europe and Asia.

8.2 NORTH AMERICA

North America, which comprises the US, Canada, and Mexico, is the largest market for healthcare data storage. The region is home to a large number of prominent players, including Dell, HPE, and Hitachi, which has ensured the introduction and easy availability of advanced solutions for end users. Healthcare organizations in North America also have well-developed infrastructure and sufficient budgets to develop their IT capabilities further, as compared to other geographies.

Additionally, the market for datacenters has been evolving through administration and federal mandates for data center optimization. The increasing adoption of the cloud has also contributed to the demand for data centers. This trend of having well-optimized datacenters boosts the demand for healthcare data storage solutions in this region.

FIGURE 8 NORTH AMERICA: HEALTHCARE DATA STORAGE MARKET SNAPSHOT

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

TABLE 12 NORTH AMERICA: HEALTHCARE DATA STORAGE MARKET, BY COUNTRY, 2017–2024 (USD MILLION)

Country	2017	2018	2019	2024	CAGR (2019–2024)
US	XX	XX	XX	XX	XX%
Canada	XX	XX	XX	XX	XX%
Mexico	XX	XX	XX	XX	XX%
Total	XX	XX	XX	XX	XX%

Source: Organisation for Economic Co-operation and Development (OECD), Healthcare Information and Management Systems Society (HIMSS), Health Insurance Portability and Accountability Act (HIPAA), American Health Information Management Association (AHIMA), American Medical Informatics Association (AMIA), Office of the National Coordinator for Health Information Technology, Cloud Computing Association (CCA), Asia Cloud Computing Association (ACCA), Press Releases, Company Websites, Annual Reports, SEC Filings, Expert Interviews, and MarketsandMarkets Analysis

In 2018, the US accounted for the largest share of XX% of the healthcare data storage market in North America. This market is projected to reach USD XX million by 2024. The adoption of smart technologies, Big Data, IoT, and virtualization has dramatically increased healthcare data generation in the US, which has driven the demand for technologically advanced IT infrastructure and data storage solutions. The country is also home to leading healthcare data storage manufacturers.
