1 INTRODUCTION

1.1 OBJECTIVES OF THE STUDY

- To define, describe, and forecast the global Financial Services Application (FSA) market on the basis of software, services, deployment type, user type, and region
- To provide a detailed information regarding the major factors influencing the growth of the market (drivers, restraints, opportunities, industry-specific challenges, and burning issues)
- To strategically analyze each submarket with respect to individual growth trends and contribution toward the overall market
- To analyze the opportunities in the market for stakeholders and details of a competitive landscape for market leaders
- To forecast the market size of segments with respect to five main regions, namely, North America (NA), Europe, Asia-Pacific (APAC), Middle East and Africa (MEA), and Latin America (LA)
- To strategically profile key players and comprehensively analyze their market shares and core competencies¹
- To track and analyze competitive developments, such as mergers and acquisitions and new product developments in the FSA market

1.2 MARKET DEFINITION

The definition of the FSA is as follows “Financial services application solutions are a complex set of tools that help in streamlining various functions of the financial institutions and banks in order to decrease time-to-market implementation, optimize cost, and increase automation technology systems.”

FSA can be understood as a set of software that is used by financial institutions to provide financial services to their customers. These solutions are focused on the financial institution's need to provide specific competencies that include audit, risk, and compliance management, business intelligence (BI) and analytics, business transaction processing, customer experience, and enterprise IT that allow financial institutions and banks to provide services in the regulated environment with improved efficiency.

1.3 MARKET SCOPE

The market study covers the FSA software and services offered by vendors and the derivation of the FSA market size during the forecast period from 2014 to 2019. In this market study, 2013 is considered as the base year.

- The overall FSA market in this report has been defined as the spending by SMBs and enterprises on such software solutions and services across the BFSI industry vertical.
- The market size includes the service revenue generated by the vendors. The software revenue does not include the service revenue that is separate from the right-to-use license and the inherent value of software.

¹(Core competencies of the companies are captured in terms of their key developments, SWOT analysis, and key strategies adopted by them to sustain their position in the market.)

1.3.1 MARKETS COVERED

This research report categorizes the FSA market into the following segments:

Global FSA Market, By Software

- Audit, Risk, and Compliance Management
- BI and Analytics Applications
- Business Transaction Processing
- Customer Experience
- Enterprise IT

Global FSA Market, By Services

- Consulting Services
- Integration Services
- Training and Support Services
- Operations and Maintenance Services

Global FSA Market, By Deployment Type

- On-Premises
- Hosted

Global FSA Market, By User Type

- SMBs
- Enterprises

Global HCM Market, By Region

- NA
- Europe
- APAC
- MEA
- LA

1.3.2 YEARS CONSIDERED FOR THE STUDY

Historical Year	2012
Base Year	2013
Estimated Year	2014
Projected Year	2019
Forecast Period	2014-2019

1.3.3 LIMITATIONS

The study is limited to five types of software such as Audit, Risk and Compliance Management, BI and Analytics Applications, Business Transaction Processing, Customer Experience, and Enterprise IT

- The deployment type considered for this report is hosted and on-premise type.

1.4 CURRENCY

The base currency used in the report is in U.S. dollars, with market size indicated only in \$million

- Revenues for the companies were picked from their annual report
- For companies that reported their revenues in other currencies, average annual currency conversion rate was used for the particular year to convert the value in U.S. dollars

1.5 STAKEHOLDERS

- FSA Vendors
- System Integrators
- IT Developers
- Third-Party Vendors
- Cloud Providers
- Network Operators
- Banks and Financial Institutions
- Government

2 RESEARCH METHODOLOGY

This research study involves the usage of extensive secondary sources, directories, and databases, such as Factiva, Bloomberg, and BusinessWeek to identify and collect information useful for this comprehensive market research study on the FSA market. The primary sources are mainly various industry experts from core and related industries, preferred software vendors, IT administrators, and consumers to name a few from companies and organizations related to all segments of the FSA value chain. In-depth interviews were conducted from various primary respondents that include key industry participants and subject-matter experts to obtain and verify critical qualitative and quantitative information as well as to assess future prospects.

FIGURE 1 RESEARCH DESIGN

The illustrative figure given above shows the market research methodology applied in making this report on the global FSA market

In the secondary research process, various secondary sources were referred to for identifying and collecting information for this study. The secondary sources include annual reports and press releases; investor presentations of companies, white papers, technology journals, and certified publications; and articles from the recognized authors, directories, and databases.

Secondary research was mainly used to obtain the key information about the industry's supply chain, the total pool of key players, market classification, and segmentations according to industry trends to the

bottom-most level, geographic markets, and the key developments, from both market and technology-oriented perspectives.

In the primary research process, the various primary sources from both demand and supply sides were interviewed to obtain qualitative and quantitative information for this report. The primary sources from supply side include industry experts, such as CEOs, VPs, marketing directors, technology and innovation directors, and related key executives from the various key companies and organizations operating in the FSA market.

After the complete market engineering (which includes calculations for market statistics, market breakdown, market size estimation, market forecasting, and data triangulation), extensive primary research was conducted to gather information and to verify and validate the critical numbers arrived at. Primary research was also conducted to identify the segmentation types, industry trends, key players, competitive landscape of FSA, and key market dynamics, such as drivers, restraints, opportunities, industry trends, and key player strategies.

In the complete market engineering process, both top-down and bottom-up approaches were extensively used along with the several data triangulation methods to perform market estimation and market forecasting for the overall market segments listed in the report. Extensive qualitative and quantitative analysis was performed on the complete market engineering process to list key information/insights throughout the report.

2.1 MARKET SIZE ESTIMATION

Both, top-down and bottom-up approaches were used to estimate and validate the size of the global market and to estimate the size of various other dependent submarkets in the overall FSA market. The research methodology used to estimate the market size includes the following details: the market size for the global FSA market has been derived with the calculations based on the revenues of major regions including NA, Europe, APAC, MEA, and LA. This entire procedure includes the study of the annual and financial reports of top market players and extensive interview for key insights from industry leaders, such as CEOs, VPs, directories, and marketing executives. All percentage shares, splits, and breakdowns were determined by using secondary sources and verified through primary sources. All possible parameters that affect the markets covered in this research study have been accounted for, viewed in extensive detail, verified through primary research, and analyzed to get the final quantitative and qualitative data. This data is consolidated and added with detailed inputs and analysis from MarketsandMarkets and presented in this report.

FIGURE 2 MARKET SIZE ESTIMATION METHODOLOGY: BOTTOM-UP APPROACH

Source: MarketsandMarkets Analysis

FIGURE 3 MARKET SIZE ESTIMATION METHODOLOGY: TOP-DOWN APPROACH

Source: MarketsandMarkets Analysis

The figures given above show an illustrative representation of the overall market size estimation process employed for the purpose of this study.

The bottom-up procedure was employed to arrive at the overall market size of the global FSA market from the revenue of key players (companies) and their shares in this market.

FSA spending across all regions along with their geographical split of the number of SMBs and enterprises with FSA subscribed were used to arrive at the overall market size. The overall market size was used in the top-down procedure to estimate the sizes of other individual markets (mentioned in the market segmentation of user type and region) via percentage splits from the secondary and primary research. For the calculation of each type of specific market segment, the most appropriate immediate parent market size was used for implementing the top-down procedure. The bottom-up procedure was also implemented for data extracted from the secondary research to validate the market segment revenues obtained. With the data triangulation procedure and validation of data through primaries, the exact values of the overall parent market size and each individual market size were determined and confirmed in this study.

FIGURE 4 BREAKDOWN OF PRIMARY INTERVIEW: BY COMPANY TYPE, DESIGNATION, AND REGION

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

Note: Others include Marketing Manager, Sales Manager, or Product Manager

Note: Tier 1 companies have revenues more than 10 billion USD, Tier 2 companies range in between 1-10 billion USD of overall revenues, and Tier 3 companies range between 500 million USD to 1 billion USD of overall revenues.

2.2 MARKET BREAKDOWN AND DATA TRIANGULATION

After arriving at the overall market size from the market size estimation process explained above, the total market was split into several segments. In order to complete the overall market engineering process and arrive at the exact statistics for all segments and subsegments, the data triangulation and market breakdown procedure was employed, wherever applicable. The data was triangulated by studying various factors and trends from both the demand and supply sides. Along with this, the market was validated using both top-down and bottom-up approaches.

FIGURE 5 DATA TRIANGULATION

MnM KNOW* stands for MarketsandMarkets' 'Knowledge Asset Management' framework. In this context, it stands for existing market research knowledge repository of over 5000 granular markets, our flagship competitive intelligence and market research platform "RT", subject matter experts, and independent consultants. MnM KNOW acts as an independent source that helps us validate information gathered from primary and secondary sources.

2.3 MARKET SHARE ESTIMATION

The market share for the companies offering FSA is arrived on the basis of secondary data available through paid and unpaid sources and by analyzing the product portfolios of major companies in the ecosystem, and rating the companies on the basis of performance and quality. These data points were further validated by the primary sources.

2.3.1 KEY DATA FROM SECONDARY SOURCES

PARAMETERS		SOURCES
1	Market Size	- Company Financials - Magazines - Journals - Press Releases - Paid Databases - The MarketsandMarkets Data Repository
2	Revenue of Companies	- Annual Reports - Company Websites - Public Databases - The MarketsandMarkets Data Repository
3	Qualitative Information (Market Dynamics, Market Trends)	- Company Websites - Annual Reports - Press Releases - The MarketsandMarkets Data Repository

2.3.2 KEY DATA FROM PRIMARY SOURCES

PARAMETERS		KEY DATA
1	Geographic Split - Overall market and its segments in 2014 - CAGR of each region in the forecast period (2014–2019)	The global FSA market, by region—North America, Europe, Asia-Pacific, Middle East and Africa, and Latin America
2	Global Market Size - The global market size for the year 2014 - CAGR for the forecast period (2014–2019)	- The global FSA market - The global FSA market by sub-segments - The FSA software market splits into cloud and on-premise
3	Market Split - By software - By services - By deployment type - By user type - By region	- The global FSA market size split into user type (SMBs and enterprises) - The global FSA market size split into various regions.

2.3.3 ASSUMPTIONS

Factor	Assumption	Impact	Certainty of the Assumption
Economy	The global economic climate will be favorable till the end of 2019	Increased spending on FSA by SMBs and enterprises	
Exchange Rates	The dollar fluctuations will not be as major as to affect the market forecast to a significant extent	The fall in the price of dollar will enhance the revenue growth opportunities for the U.S. multinationals while stability in the same will stabilize the overseas transaction price	
Political Stability	Most of the regions covered are politically stable. The political tensions prevailing in some regions however will not hamper the economic growth significantly	Despite a few minor political issues, the outlook will be progressively positive	
Financial Statistics	The revenue and financial information mentioned on the company's website or its annual report is true to the best of MarketsandMarkets' knowledge	Confirmation of authenticity of the company financials mentioned in the report	
Saturation	New markets will be found in emerging economies such as India and China	These markets will create new growth opportunities for the vendors	

2.3.4 KEY INDUSTRY INSIGHTS

Source: Expert Interviews

3 EXECUTIVE SUMMARY

Financial services are the indicators of the socio-economic health of a country. With the growing impact of globalization, FSA providers face an uphill task to provide the end users with applications that are compliant, risk free, and data driven. Organizations need to transform themselves from traditional product-based firms to “Customer In” firms. Global FSA simply means enabling the organizations to use the financial data with the help of software to plan and optimize operations, and discover new opportunities. The driving forces in the evolution of global FSA are globalization, global market liberalization, technical upgradation, and market innovation. Development and deployment of financial services market simplifies the operating procedure for diverse portfolio and aims at establishing a uniform infrastructure for the analysis of voluminous quantified data. The extensive analysis of financial data coupled with data warehousing can help financial institution in framing their strategic policies for sustaining long-term growth. The analysis of voluminous financial data can yield respectable results such as it can point opportunities, emphasizing key trends and identifying new avenues of investment. Similarly, by keeping a close eye on historical data, legacy organizational hurdles can be identified and rectified easily and swiftly.

This study is done to understand the structure of the global FSA market and is intended to help the FSA providers, banks, and financial institutions to better serve its clients, government, and enterprises. The overall global FSA market size in this study has been defined by considering the revenues generated by the vendors which offer global FSA software and services. Various software applications which have been considered while deriving the FSA market size are audit, risk, and compliance management, BI and analytics applications, business transaction processing, customer experience, and enterprise IT. In addition, various deployment types which have been considered while deriving the FSA market size include on-premises and hosted types. Also, various services which have been considered while deriving the global FSA market size include consulting services, integration services, training and support services, and operation and maintenance services. The overall global FSA market has been further segmented into user types, which include SMBs and enterprises.

The global FSA market is segmented on the basis of five regions into NA, Europe, APAC, MEA, and LA. The global FSA market is provided for each region from 2014 to 2019. The global FSA market is expected to grow from \$66.92 billion in 2014 to \$103.66 billion by 2019, at a Compound Annual Growth Rate (CAGR) of 9.1% during the forecast period 2014–2019.

TABLE 1 GLOBAL FSA MARKET SIZE AND GROWTH RATE, 2012–2019 (\$MILLION, Y-O-Y %)

FSA Market	2012	2013	2014	2019	CAGR (2014–2019)
Market Size	57,437.1	61,958.8	66,922.5	103,661.7	9.1%
Y-O-Y		7.87%	8.01%	10.29%	

The table given above highlights the global FSA market size and Y-O-Y growth. The global FSA market is expected to grow from \$66,922.5 million in 2014 to \$103,661.7 million by 2019, at an estimated CAGR of 9.1%. The global FSA market was expected to exhibit a Y-O-Y growth rate of 8.01% during the period 2013–2014.

FIGURE 6 FSA MARKET SIZE, USER TYPE SNAPSHOT (2014–2019): SMB MARKET IS EXPECTED TO DOUBLE BY 2019

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

FIGURE 7 FSA MARKET SIZE, SERVICES SNAPSHOT (2014–2019): CONSULTING SERVICES WILL DOMINATE THE MARKET

FIGURE 8 GLOBAL FSA MARKET SIZE, BY DEPLOYMENT, 2014–2019

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

FIGURE 9 GLOBAL FSA MARKET SHARE: APAC WILL EXHIBIT THE HIGHEST MARKET SHARE IN 2014

Source: Investor Presentation, Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

APAC accounted for the largest market share, i.e., 33.41% of the global FSA market in 2014, followed by NA. APAC is witnessing a record growth due to significant number of growing economies and moreover most of the APAC governments are focusing and promoting financial inclusion of their citizens. A lot of companies, such as SAP, Oracle, TCS, Accenture, Infosys, and FIS are upgrading financial institution's legacy systems in Europe and APAC. Emerging advancements in technology and increasing demand for customer experience are the major factors driving the market in APAC.

NA is expected to grow at a moderate growth rate in the next 5 years, with a CAGR of 7.2% during the forecast period. Rising demand among SMBs to employ BI and analytics applications is driving the market in NA.

The key players in the FSA ecosystem include Accenture, FIS, Fiserv, IBM, Infosys, Misys, Oracle, SAP SE, and TCS. In this market, these software vendors cater to both enterprises and SMBs. Moreover, these organizations offer solutions and services to their end users.

4 PREMIUM INSIGHTS

4.7 LIFECYCLE ANALYSIS, BY REGION 2014

In terms of market presence, FSA has significant existence in the major markets around the world. LA and MEA are the markets where the financial inclusion is still in the introductory phase and hence investment for FSA is also less. Brazil and countries such as South Africa and United Arab Emirates (UAE) are experiencing moderate investments by banks and financial institutions. APAC, in particular, and a few countries in LA, have been identified as a potential market for FSA in future. The technology has already gained traction which is evident by the presence of growing markets in NA that are about to mature in many countries. NA and Europe are the prime markets witnessing the latest FSA deployment along with some APAC countries.

5 MARKET OVERVIEW

KEY FINDINGS

- Emergence of digital channels for banking and increasing demand for customer experience are some of the factors driving the FSA market
- Adherence to different regulatory standards and compliance are some of the factors restraining the FSA market
- Strong inclination toward the deployment of FSA solutions on cloud is a major opportunity for software providers
- New and emerging technologies such as mobile, cloud, and big data are driving the FSA market
- Low consumer and investor confidence is a challenge that most of the financial institutions face today

5.1 INTRODUCTION

The FSA market showcases a significant growth rate of 9.1% during the forecast period from 2014 to 2019, globally. The growth in this market has been mainly impelled by the emergence of digital channels for banking. The other factor driving the growth of the FSA market is the rising need to provide better customer experience and understand customer preference. Further, the market will be driven by opportunities such as changing regulatory factors and adoption of cloud, mobility, and big data technology. However, high cost of deployment for small institutions and adherence to different compliances and political factors are the key aspects that hinder the growth of the FSA market.

The global FSA market in this report has been defined as the sum of revenues generated by the financial services software vendors along with various services provided by the vendors to the BFSI vertical. The software market is classified into five segments, such as audit, risk, and compliance management; BI and analytics; business transaction processing; customer experience; and enterprise IT. The market is further segmented on the basis of services.

5.2 MARKET SEGMENTATION

The FSA market has been segmented by software (audit, risk, and compliance management, BI and analytics applications, business transaction processing, customer experience, and enterprise IT); by services (consulting services, integration services, training and support services, and operations and maintenance services); by deployment type (on-premises and hosted); and by user type (SMBs and enterprises). The overall FSA market is also segmented by region (NA, Europe, APAC, MEA, and LA).

5.2.1 FSA MARKET, BY SOFTWARE

The figure given below highlights the segmentation of the FSA market by software.

The figure given above highlights the segmentation of the FSA market by region.

5.3 EVOLUTION

In the last two decades, with the advent of IT technology globally, banks and financial institutions have started automating and streamlining their operations for boosting their operational margins. Today, with proper IT infrastructure in place, financial activities are carried out with ease. Initially, the banks adopted IT infrastructure to support their internal operations such as account management and auto generation of bank statements to reduce the laborious work. With the development of IT, organizations came up with the idea to install a full-fledged infrastructure for management accounting to improve their operational capabilities. Recently, due to the IT revolution, banks started to provide nontraditional banking activities such as pensions, insurances, mortgages, and mutual funds. Also, real-time tracking of financial data became possible due to data warehousing and management information systems.

FIGURE 22 EVOLUTION: FSA

5.4 MARKET DYNAMICS

The following section highlights the drivers, restraints, opportunities, and challenges of the FSA market.

FIGURE 23 EMERGENCE OF DIGITAL CHANNELS FOR BANKING PROVIDES AN IMPETUS FOR THE FSA MARKET

Source: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

5.4.1 DRIVERS

5.4.1.1 Emergence of digital channels for banking

The mobile, tablet, and smartphone users have been continuously surging, globally. Due to this, different regions are experiencing explosion in data requirement as the consumption rate of Internet over such devices is increasing. The trend of increased Internet usage over digital devices can be seen in Mexico, Brazil, India, China, UAE, and South Africa. These Internet users prefer online transactions via digital channels over traditional banking methods.

Banks are likely to increase their investments in technology to respond to the demands of transactions via various digital channels such as Internet, social media, smartphones, mobiles, and other digital platforms. Also, the rapid increase in mobile and e-commerce is compelling banks to deploy solutions, such as payment transaction processing and monitoring solutions to provide secure services to the customers.

5.4.1.2 Enhanced focus on customer experience

Banks are aspiring to provide personalized services and products in an increasingly competitive environment, while reducing their total cost of ownership. This has led banks to transform their core banking platform by integrating customer experience modules. This in turn helped banks improve their operational efficiency and provide better experience and personalized services to customers.

There is huge potential hidden in the usage pattern of consumers. To unfold this, banks and financial institutions need solutions that analyze the preference of consumers to increase the revenue opportunities and customer loyalty.

5.4.1.3 Surging demand for workforce optimization solutions

Changing customer preferences and the proliferation of self-service channels have resulted in a decline in the use of bank branches for routine transactions. Customer traffic in branches has fallen dramatically and many branches are now overstaffed. To streamline their business operations and to achieve cost efficiency, banks are investing in workforce optimization solutions. Optimizing the workforce can quickly improve the efficiency of the BFSI vertical without the need for large capital investments. Workforce optimization solutions also provide insights on operational metrics and help to identify processes which are inefficient.

TABLE 2 EMERGENCE OF DIGITAL CHANNELS FOR BANKING IS PROPELLING THE GROWTH OF THE FSA MARKET

S. No.	Key Drivers	Importance
1	Emergence of digital channels for banking	
2	Enhanced focus on customer experience	
3	Surging demand for workforce optimization solutions

  Very Low

**Note: The definitions for the market importance would remain the same as the key seen here for the rest of the moon charts.*

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5.4.2 RESTRAINTS

5.4.2.1 High cost of deployment

The cost of deployment of various financial service solutions in-house is quite expensive. It is not possible for small banking and financial institutions to deploy all such solutions for in-house banking. Also, the cost involved in managing, maintaining, and upgrading such systems is high, requiring skilled IT workforce. This acts as an unnecessary burden on Capital Expenditure (CAPEX) of small financial players, which affects their Return on Investment (ROI). Hence, high cost of deployment is restraining the adoption of financial software by SMBs.

5.4.2.2 Adhering to different political factors and regulatory compliances

Business transaction processing solutions employed by financial institutions to carry out their services adhere to only one country's regulatory laws and have to be customized specifically to the country in which it operates. In addition, banks are burdened with customizing and upgrading their core platforms to comply with the laws specific to different countries. Global banks face different kinds of political and regulatory issues in managing their operations in overseas units. Globally, financial inclusion is taking place with higher pace accompanied with regulations being changed and upgraded. Financial institutions thus have to upgrade their traditional solutions to comply with new regulations. This restrains the players to invest in new technologies as uncertainty remains regarding the rules and regulations.

TABLE 3 DIFFERENT POLITICAL FACTORS AND REGULATORY COMPLIANCES HINDER THE GROWTH OF THE FSA MARKET

S. No.	Key Restraints	Importance
1	Adhering to different political factors and regulatory compliances	
2	High cost of deployment	

Source: , Expert Interviews, and MarketsandMarkets Analysis

5.4.3 OPPORTUNITY

5.4.3.1 IT expenditure driven by big data, mobility, and cloud technologies

Adoption of social media, mobility, big data, and cloud are gaining traction among the financial institutions. These technologies help to streamline the business operations and improve profit margins in the highly competitive financial industry. Currently, data storage on private cloud is not possible due to regulatory issues as the risk and compliance for the BFSI vertical cannot be outsourced. Financial institutions are slowly moving upward on the growth curve and are adopting mobility and big data for payments, transactions, transfers, and other services. Banks are investing in targeted business-focused solutions such as loan management and treasury solutions. Globally, small organizations had minimal IT adoption before the 2008 crisis, but now they are increasing investments in core banking solutions and showing increased interest in emerging technologies to compete in the cut-throat competition prevailing in the BFSI industry.

TABLE 4 EXPENDITURE ON EMERGING TECHNOLOGIES IS THE KEY OPPORTUNITY IN THE FSA MARKET

S. No.	Key Opportunities	Importance
1	IT expenditure driven by big data, mobility and cloud technologies	

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

5.4.4 CHALLENGE

5.4.4.1 Low consumer and investor confidence

It has been observed that the consumer and investor confidence remains low in the BFSI industry due to significant doubts over the management of business models and reduced expectations of fast recovery after the global crisis. Economic and educational inequality coupled with low infrastructural development contributes to this problem. Moreover, the absence of stable governments and ever-changing regulations are adding on to the low consumer and investor confidence.

TABLE 5 LOW CONSUMER AND INVESTOR CONFIDENCE IS THE MAJOR CHALLENGE FOR THE FSA MARKET

S. No.	Key Challenge	Importance
1	Low consumer and investor confidence	

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

6 INDUSTRY TRENDS

6.1 INTRODUCTION

The FSA market incorporates a myriad of software and services as per the needs of the end users. The FSA market is diversified and competitive with a large number of market players like Accenture, TCS, Infosys, FIS, Fiserv including mid-tier companies and start-up firms. However, the bigger firms in the market are increasingly acquiring small players in an attempt to expand their offerings across the globe. Financial institutions are looking for FSA solutions so as to rapidly deploy these solutions for streamlining business processes.

The FSA market is consumer driven and major end users are SMBs and enterprises. Enterprises dominate the FSA market share in comparison with SMBs and will continue to do so in the years to come; but, the SMBs are growing at a much faster pace. The bargaining power of suppliers is medium, whereas that of the buyers is medium to high. Currently, the FSA market is led by APAC ahead of NA, followed by Europe with MEA and LA still in introductory phase, but steadily growing.

6.2 VALUE CHAIN ANALYSIS

FIGURE 24 VALUE CHAIN ANALYSIS

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The value chain for FSA market comprises FSA vendors, cloud services providers, and telecom network operators that collectively provide a comprehensive platform for the provision of financial services solutions. These FSA offerings are further deployed by the end users that comprise SMBs and enterprises, which in turn provide revenue to the FSA providers. In addition to this, the mobile application developers further deploy and provide financial applications to end users. The financial services software has gained considerable attention from the enterprise segment in the last few years. The value chain analysis starts with the vendors providing financial solutions such as audit, risk, and compliance management, BI and analytics applications, business transaction processing, customer experience, and enterprise IT to SMBs and enterprises.

The FSA market is a holistically interconnected market that comprises segments such as FSA providers, cloud services providers, and telecom network operators.

6.3 PORTER'S FIVE FORCES ANALYSIS

The competitive environment prevailing in the FSA market can be analyzed through Porter's Five Forces analytical framework.

FIGURE 25 PORTER'S FIVE FORCES ANALYSIS: FSA MARKET

Source: Annual Reports, SEC Filings, Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

6.3.1 THREAT FROM NEW ENTRANTS

The threat from new entrants is medium in the global FSA market owing to moderate capital requirement. The market is dominated by few traditional software vendors and new entrants find hard to compete with them. New companies that want to enter into this business are relying on innovative FSA to gain competitive edge over traditional software vendors. The presence of new entrants poses threats for the existing players which in turn results in pressure on prices, costs, and profit margins for all players. The threat of entrants depends on the power of entry barriers in the industry. In this market, these barriers have been analyzed based on the following factors:

Capital Requirement:

Modest investment is required by the new entrants to enter in FSA market and start catering to the BFSI vertical. Owing to the moderate capital requirements, only companies with deep pockets think of entering this market and compete with well-established traditional players. Talent acquisition has been a core issue of contention among new players owing to the surging human capital cost.

- Capital requirement
- Incumbency advantages

Incumbency Advantages:

Relevant experiences of well-established players have exceptional advantages over the new entrants. This leads them to be in a better position when it comes to offer customized and personal offerings. Hence, potential new entrants take time to establish and initiate their operations.

6.3.2 THREAT OF SUBSTITUTES

The threat of substitutes is low in the global FSA market. The below-mentioned factors are responsible for this.

Highly Regulated Market:

The threat of substitutes is low in the global FSA market due to highly regulated market, globally. Furthermore, companies find hard to transform their core legacy systems with other technology platforms owing to risks associated with financial data. Owing to high security concerns, most of the financial institutions prefer to stick to a single vendor for a definite period of time. This in turn restricts the substitute services, thus reducing the substitute volume in the market.

- Highly regulated market
- Security concerns

Security Concern:

Due to the presence of innovative software developers, traditional banking software vendors face the threat of losing their market share. The entry of big IT companies in the FSA market is also exhausting the market share of niche financial software vendors.

6.3.3 BARGAINING POWER OF SUPPLIERS

The bargaining power of suppliers is medium in the global FSA market; various software vendors providing different customized and associated financial services are competing among themselves in order to gain larger share of the pie.

Innovative Technology:

Availability of innovative technology provides leverage to the vendors for reinforcing their competitive position in the market and therefore increasing their bargaining power.

- Innovative technology
- Demand for complete financial suite

Demand for Complete Financial Suite:

Due to the surging demand for value-added services coupled with core banking services, a decreasing trend of the potential vendors has been observed with the above-mentioned capabilities; it increases the bargaining power of the vendors providing integrated financial suite.

6.3.4 BARGAINING POWER OF BUYERS

The bargaining power of buyers is medium to high in the global FSA market; customers or buyers can intensely disturb the industry by demanding lower prices and numerous features in financial services.

Below are the significant factors which indicate the power of the buyers in the global FSA market.

High Switching Cost:

Financial institutions who wish to change their services providers cannot easily switch to different vendor, as cost of switching is high and transforming their legacy core systems involves huge infrastructure, technology, and data management capabilities.

- Customer switching cost
- Highly customized financial solutions
- Low availability of substitute services

Highly Customized Financial Solutions:

Customized demands by financial institutions depending upon their operational requirements influence the core functionality of the financial application suite, thereby affecting the prices comprehensively.

Low Availability of Substitute Services:

This factor also puts pressure on the bargaining power of buyers.

6.3.5 INTENSITY OF COMPETITIVE RIVALRY

The intensity of competitive rivalry is high in the FSA market. Success is bounded due to rivalry among the existing financial software vendors along with the entry of big IT majors in the BFSI software market. Following are the factors due to which there is an increase in intense competition:

Presence of Large Number of Companies:

Due to the presence of large number of companies in the global FSA market, stiff competition prevails among the big giants such as TCS, Infosys, Fiserv, FIS, Temenos, Oracle Corporation, Accenture, and IBM. The current competition among existing firms results in a high intensity of competitive rivalry.

- Presence of large number of companies
- Intense competition

Intense Competition:

Industry is undergoing a significant market growth and competition among market players is intense. The fierce rivalry amid big players has resulted in the decrease in average selling price of the solutions by them.

7 FSA MARKET ANALYSIS, BY SOFTWARE

KEY FINDINGS

- The global FSA market is expected to grow at a CAGR of 9.1% from 2014 to 2019 to reach \$103,661.7 million by 2019
- Business transaction processing and enterprise IT are the top segments that are expected to contribute more than 3/4th of the total market share in the FSA ecosystem
- Customer experience is the fastest growing software segment with an expected CAGR of 19.6% from 2014 to 2019.
- APAC is one of the fastest growing regions with an expected CAGR of 11.4% from 2014 to 2019
- BI and analytics application is expected to experience a high growth rate in the software market

7.1 INTRODUCTION

The BFSI industry has recovered after the global financial crisis, but still uncertainties remain. Complicated and ever changing regulatory environment and defaulting on sovereign debt remains a key concern for European Union. Although the crisis had catastrophic effect on global economy, still many emerging countries in LA and APAC portrayed impressive growth of 11.4%. IT investments continued in the BFSI vertical in APAC and LA due to governments' push for financial inclusion. Financial services, these days, are not just limited to traditional services but also include new regulatory compliances adherence, asset quality improvement, customer centricity enhancement, focus on digital convergence, and competition tackling from other innovative financial organizations.

With cut-throat competition prevailing in the financial industry, significantly new players like Temenos and Fiserv are revolutionizing the industry with new business models where customers are offered specific customized services based on their requirements, improving customer retention. As the financial industry realized the importance of customer experience and preferences, the demand for FSA software surged. Moreover, these software help organizations to focus on their core service areas such as customer satisfaction, profitability improvement, and better real-time risk management.

FIGURE 26 BUSINESS TRANSACTION PROCESSING AND ENTERPRISE IT ARE LEADING THE FSA SOFTWARE MARKET

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

TABLE 6 FSA MARKET SIZE, BY SOFTWARE, 2012–2019 (\$MILLION)

Software	2012	2013	2014	2019	CAGR (2014–2019)
Audit, Risk, and Compliance	1,196.3	1,309.9	1,436.0	2,393.3	10.8%

Customer Experience	623.7	736.4	870.7	2,129.6	19.6%
Enterprise IT	6,099.8	6,523.3	6,984.6	10,350.3	8.2%
Total	23,816.2	25,578.6	27,509.4	41,699.6	8.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size by software. The customer experience software market size is expected to grow from \$870.7 million in 2014 to \$2,129.6 million by 2019, at a CAGR of 19.6% during the forecast period. The business transaction processing solution accounts for the largest market size due to the surging demand by financial institutions to modernize their traditional platforms to meet changing customer requirements.

7.2 AUDIT, RISK, AND COMPLIANCE MANAGEMENT

Digital channels are gaining traction for providing financial services, but these are prone to risks of identity theft, financial data loss, frauds, and money laundering. This has forced the financial regulatory bodies in specific countries to formulate stringent regulations to prevent any illegal activity. Thus, banks and financial services organizations have to comply with these regulations and norms with increased focus on audit, risk, and compliance management. The BFSI industry is continuously evolving with new services, banking products, and technological advancements to enhance operational efficiency. These developments bring greater risks giving rise to a larger set of rules and regulations formulated by the governments, which needs to be strictly adhered to by financial organizations. The government regulations subject banks and financial institutions to certain requirements, restrictions, and guidelines, which are important for maintaining a sustainable and competitive financial system. Audit, risk, and compliance management solutions are necessary to audit the financial system in order to avoid any kind of risk arising due to nonadherence of any of the regulation and frauds. In recent past, various regulatory changes such as Foreign Account Tax Compliance Act (FATCA) Management, Know Your Customer, Liquidity Risk Management, Sarbanes-Oxley (SOx) Act, BASEL II, data privacy, consumer privacy, and Anti-Money Laundering (AML) have been included in the financial systems. Banking and financial institutions are developing or purchasing such solutions to manage compliance of such regulations. Integrated audit, risk, and compliance management software allows the BFSI organizations to look at their overall governance and objectives to evaluate their operational performance adhering to government regulations. These solutions allow organizations to deploy a single system and manage multiple regulations and compliance initiatives effectively and economically. This new approach allows centralizing the risk and compliance management internally and provides real-time access to the key indicators.

TABLE 7 AUDIT, RISK, AND COMPLIANCE MANAGEMENT: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	795.1	852.7	914.6	1,335.3	7.9%
Hosted	401.2	457.1	521.4	1,057.9	15.2%
Total	1,196.3	1,309.9	1,436.0	2,393.3	10.8%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the audit, risk and compliance market size by deployment type. The market size of hosted deployment type is expected to grow from \$521.4 million in 2014 to \$1,057.9 million by 2019, at a CAGR of 15.2% during the forecast period.

TABLE 8 AUDIT, RISK, AND COMPLIANCE MANAGEMENT: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	389.9	440.7	498.8	977.4	14.4%
Enterprises	806.3	869.1	937.2	1,415.9	8.6%
Total	1,196.3	1,309.9	1,436.0	2,393.3	10.8%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the audit, risk and compliance market size by user type. The market size of SMBs is expected to grow from \$498.8 million in 2014 to \$977.4 million by 2019, at a CAGR of 14.4% during the forecast period.

TABLE 9 AUDIT, RISK, AND COMPLIANCE MANAGEMENT: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	365.1	395.1	427.9	674.5	9.5%
Europe	309.3	336.7	366.8	596.5	10.2%
APAC	416.3	460.3	509.9	885.0	11.7%
MEA	36.0	39.8	44.1	77.6	12.0%
LA	69.5	77.9	87.3	159.7	12.8%
Total	1,196.3	1,309.9	1,436.0	2,393.3	10.8%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the audit, risk and compliance market size by region. The market size of LA region is expected to grow from \$87.3 million in 2014 to \$159.7 million by 2019, at a CAGR of 12.8% during the forecast period.

7.3 BI AND ANALYTICS APPLICATIONS

BI and analytics applications help to gain fruitful insights by integrating multichannel data. These solutions are integrated with easy-to-use tools for analyzing, planning, monitoring, and reporting the key performance indicators, thus enabling financial institutions to strategically address trends in their business performance, IT performance, and customer behavior. In the current economic scenario, where cut-throat competition is prevailing, financial institutions are trying to optimize their businesses by seeking efficiencies in operational management and processing along with investment in new technologies to drive future growth.

Over the past few years, mammoth amount of structured and unstructured customer and market data has accumulated in financial institutions. This raw data has huge potential to provide insight about customer and business trends to formulate short-term as well as long-term strategic goals with the aim to gain profitability. Moreover, the BI and analytics software also delivers insights from customer-related data obtained from various touch points such as web, mobile, e-mails, and through other channels used by them to interact with the banks and other financial institutions. This helps the financial organizations to understand customer requirement, enabling them to provide better service.

MEA	39.8	45.1	51.2	101.4	14.7%
LA	89.3	102.1	116.9	236.3	15.1%
Total	1,351.9	1,514.5	1,699.1	3,184.6	13.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the BI and analytics application market size by region. The market size of APAC region is expected to grow from \$546.6 million in 2014 to \$1,155.3 million by 2019, at a CAGR of 16.1% during the forecast period.

7.4 BUSINESS TRANSACTION PROCESSING

Business transaction processing software integrates all the financial services provided by a financial institution from transaction authorization to statement generation, from card issuance to customer service. The transaction processing solution provides a single point of authorization, transaction posting, settlement, reporting, and access for all services. This helps banks and other financial institutions to respond strategically to today's business challenges, and it helps to transform their traditional core banking platform and processes according to the industry trends imbibing the latest software modules, driving productivity improvements across front and back offices, and reducing operating costs.

Over the last few years, risk-based transaction monitoring and processing system is gaining traction in the banking system. Thus, business transaction processing and monitoring systems are useful in detecting the processes or transactions that are abnormal. The software has quick fraud detection capability, which helps the banks to reduce their losses. The growing trends of cashless transactions (such as online banking, mobile banking, and card payments) can be seen in the emerging economies of APAC, Europe, and LA, giving rise to the risks of fraudulent transactions. Thus, the increasing preference of consumers for cashless payments globally is fuelling the growth of business transaction monitoring and processing software.

TABLE 13 BUSINESS TRANSACTION PROCESSING: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	10,095.5	10,543.6	11,003.2	13,803.0	4.6%
Hosted	4,449.0	4,951.0	5,515.8	9,838.7	12.3%
Total	14,544.5	15,494.5	16,519.0	23,641.7	7.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the business transaction processing market size by deployment type. The market size of hosted business transaction processing software is expected to grow from \$5,515.8 million in 2014 to \$9,838.7 million by 2019, at a CAGR of 12.3% during the forecast period. Business transaction processing is gaining traction as most of the firms are going digital. “This brick to click” mechanism has propelled the growth of hosted deployment type in the business transaction processing segment.

TABLE 14 BUSINESS TRANSACTION PROCESSING: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	4,926.6	5,395.7	5,913.5	9,731.4	10.5%
Enterprises	9,617.9	10,098.9	10,605.4	13,910.3	5.6%
Total	14,544.5	15,494.5	16,519.0	23,641.7	7.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the business transaction processing market size by user type. The market size of SMBs is expected to grow from \$5,913.5 million in 2014 to \$9,731.4 million by 2019, at a CAGR of 10.5% during the forecast period.

TABLE 15 BUSINESS TRANSACTION PROCESSING: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	4,610.7	4,810.7	5,021.0	6,503.7	5.3%
Europe	3,832.3	4,038.0	4,255.6	5,780.8	6.3%
APAC	4,584.7	5,013.8	5,486.0	8,748.6	9.8%
MEA	483.4	516.4	551.7	801.6	7.8%
LA	1,033.5	1,115.8	1,204.8	1,807.0	8.4%
Total	14,544.5	15,494.5	16,519.0	23,641.7	7.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the business transaction processing market size by region. The market size of APAC region is expected to grow from \$5,486.0 million in 2014 to \$8,748.6 million by 2019, at a CAGR of 9.8% during the forecast period.

7.5 CUSTOMER EXPERIENCE

In today's highly competitive industry, financial institutions are looking for ways to generate revenue by retaining old customers, acquiring new ones, and up-selling and cross selling to both of them. New players entering the market are employing innovative technologies and offering personalized products and services to attract customers, thus exhausting the share of traditional players. Customer Experience Management (CEM) is a solution which enables organizations to interact with their customers and understand their grievances related to specific products and services. The CEM software can be employed using different platforms such as tele-calling, web analytics and text analysis, and mobile and social media. CEM solutions help banks and other non-banking financial institutions to provide a single view of all the interactions and manage seamless customer experience across all channels. CEM software also helps organizations to offer specific services as required by the customer and helps them in improving sales productivity. Thus, the solution helps organizations to foster (improve and manage) customer experience, enhance customer loyalty, build long-term relationship, and improve customer retention.

FIGURE 28 CUSTOMER EXPERIENCE IS EXPECTED TO SHOW CONSIDERABLE GROWTH IN ALL REGIONS

Total	623.7	736.4	870.7	2,129.6	19.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the customer experience market size by region. The market size of APAC region is expected to grow from \$263.3 million in 2014 to \$736.7 million by 2019, at a CAGR of 22.8% during the forecast period.

7.6 ENTERPRISE IT

Enterprise IT solutions for banking and financial institutions include various solutions for business operations related to human resources, accounting, procurement, business process management, identity management, application development tools, middleware, and mobility platforms or software. These core solutions are necessary to manage the IT infrastructure in the BFSI vertical, which facilitates them to streamline and optimize their day-to-day service operations.

Globally, the customers of the BFSI industry are becoming technology savvy, thus the banking industry has to adopt technologies such as social media, e-commerce, mobile banking, instant messaging, and more in its operations. The enterprise IT software and solutions help the IT staff of the BFSI industry to incorporate all such changes to reduce cost of service. The surging demand for enterprise IT solutions in the emerging economies of APAC and LA is driving the growth and demand of such software.

FIGURE 29 APAC IS EXPECTED TO EXHIBIT THE HIGHEST GROWTH RATE IN ENTERPRISE IT

TABLE 19 ENTERPRISE IT: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	4,220.5	4,422.8	4,633.9	5,997.6	5.3%
Hosted	1,879.3	2,100.5	2,350.7	4,352.7	13.1%
Total	6,099.8	6,523.3	6,984.6	10,350.3	8.2%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the enterprise IT market size by deployment type. The market size of hosted deployment type is expected to grow from \$2,350.7 million in 2014 to \$4,352.7 million by 2019, at a CAGR of 13.1% during the forecast period.

TABLE 20 ENTERPRISE IT: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	2,057.9	2,265.7	2,497.9	4,288.3	11.4%
Enterprises	4,041.9	4,257.6	4,486.6	6,062.0	6.2%
Total	6,099.8	6,523.3	6,984.6	10,350.3	8.2%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the enterprise IT market size by user type. The market size of SMBs is expected to grow from \$2,497.9 million in 2014 to \$4,288.3 million by 2019, at a CAGR of 11.4% during the forecast period.

TABLE 21 ENTERPRISE IT: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	1,868.3	1,958.9	2,055.4	2,773.3	6.2%
Europe	1,578.9	1,671.4	1,770.7	2,506.5	7.2%
APAC	1,999.1	2,187.4	2,395.8	3,901.7	10.2%
MEA	207.6	222.3	238.2	357.1	8.4%
LA	445.8	483.3	524.4	811.7	9.1%
Total	6,099.8	6,523.3	6,984.6	10,350.3	8.2%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the enterprise IT market size by region. The market size of APAC region is expected to grow from \$2,395.8 million in 2014 to \$3,901.7 million by 2019, at a CAGR of 10.2% during the forecast period. Enterprise IT is witnessing a record growth in the APAC region due to growing financial institutions in the region. Many economies in APAC region are becoming the financial hub for the world such as Hong Kong, owing to the cheap skilled workforce availability.

8 FSA MARKET ANALYSIS, BY SERVICES

KEY FINDINGS

- The services segment of the FSA market is estimated to grow at a CAGR of 9.5% from 2014 to 2019 to reach \$61,962.1 million by 2019
- Emergence of digital channels for banking has changed the way of traditional financial services delivery model
- Integration services market is expected to be the highest growing market and dominate the services segment of the FSA market
- Consulting services market is the second fastest growing market in the services segment of the FSA market with a CAGR of 10.0% from 2014 to 2019
- The services segment of the FSA market in APAC is expected to reach \$22,903.0 million by 2019, growing with a CAGR of 11.7% from 2014 to 2019

8.1 INTRODUCTION

The FSA market is segmented on the basis of services into consulting services, integration services, training and support services, and operations and maintenance services. The services market holds a major share of the global FSA market and is expected to grow significantly. Companies such as IBM, Accenture, Oracle Corporation, TCS, and Infosys are among the major players providing services for the FSA market.

FIGURE 30 CONSULTING SERVICES WILL CONTINUE TO DOMINATE THE SERVICES SEGMENT OF THE FSA MARKET

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

TABLE 22 FSA MARKET SIZE, BY SERVICES, 2012–2019 (\$MILLION)

Service	2012	2013	2014	2019	CAGR (2014–2019)
Consulting Services	10,168.0	11,062.8	12,048.9	19,428.7	10.0%
Integration Services	8,905.9	9,743.1	10,670.9	17,708.0	10.7%
Training and Support Services	6,627.4	6,985.8	7,370.1	10,035.3	6.4%
Operation and Maintenance Services	7,919.5	8,588.4	9,323.1	14,790.1	9.7%
Total	33,620.9	36,380.2	39,413.0	61,962.1	9.5%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size by services. The market size of integration services is expected to grow from \$10,670.9 million in 2014 to \$17,708.0 million by 2019, at a CAGR of 10.7% during the forecast period. Integration services are facing a strong demand since most of the buyers prefer an integrated suite to give a unified landscape of all the financing transactions. Moreover, integration services are evolving, since it involves blend of technologies, which result in superior performance.

8.2 CONSULTING SERVICES

The consulting services help in planning, analyzing, and formulating strategies for the deployment of FSA for the financial institutions. The digital economy is triggering a new wave of transformation in the way financial organizations do business. However, this rapid adoption of new technologies demands significant cultural change and it challenges traditional business models. The need for function-specific solutions or end-to-end solutions is assessed by these services and the clients are provided consultation services on subscription basis. Consulting services form the backbone of banking and financial institutions as consulting firms are instrumental in framing strategies for a particular institution. Thus, the mere acceptance or rejection of a proposal depends on the depth of consulting services. The companies, such as IBM, Accenture, and TCS among others provide consulting and planning services for the FSA market.

TABLE 23 CONSULTING SERVICES: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	3,505.2	3,901.3	4,348.1	7,901.5	12.7%
Enterprises	6,662.8	7,161.5	7,700.7	11,527.2	8.4%
Total	10,168.0	11,062.8	12,048.9	19,428.7	10.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the consulting services market size by user type. The market size of SMBs is expected to grow from \$4,348.1 million in 2014 to \$7,901.5 million by 2019, at a CAGR of 12.7% during the forecast period.

TABLE 24 CONSULTING SERVICES: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	3,143.2	3,366.7	3,607.8	5,386.0	8.3%
Europe	2,668.9	2,873.9	3,097.1	4,759.5	9.0%
APAC	3,285.4	3,654.4	4,068.9	7,168.3	12.0%
MEA	338.4	368.5	401.7	654.7	10.3%
LA	732.2	799.3	873.4	1,460.3	10.8%
Total	10,168.0	11,062.8	12,048.9	19,428.7	10.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the consulting services market size by region. The market size of APAC region is expected to grow from \$4,068.9 million in 2014 to \$7,168.3 million by 2019, at a CAGR of 12.0% during the forecast period. Consulting services are evolving due to outsourcing of the management processes along with data management. Since, APAC is a region of growing economies, there is an increased demand of dedicated consulting to improve the existing processes.

8.3 INTEGRATION SERVICES

Integration services offered by various players in the market comprise of facilities and frameworks for integration of various platforms with third-party environments. Today's competitive business environment of the FSA market is provoking organizations to take progressive steps toward developing service-oriented, plug-and-play business capabilities. Some of the challenges that organizations face today are the business processes spanning IT applications, sharing of data between applications, and inter-dependence between processes. Integration services help to mitigate these challenges and allow the end users to have unified view of data. The integration services promote mechanisms for application integration along with developing a roadmap for system evolution and act as a bridge between architecture goals and current realities.

TABLE 25 INTEGRATION SERVICES: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	3,054.4	3,419.3	3,833.1	7,175.2	13.4%
Enterprises	5,851.5	6,323.9	6,837.8	10,532.7	9.0%
Total	8,905.9	9,743.1	10,670.9	17,708.0	10.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the integration services market size by user type. The market size of SMBs is expected to grow from \$3,833.1 million in 2014 to \$7,175.2 million by 2019, at a CAGR of 13.4% during the forecast period.

TABLE 26 INTEGRATION SERVICES: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	2,780.0	2,990.4	3,218.6	4,912.9	8.8%
Europe	2,372.2	2,569.4	2,785.0	4,403.4	9.6%
APAC	2,820.2	3,163.7	3,552.6	6,529.9	12.9%
MEA	289.9	317.2	347.2	577.9	10.7%
LA	643.6	702.5	767.5	1,283.9	10.8%
Total	8,905.9	9,743.1	10,670.9	17,708.0	10.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the integration services market size by region. The market size of APAC region is expected to grow from \$3,552.6 million in 2014 to \$6,529.9 million by 2019, at a CAGR of 12.9% during the forecast period.

8.4 TRAINING AND SUPPORT SERVICES

Most of the companies provide specific objective-oriented training to the employees of financial institutions. This training imparts the basic knowledge regarding operational background and also exclusive training to activate fail-safe procedures at the event of any calamity such as hacking or robbery through the system. Training is essential as it improves team integration and boosts effective responses and recovery activities. Training is of very critical nature, since the employees are handling financial data of utmost importance which has to be kept secure and private. Moreover, the basic aim of training is to help employees to get hands-on training on the operational parameters of the application so that mistakes can be minimized. A manual error in the financial system can lead the complete financial data to risk. Also, support services such as data warehousing and data management are usually outsourced by the financial institutions. This reduces the additional overhead task of managing and processing of data as mammoth amount of financial data is generated everyday within the financial institutions.

TABLE 27 TRAINING AND SUPPORT SERVICES: FSA MARKET SIZE, BY USER TYPE, 2012-2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014-2019)
SMBs	2,236.7	2,420.7	2,622.3	4,089.7	9.3%
Enterprises	4,390.7	4,565.1	4,747.8	5,945.6	4.6%
Total	6,627.4	6,985.8	7,370.1	10,035.3	6.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the training and support services market size by user type. The market size of SMBs is expected to grow from \$2,622.3 million in 2014 to \$4,089.7 million by 2019, at a CAGR of 9.3% during the forecast period. Training and support services are essential as they acquaint the employees with operational guidelines for operating applications. This increases awareness among employees regarding the overall functionality of the software. Since the SMBs do not have hands-on training on new technologies, the demand for training and support services is also increasing significantly.

TABLE 28 TRAINING AND SUPPORT SERVICES: FSA MARKET SIZE, BY REGION, 2012-2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014-2019)
NA	2,126.7	2,193.8	2,264.0	2,752.1	4.0%
Europe	1,801.8	1,874.4	1,949.7	2,469.3	4.8%
APAC	2,014.8	2,193.0	2,388.5	3,731.9	9.3%
MEA	223.7	234.5	246.0	323.9	5.7%
LA	460.5	490.1	521.9	758.1	7.8%
Total	6,627.4	6,985.8	7,370.1	10,035.3	6.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the training and support services market size by region. The market size of APAC region is expected to grow from \$2,388.5 million in 2014 to \$3,731.9 million by 2019, at a CAGR of 9.3% during the forecast period.

8.5 OPERATIONS AND MAINTENANCE

The operations and maintenance services are very dire from the viewpoint of criticality and risk associated with the financial data. The operations and maintenance services mainly deal with monitoring and keeping all the operational and administrative facilities in the top condition. Effective maintenance services not only ensure efficient and smooth operational flow, but also help in increasing the lifecycle and performance of the whole system. The operating environment of FSA fulfillment is very complex and backup and recovery of the system data is essential. Hence, if a problem occurs, the major cause is to be identified by the experts and suitable solution is needed to be applied without affecting the overall business. The operation and maintenance services ensure proper maintenance of the IT infrastructure, where the maintenance department is responsible for archiving the data in consistent format with any data redundancy.

TABLE 29 OPERATIONS AND MAINTENANCE SERVICES: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	2,705.8	3,002.3	3,335.4	5,966.8	12.3%
Enterprises	5,213.7	5,586.1	5,987.7	8,823.3	8.1%
Total	7,919.5	8,588.4	9,323.1	14,790.1	9.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the operation and maintenance services market size by user type. The market size of SMBs is expected to grow from \$3,335.4 million in 2014 to \$5,966.8 million by 2019, at a CAGR of 12.3% during the forecast period.

TABLE 30 OPERATIONS AND MAINTENANCE SERVICES: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	2,485.2	2,649.0	2,825.0	4,116.8	7.8%
Europe	2,064.8	2,219.7	2,387.7	3,633.9	8.8%
APAC	2,553.9	2,833.3	3,146.4	5,472.9	11.7%
MEA	257.9	280.3	304.7	489.9	10.0%
LA	557.8	606.2	659.3	1,076.6	10.3%
Total	7,919.5	8,588.4	9,323.1	14,790.1	9.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the operation and maintenance services market size by region. The market size of APAC region is expected to grow from \$3,146.4 million in 2014 to \$5,472.9 million by 2019, at a CAGR of 11.7% during the forecast period.

9 FSA MARKET ANALYSIS, BY DEPLOYMENT TYPE

KEY FINDINGS

- The global FSA market is expected to grow at a CAGR of 9.1% from 2014 to 2019 to reach \$103,661.7 million by 2019
- Hosted deployment is one of the fastest growing segments at an expected CAGR of 13.6%
- APAC is one of the fastest growing regions at an expected CAGR of 11.4% from 2014 to 2019
- On-premises deployment type is expected to have the larger market share in the deployment type segment
- Enhanced focus on customer experience is driving the FSA market in the APAC region
- The on-premises market is expected to grow significantly with the escalating service operation costs

9.1 INTRODUCTION

This section discusses the current and future trends in the FSA market based on the following types of deployment—on-premises and hosted. The global adoption trends for cloud deployment show a strong positive growth, whereas the on-premises deployment shows a slower growth rate during the forecast period. Adoption rate of cloud deployment is on the rise due to features such as pay-per-usage, and reduced installation and maintenance cost. The on-premises market is expected to grow in the coming years as enterprises, being a major segment, have the required infrastructure for this technology.

FIGURE 31 HOSTED DEPLOYMENT MARKET SIZE IS EXPECTED TO DOUBLE BY 2019

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

TABLE 31 FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	16,443.4	17,303.4	18,206.0	24,077.1	5.7%
Hosted	7,372.8	8,275.3	9,303.4	17,622.5	13.6%
Total	23,816.2	25,578.6	27,509.4	41,699.6	8.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights FSA market size by deployment type. The market size of hosted deployment type is expected to grow from \$9,303.4 million in 2014 to \$17,622.5 million by 2019, at a CAGR of 13.6% during the forecast period. Due to the advent of digitization, voluminous data is getting generated per micro second, especially in financial institutions. Thus, there is an increased need of processing this data to identify trends and formulate long-term growth strategies. Hosted deployment type is gaining traction owing to efficient management of data and easy scalability.

9.2 ON-PREMISES

On-premises deployment is the most trustworthy deployment type when it comes to FSA owing to criticality of operations. Since, the on-premises systems are installed at the inception of any financial institution; it becomes tough for an organization to immediately migrate to any other deployment type. Moreover, data management on on-premises infrastructure reduces the turnaround time significantly. However, issues such as scalability and single point of failure can minimize the effectiveness of the on-premises systems.

FIGURE 32 APAC IS EXPECTED TO EXHIBIT THE HIGHEST MARKET SIZE DURING THE PERIOD 2014–2019

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

TABLE 32 ON-PREMISES: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	5,558.1	6,012.5	6,504.0	9,883.7	8.7%
Enterprises	10,885.3	11,290.9	11,702.0	14,193.3	3.9%
Total	16,443.4	17,303.4	18,206.0	24,077.1	5.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the on-premises market size by user type. The market size of SMBs is expected to grow from \$6,504.0 million in 2014 to \$9,883.7 million by 2019, at a CAGR of 8.7% during the forecast period.

TABLE 33 ON-PREMISES: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	5,185.3	5,348.0	5,513.3	6,628.2	3.8%
Europe	4,324.4	4,503.7	4,687.4	5,908.6	4.7%
APAC	5,236.5	5,648.0	6,089.7	8,916.9	7.9%
MEA	543.3	573.1	604.0	808.7	6.0%
LA	1,153.9	1,230.6	1,311.6	1,814.6	6.7%
Total	16,443.4	17,303.4	18,206.0	24,077.1	5.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the on-premises market size by region. The market size of APAC region is expected to grow from \$6,089.7 million in 2014 to \$8,916.9 million by 2019, at a CAGR of 7.9% during the forecast period. On-premises deployment type market is growing in the APAC region as this region is abode to developing as well as developed economies with financial inclusion varying from country to country. Institutions in these economies prefer legacy systems as security and privacy of data is critical. Thus on-premises deployment type is witnessing record growth in APAC region.

9.3 HOSTED

The hosted deployment type refers to cloud-based deployment of the software. There has been an upward trend in deployment of FSA on cloud infrastructure. With reduced physical infrastructure, less maintenance cost, 24/7 data accessibility, and effective monitoring of data, most of the FSA providers are rapidly moving toward deployment on the cloud. Banking and financial services institutions are possibly the most advanced in terms of technology adoption to run their business, to the extent that business is impacted significantly even with millisecond response time variations. Thus, data accessibility and data security form a major issue of contention in BFSI vertical owing to the risk associated with financial data. All the major providers of FSA are in initial phases of their cloud deployment. Though the implementation of FSA become easy due to cloud deployment, but various significant challenges including legal regulations, security and safety, performance, reliability, transformation complexity, operational control, data governance, and most essentially promised return on investment is hampering the growth of this market.

FIGURE 33 APAC REGION IS EXPECTED TO EXPERIENCE THE HIGHEST GROWTH RATE IN THE HOSTED FSA MARKET

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

TABLE 34 HOSTED: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	2,490.0	2,877.8	3,330.8	7,307.2	17.0%
Enterprises	4,882.8	5,397.4	5,972.6	10,315.3	11.5%
Total	7,372.8	8,275.3	9,303.4	17,622.5	13.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the hosted deployment type market size by user type. The market size of SMBs is expected to grow from \$3,330.8 million in 2014 to \$7,307.2 million by 2019, at a CAGR of 17.0% during the forecast period. SMBs are slowly transforming their legacy systems with innovative technologies investing more in digital infrastructure. Most of the SMBs are storing their operational data on hosted infrastructure due to less capital requirement and high scalability.

TABLE 35 HOSTED: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	2,318.5	2,551.9	2,811.6	4,844.5	11.5%
Europe	1,937.9	2,153.0	2,395.1	4,330.1	12.6%
APAC	2,351.5	2,702.9	3,112.0	6,510.2	15.9%
MEA	243.2	273.8	308.6	595.1	14.0%
LA	521.7	593.6	676.1	1,342.6	14.7%
Total	7,372.8	8,275.3	9,303.4	17,622.5	13.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the hosted deployment type market size by region. The market size of APAC region is expected to grow from \$3,112.0 million in 2014 to \$6,510.2 million by 2019, at a CAGR of 15.9% during the forecast period.

10 FSA MARKET ANALYSIS, BY USER TYPE

KEY FINDINGS

- The global FSA market on the basis of user type is estimated to grow from \$66,922.5 million in 2014 to \$103,661.7 million by 2019
- The enterprise market is estimated to grow from \$42,948.7 million in 2014 to \$61,337.4 million by 2019, at a CAGR of 7.4% during the forecast period
- The enterprise market is expected to grow significantly with the current advancements in technology and the increase in demand for customized platforms
- The market in APAC is expected to exhibit the highest growth rate for the user type model
- The SMBs market is expected to grow from \$23,973.8 million in 2014 to \$42,324.2 million by 2019, at a CAGR of 12.0% during the forecast period
- Rise in demand among enterprises to improve their revenue margins and automate their business operations is driving the FSA market
- Increase in demand for cloud-based FSA is driving the FSA market in the SMB segment

10.1 INTRODUCTION

For any large or small organization in the BFSI vertical, access to critical business information and integrated reporting is of utmost importance. The need to maximize the value of the data present within financial institutions is driving the BI and analytics software adoptions. Further, customers today prefer new digital channels for service in place of traditional service delivery modes. This has compelled the BFSI vertical to transform their core banking platforms to imbibe new technologies and to modernize their business processes to meet the changing customer requirements. The user types present in the FSA market comprise SMBs and enterprises. For SMBs or companies without IT staffs, cloud FSA is expected to show tremendous growth in adoptions. Further, the growth of FSA among large enterprises is projected to be steady during the next 5 years. This is mainly due to the deployment of innovative technologies such as SMAC by new entrants in the market compelling the existing players to modernize their traditional IT infrastructure to meet the changing customer requirements.

FIGURE 34 SMBs EXHIBIT THE FASTEST GROWTH RATE IN THE FSA MARKET DURING THE FORECAST PERIOD

TABLE 36 FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	19,550.2	21,634.0	23,973.8	42,324.2	12.0%
Enterprises	37,886.9	40,324.9	42,948.7	61,337.4	7.4%
Total	57,437.1	61,958.8	66,922.5	103,661.7	9.1%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size by user type. The market size of SMBs is expected to grow from \$23,973.8 million in 2014 to \$42,324.2 million by 2019, at a CAGR of 12.0% during the forecast period. The SMBs market is expected to experience high growth rate due to the rapid adoption of cloud-based FSA as they are cost effective and can be scaled according to client requirements.

10.2 SMB

The SMBs present in the BFSI vertical are mainly concerned about the expenses involved in deploying FSA and on hiring skilled IT workforce to maintain it. Numerous financial solutions and applications such as enterprise IT; customer experience; audit, risk, and compliance; and BI and analytics are necessary for every organization. Since budget constraints are present within SMBs, several of these organizations cannot afford such sophisticated software modules and have to depend on cloud-based tools and applications. This usage involves the rent that companies have to pay regularly for the deployment of hosted solutions. At times, SMBs have to purchase a packaged solution in which some solutions remain unutilized. In addition, the cost involved in on-premises deployment of FSA is a concern for SMBs. Hence, SMBs are extensively considering value proposition of cloud-based deployments, since cloud business financial solutions provide cost-effective and efficient ways for SMBs to roll out their services.

*Small businesses in this study have been defined as the organizations with employee size of 1–99, whereas medium businesses in this study have been defined as the organizations with employee size of 100–999.

TABLE 37 SMB: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	6,918.2	7,480.4	8,095.2	12,722.0	9.5%
Europe	5,221.4	5,737.7	6,310.5	10,752.4	11.2%
APAC	5,706.8	6,503.7	7,420.1	14,785.8	14.8%
MEA	558.6	622.7	694.8	1,272.1	12.9%
LA	1,145.2	1,289.5	1,453.2	2,792.0	14.0%
Total	19,550.2	21,634.0	23,973.8	42,324.2	12.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the SMBs market size by region. The market size of APAC region is expected to grow from \$7,420.1 million in 2014 to \$14,785.8 million by 2019, at a CAGR of 14.8% during the forecast period. APAC region is registering robust growth owing to increased participation by SMBs. Naturally, the number of SMBs, specifically in developing countries such as India, China, and Indonesia, is continuously rising owing to the strong economic development taking place in this region.

FIGURE 35 SERVICES ARE EXPECTED TO EXPERIENCE HIGHER GROWTH RATE AMONG SMBS DURING THE FORECAST PERIOD

TABLE 38 SMB: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	8,048.1	8,890.3	9,834.8	17,191.0	11.8%
Service	11,502.1	12,743.6	14,139.0	25,133.3	12.2%
Total	19,550.2	21,634.0	23,973.8	42,324.2	12.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the SMBs market size by solution. The market size of services is expected to grow from \$14,139.0 million in 2014 to \$25,133.3 million by 2019, at a CAGR of 12.2% during the forecast period.

10.3 ENTERPRISES

Enterprises in the BFSI vertical are the prime investment makers for FSA in this market. Substantial amount of CAPEX is made by enterprises to modernize their traditional IT infrastructure to meet the changing BFSI trends. In addition, enterprises are investing in new financial software and solutions to cater to the changing customer trends such as multichannel platforms for service delivery (Internet banking, phone banking, and SMS banking) and enhanced customer experience (web, social media, and tele-calling); BI and data analytics to better predict future growth trends; and audit, risk, and compliance to adhere to the changing government regulations. Owing to new digital channels for service delivery, frauds and risks are also on the rise, and enterprises are investing heavily in these solutions to reduce their revenue loss. In addition, BI and analytics solutions enable the large enterprises to tailor their applications and deliver the desired analytics experience to their customers so as to sustain in the competitive environment.

Large enterprises in this study have been defined as organizations with employee size of more than 1,000.

TABLE 39 ENTERPRISES: FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	11,120.8	11,619.4	12,145.1	15,918.4	5.6%
Europe	9,948.6	10,456.4	10,991.5	14,752.3	6.1%
APAC	12,555.3	13,691.6	14,938.0	23,544.4	9.5%
MEA	1,337.8	1,424.6	1,517.4	2,178.1	7.5%
LA	2,924.4	3,132.8	3,356.6	4,944.2	8.1%
Total	37,886.9	40,324.9	42,948.7	61,337.4	7.4%

Source: Press Releases, Investor Presentations, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the enterprises market size by region. The market size of APAC region is expected to grow from \$14,938.0 million in 2014 to \$23,544.4 million by 2019, at a CAGR of 9.5% during the forecast period.

FIGURE 36 SERVICES ARE EXPECTED TO CLOCK HIGHER REVENUE AMONG THE ENTERPRISES

TABLE 40 ENTERPRISES: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	15,768.1	16,688.3	17,674.6	24,508.6	6.8%
Services	22,118.8	23,636.6	25,274.1	36,828.8	7.8%
Total	37,886.9	40,324.9	42,948.7	61,337.4	7.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the enterprises market size by solution. The market size of services is expected to grow from \$25,274.1 million in 2014 to \$36,828.8 million by 2019, at a CAGR of 7.8% during the forecast period. Most of the enterprises have a greater capital expenditure capability with deep pockets. Moreover, most of the buyers prefer integrated financial suites coupled with add-on services. Thus, services in the enterprise segment are witnessing a superior growth.

11 FSA MARKET ANALYSIS, BY REGION

KEY FINDINGS

- APAC held the largest market share (33%) of the overall FSA market in 2014, and it is estimated to grow at a CAGR of 11.4% from 2014 to 2019
- LA is expanding at a fast pace and MEA is expected to grow steadily in the coming 5 years
- The FSA market in Europe is estimated to grow from \$17,302.0 million in 2014 to \$25,504.7 million by 2019, at a CAGR of 8.1% during the forecast period
- APAC and LA are expected to be the top regions in terms of growth rate
- Growing demand for integrated software suite is expected to drive the global FSA market
- Presence of SMBs in the APAC region depicts the rapid adoption of cloud-based FSA solution

11.1 INTRODUCTION

The geographical analysis of the FSA market mainly delves into the division of software, services, deployment type, and user type across the five major regional segments, namely NA, APAC, Europe, LA, and MEA. The major growth factors that would further drive the adoption of FSA include the emerging advancements in technology and increasing demand for BI and analytics application. APAC is the overall leader in the adoption and implementation of FSA followed by NA and Europe. LA is rapidly deploying FSA, whereas MEA is more cautious. The region-specific market analysis, industry trends, market potential, and forecast on the basis of software, services, deployment type, and user type are discussed below.

FIGURE 37 APAC WILL EXHIBIT THE HIGHEST GROWTH IN THE FSA MARKET

TABLE 41 FSA MARKET SIZE, BY REGION, 2012–2019 (\$MILLION)

Region	2012	2013	2014	2019	CAGR (2014–2019)
NA	18,039.0	19,099.8	20,240.3	28,640.5	7.2%
Europe	15,170.0	16,194.1	17,302.0	25,504.7	8.1%
APAC	18,262.1	20,195.3	22,358.1	38,330.2	11.4%
MEA	1,896.4	2,047.3	2,212.2	3,450.1	9.3%
LA	4,069.6	4,422.3	4,809.9	7,736.2	10.0%
Total	57,437.1	61,958.8	66,922.5	103,661.7	9.1%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size by region. The market size of APAC region is expected to grow from \$22,358.1 million in 2014 to \$38,330.2 million by 2019, at a CAGR of 11.4% during the forecast period. Developed countries in the APAC region such as Japan, Australia, and South Korea have

substantial amount of financial inclusion and the demand for innovative financial technologies is ever increasing. Many citizens in developing countries such as India, China, and Indonesia do not have access to financial services but owing to strong GDP growth, governments are improving the accessibility of financial services. To meet this vision, financial institutions are investing in financial services infrastructure to reach the far-flung areas serving people deprived of financial services.

11.2 NORTH AMERICA (NA)

NA has emerged as the second largest FSA market for the BFSI vertical in terms of revenues with mega-scale implementations in the banking and financial industry over the past four decades. The FSA market has been witnessing a steady growth in NA due to the maximum financial inclusion although there is an upward surge in the demand of new innovative offerings. The financial industry is moving to adapt new technological innovations such as SMAC in order to meet challenges of shrinking revenue margins, risk management, and the rise of digital consumers. This has led to increased competition among the financial services vendors as more and more companies are seeking to cash in on the changing customer demand; both by expanding their portfolio of state-of-the-art offerings as well as from strategic partnerships. Also, the financial industry in NA has been facing regulatory and compliance issues, thus there is an increased concentration on governance, risk, and compliance management solutions.

TABLE 42 NA: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	7,503.8	7,900.0	8,324.9	11,472.7	6.6%
Services	10,535.2	11,199.9	11,915.3	17,167.8	7.6%
Total	18,039.0	19,099.8	20,240.3	28,640.5	7.2%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in NA by solution. The market size of services is expected to grow from \$11,915.3 million in 2014 to \$17,167.8 million by 2019, at a CAGR of 7.6% during the forecast period.

TABLE 43 NA: FSA MARKET SIZE, BY SERVICES, 2012–2019 (\$MILLION)

Service	2012	2013	2014	2019	CAGR (2014–2019)
Consulting Services	3,143.2	3,366.7	3,607.8	5,386.0	8.3%
Integration Services	2,780.0	2,990.4	3,218.6	4,912.9	8.8%
Training and Support Services	2,126.7	2,193.8	2,264.0	2,752.1	4.0%
Operation and Maintenance Services	2,485.2	2,649.0	2,825.0	4,116.8	7.8%
Total	10,535.2	11,199.9	11,915.3	17,167.8	7.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in NA by services. The market size of integration services is expected to grow from \$3,218.6 million in 2014 to \$4,912.9 million by 2019, at a CAGR of 8.8% during the forecast period.

TABLE 44 NA: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	6,918.2	7,480.4	8,095.2	12,722.0	9.5%
Enterprises	11,120.8	11,619.4	12,145.1	15,918.4	5.6%
Total	18,039.0	19,099.8	20,240.3	28,640.5	7.2%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in NA by user type. The market size of SMBs is expected to grow from \$8,095.2 million in 2014 to \$12,722.0 million by 2019, at a CAGR of 9.5% during the forecast period.

TABLE 45 NA: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	5,185.3	5,348.0	5,513.3	6,628.2	3.8%
Hosted	2,318.5	2,551.9	2,811.6	4,844.5	11.5%
Total	7,503.8	7,900.0	8,324.9	11,472.7	6.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in NA by deployment type. The market size of hosted deployment type is expected to grow from \$2,811.6 million in 2014 to \$4,844.5 million by 2019, at a CAGR of 11.5% during the forecast period.

TABLE 46 NA: FSA MARKET SIZE, BY SOFTWARE, 2012–2019 (\$MILLION)

Software	2012	2013	2014	2019	CAGR (2014–2019)
Audit, Risk, and Compliance	365.1	395.1	427.9	674.5	9.5%
BI and Analytics Applications	443.9	486.1	532.9	894.3	10.9%
Business Transaction Processing	4,610.7	4,810.7	5,021.0	6,503.7	5.3%
Customer Experience	215.8	249.1	287.8	626.9	16.8%
Enterprise IT	1,868.3	1,958.9	2,055.4	2,773.3	6.2%
Total	7,503.8	7,900.0	8,324.9	11,472.7	6.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in NA by software. The market size of customer experience software is expected to grow from \$287.8 million in 2014 to \$626.9 million by 2019, at a CAGR of 16.8% during the forecast period.

11.3 EUROPE

Europe has emerged as the third largest FSA market for the BFSI vertical in terms of revenues in the recent past. This has been attributed due to significant financial inclusion among European nations due to developed financial infrastructure. The FSA has been witnessing a sound growth in Europe due to economic transition and restructuring. The recent advent of Eurozone crisis has been influential in the growth of FSA markets as most of the organizations are involved in restructuring their finances and countries adjusting their economies. Financial inclusion in Europe has led to drawing customers toward financial systems and reposing their faith in financial services. Moreover, innovative offerings such as BI and risk management have gained traction in Europe as it is still fighting its way out of the economic crisis.

TABLE 47 EUROPE: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	6,262.3	6,656.7	7,082.5	10,238.7	7.6%
Services	8,907.7	9,537.4	10,219.5	15,266.1	8.4%
Total	15,170.0	16,194.1	17,302.0	25,504.7	8.1%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in Europe by solution. The market size of services is expected to grow from \$10,219.5 million in 2014 to \$15,266.1 million by 2019, at a CAGR of 8.4% during the forecast period.

TABLE 48 EUROPE: FSA MARKET SIZE, BY SERVICES, 2012–2019 (\$MILLION)

Service	2012	2013	2014	2019	CAGR (2014–2019)
Consulting Services	2,668.9	2,873.9	3,097.1	4,759.5	9.0%
Integration Services	2,372.2	2,569.4	2,785.0	4,403.4	9.6%
Training and Support Services	1,801.8	1,874.4	1,949.7	2,469.3	4.8%
Operation and Maintenance Services	2,064.8	2,219.7	2,387.7	3,633.9	8.8%
Total	8,907.7	9,537.4	10,219.5	15,266.1	8.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in Europe by services. The market size of integration services is expected to grow from \$2,785.0 million in 2014 to \$4,403.4 million by 2019, at a CAGR of 9.6% during the forecast period.

TABLE 49 EUROPE: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	5,221.4	5,737.7	6,310.5	10,752.4	11.2%
Enterprises	9,948.6	10,456.4	10,991.5	14,752.3	6.1%
Total	15,170.0	16,194.1	17,302.0	25,504.7	8.1%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in Europe by user type. The market size of SMBs is expected to grow from \$6,310.5 million in 2014 to \$10,752.4 million by 2019, at a CAGR of 11.2% during the forecast period.

TABLE 50 EUROPE: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	4,324.4	4,503.7	4,687.4	5,908.6	4.7%
Hosted	1,937.9	2,153.0	2,395.1	4,330.1	12.6%
Total	6,262.3	6,656.7	7,082.5	10,238.7	7.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in Europe by deployment type. The market size of hosted deployment type is expected to grow from \$2,395.1 million in 2014 to \$4,330.1 million by 2019, at a CAGR of 12.6% during the forecast period.

TABLE 51 EUROPE: FSA MARKET SIZE, BY SOFTWARE, 2012–2019 (\$MILLION)

Software	2012	2013	2014	2019	CAGR (2014–2019)
Audit, Risk, and Compliance	309.3	336.7	366.8	596.5	10.2%
BI and Analytics Applications	368.5	407.7	451.5	797.4	12.0%
Business Transaction Processing	3,832.3	4,038.0	4,255.6	5,780.8	6.3%
Customer Experience	173.3	202.9	237.8	557.4	18.6%
Enterprise IT	1,578.9	1,671.4	1,770.7	2,506.5	7.2%
Total	6,262.3	6,656.7	7,082.5	10,238.7	7.6%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in Europe by software type. The market size of customer experience software is expected to grow from \$237.8 million in 2014 to \$557.4 million by 2019, at a CAGR of 18.6% during the forecast period.

11.4 ASIA-PACIFIC (APAC)

The APAC region has the largest market share coupled with the highest growth in the FSA market attributed to high economic growth and surging financial inclusion. Of late, APAC is witnessing a number of rising economies and regional powers, such as India and China, which are transforming themselves into major global players. The major economies in the APAC region such as China, India, Australia, Japan, and others have shown an increasing trend in financial inclusion. The economic growth in the APAC economies is due to a growing financial institutional base in the APAC region where . Hong Kong has surfaced itself as the financial hub of the world. Also, owing to cheap availability of skilled workforce global banks are opening subsidiaries in APAC countries to cater to the local demands. Financial inclusion of Asian citizens has been increasing at a brisk pace and thereby boosting the BFSI sector. Developing APAC countries are getting industrialized rapidly, and thus the concept of IT transformation and customer centricity is being realized which is driving the investments in the BFSI vertical. Internet banking coupled with smartphone penetration in Asian countries has changed the way of traditional banking. The APAC region has been showing the highest growth in terms of adopting software along with the supporting services.

TABLE 52 APAC: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	7,588.0	8,351.0	9,201.7	15,427.2	10.9%
Services	10,674.2	11,844.4	13,156.4	22,903.0	11.7%
Total	18,262.1	20,195.3	22,358.1	38,330.2	11.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in APAC by solution. The market size of services is expected to grow from \$13,156.4 million in 2014 to \$22,903.0 million by 2019, at a CAGR of 11.7% during the forecast period

TABLE 53 APAC: FSA MARKET SIZE, BY SERVICES, 2012–2019 (\$MILLION)

Service	2012	2013	2014	2019	CAGR (2014–2019)
Consulting Services	3,285.4	3,654.4	4,068.9	7,168.3	12.0%
Integration Services	2,820.2	3,163.7	3,552.6	6,529.9	12.9%
Training and Support Services	2,014.8	2,193.0	2,388.5	3,731.9	9.3%
Operation and Maintenance Services	2,553.9	2,833.3	3,146.4	5,472.9	11.7%
Total	10,674.2	11,844.4	13,156.4	22,903.0	11.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in APAC by services. The market size of integration services is expected to grow from \$3,552.6 million in 2014 to \$6,529.9 million by 2019, at a CAGR of 12.9% during the forecast period.

TABLE 54 APAC: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	5,706.8	6,503.7	7,420.1	14,785.8	14.8%
Enterprises	12,555.3	13,691.6	14,938.0	23,544.4	9.5%
Total	18,262.1	20,195.3	22,358.1	38,330.2	11.4%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in APAC by user type. The market size of SMBs is expected to grow from \$7,420.1 million in 2014 to \$14,785.8 million by 2019, at a CAGR of 14.8% during the forecast period.

TABLE 55 APAC: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	5,236.5	5,648.0	6,089.7	8,916.9	7.9%
Hosted	2,351.5	2,702.9	3,112.0	6,510.2	15.9%
Total	7,588.0	8,351.0	9,201.7	15,427.2	10.9%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in APAC by deployment type. The market size of hosted deployment type is expected to grow from \$3,112.0 million in 2014 to \$6,510.2 million by 2019, at a CAGR of 15.9% during the forecast period.

TABLE 56 APAC: FSA MARKET SIZE, BY SOFTWARE, 2012–2019 (\$MILLION)

Software	2012	2013	2014	2019	CAGR (2014–2019)
Audit, Risk, and Compliance	416.3	460.3	509.9	885.0	11.7%
BI and Analytics Applications	410.4	473.4	546.6	1,155.3	16.1%
Business Transaction Processing	4,584.7	5,013.8	5,486.0	8,748.6	9.8%
Customer Experience	177.4	216.0	263.3	736.7	22.8%
Enterprise IT	1,999.1	2,187.4	2,395.8	3,901.7	10.2%
Total	7,588.0	8,351.0	9,201.7	15,427.2	10.9%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in APAC by software type. The market size of customer experience software is expected to grow from \$263.3 million in 2014 to \$736.7 million by 2019, at a CAGR of 22.8% during the forecast period.

11.5 MIDDLE EAST AND AFRICA (MEA)

The market share of MEA is the lowest due to very low percentage of financial inclusion. The MEA region forms an emerging market for the FSA with better adoption trends in the developing countries such as South Africa, UAE, and others. The growth in MEA region is mainly accredited to the African region. Countries in the African region are facing rapid industrialization and also witnessing a prosperous economic growth. The Middle Eastern region comprising of the most of the oil-producing countries are in center of storm due to political turmoil and downfall of oil prices. The adoption of payment wallets and mobile money is on the rise in Africa and has provided telecom companies an extensive subscriber base in the MEA region. An increasing market growth is expected in the MEA region, in the next few years, as large global telecom operators seek to increase their presence in this region and replace the traditional financial operations by m-paisa (mobile wallet). The region is thus expected to show the third fastest growth in the FSA market for the BFSI vertical during the forecast period.

TABLE 57 MEA: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	786.5	846.8	912.6	1,403.8	9.0%
Services	1,109.9	1,200.5	1,299.7	2,046.4	9.5%
Total	1,896.4	2,047.3	2,212.2	3,450.1	9.3%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in MEA by solution. The market size of services is expected to grow from \$1,299.7 million in 2014 to \$2,046.4 million by 2019, at a CAGR of 9.5% during the forecast period.

TABLE 58 MEA: FSA MARKET SIZE, BY SERVICES, 2012–2019 (\$MILLION)

Service	2012	2013	2014	2019	CAGR (2014–2019)
Consulting Services	338.4	368.5	401.7	654.7	10.3%
Integration Services	289.9	317.2	347.2	577.9	10.7%
Training and Support Services	223.7	234.5	246.0	323.9	5.7%
Operation and Maintenance Services	257.9	280.3	304.7	489.9	10.0%
Total	1,109.9	1,200.5	1,299.7	2,046.4	9.5%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in MEA by services. The market size of integration services is expected to grow from \$347.2 million in 2014 to \$577.9 million by 2019, at a CAGR of 10.7% during the forecast period. The MEA region is witnessing a growth in integration services due to high growth in the African region. The African region has witnessed fast industrialization and most of the financial institutions are demanding integration services to attain competitive effectiveness.

TABLE 59 MEA: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	558.6	622.7	694.8	1,272.1	12.9%
Enterprises	1,337.8	1,424.6	1,517.4	2,178.1	7.5%
Total	1,896.4	2,047.3	2,212.2	3,450.1	9.3%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in MEA by user type. The market size of SMBs is expected to grow from \$694.8 million in 2014 to \$1,272.1 million by 2019, at a CAGR of 12.9% during the forecast period.

TABLE 60 MEA: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	543.3	573.1	604.0	808.7	6.0%
Hosted	243.2	273.8	308.6	595.1	14.0%
Total	786.5	846.8	912.6	1,403.8	9.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in MEA by deployment type. The market size of hosted deployment type is expected to grow from \$308.6 million in 2014 to \$595.1 million by 2019, at a CAGR of 14.0% during the forecast period.

TABLE 61 MEA: FSA MARKET SIZE, BY SOFTWARE, 2012–2019 (\$MILLION)

Software	2012	2013	2014	2019	CAGR (2014–2019)
Audit, Risk, and Compliance	36.0	39.8	44.1	77.6	12.0%
BI and Analytics Applications	39.8	45.1	51.2	101.4	14.7%
Business Transaction Processing	483.4	516.4	551.7	801.6	7.8%
Customer Experience	19.7	23.2	27.4	66.1	19.3%

Total	786.5	846.8	912.6	1,403.8	9.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in MEA by software type. The market size of customer experience software is expected to grow from \$27.4 million in 2014 to \$66.1 million by 2019, at a CAGR of 19.3% during the forecast period.

11.6 LATIN AMERICA (LA)

The LA region shows the second highest growth for the FSA market as the Latin American countries are facing a resurgent growth in financial system. Economic powers such as Brazil and Argentina are propelling this growth and LA has become the focal point for the expansion of FSA. The major cause for the growth of the FSA market in this region is the increasing number of citizens undergoing financial inclusion and coupled with high GDP growth rate. Latin American landscape is rapidly changing due to growing business and economic environment. This changing environment necessitates BFSI institutions to effectively respond to increasing governance, risk, and compliance measures.

TABLE 62 LA: FSA MARKET SIZE, BY SOLUTION, 2012–2019 (\$MILLION)

Solution	2012	2013	2014	2019	CAGR (2014–2019)
Software	1,675.6	1,824.2	1,987.7	3,157.2	9.7%
Services	2,394.1	2,598.1	2,822.1	4,578.9	10.2%
Total	4,069.6	4,422.3	4,809.9	7,736.2	10.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in LA by solution. The market size of services is expected to grow from \$2,822.1 million in 2014 to \$4,578.9 million by 2019, at a CAGR of 10.2% during the forecast period.

TABLE 63 LA: FSA MARKET SIZE, BY SERVICES, 2012–2019 (\$MILLION)

Service	2012	2013	2014	2019	CAGR (2014–2019)
Consulting Services	732.2	799.3	873.4	1,460.3	10.8%
Integration Services	643.6	702.5	767.5	1,283.9	10.8%
Training and Support Services	460.5	490.1	521.9	758.1	7.8%
Operation and Maintenance Services	557.8	606.2	659.3	1,076.6	10.3%
Total	2,394.1	2,598.1	2,822.1	4,578.9	10.2%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in LA by services. The market size of integration services is expected to grow from \$767.5 million in 2014 to \$1,283.9 million by 2019, at a CAGR of 10.8% during the forecast period.

TABLE 64 LA: FSA MARKET SIZE, BY USER TYPE, 2012–2019 (\$MILLION)

User Type	2012	2013	2014	2019	CAGR (2014–2019)
SMBs	1,145.2	1,289.5	1,453.2	2,792.0	14.0%
Enterprises	2,924.4	3,132.8	3,356.6	4,944.2	8.1%
Total	4,069.6	4,422.3	4,809.9	7,736.2	10.0%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in LA by user type. The market size of SMBs is expected to grow from \$1,453.2 million in 2014 to \$2,792.0 million by 2019, at a CAGR of 14.0% during the forecast period.

TABLE 65 LA: FSA MARKET SIZE, BY DEPLOYMENT TYPE, 2012–2019 (\$MILLION)

Deployment Type	2012	2013	2014	2019	CAGR (2014–2019)
On-Premises	1,153.9	1,230.6	1,311.6	1,814.6	6.7%
Hosted	521.7	593.6	676.1	1,342.6	14.7%
Total	1,675.6	1,824.2	1,987.7	3,157.2	9.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in LA by deployment type. The market size of hosted deployment type is expected to grow from \$676.1 million in 2014 to \$1,342.6 million by 2019, at a CAGR of 14.7% during the forecast period. The LA region is growing at a modest pace due to rapid economic development in Brazil. This has driven many financial institutions to automate their operations and deploy them on a hosted platform to ensure high efficiency and low turnaround time. Thus, hosted deployment type is experiencing high growth in this region.

TABLE 66 LA: FSA MARKET SIZE, BY SOFTWARE, 2012–2019 (\$MILLION)

Software	2012	2013	2014	2019	CAGR (2014–2019)
Audit, Risk, and Compliance	69.5	77.9	87.3	159.7	12.8%
BI and Analytics Applications	89.3	102.1	116.9	236.3	15.1%
Business Transaction Processing	1,033.5	1,115.8	1,204.8	1,807.0	8.4%
Customer Experience	37.5	45.1	54.4	142.5	21.3%
Enterprise IT	445.8	483.3	524.4	811.7	9.1%
Total	1,675.6	1,824.2	1,987.7	3,157.2	9.7%

Source: Secondary Literature, Expert Interviews, and MarketsandMarkets Analysis

The table given above highlights the FSA market size in LA by software. The market size of customer experience software is expected to grow from \$54.4 million in 2014 to \$142.5 million by 2019, at a CAGR of 21.3% during the forecast period.

12 COMPETITIVE LANDSCAPE

KEY FINDINGS

- Fiserv and Misys are the most active participants in the FSA market
- FIS is an active company with a strong product portfolio
- The FSA market registered 72 new product developments between 2012 and 2014
- Agreements, partnerships, and collaborations were on the rise in this market; 34 developments took place between 2012 and 2014
- The FSA market witnessed 14 mergers and acquisitions between 2012 and 2014

12.1 OVERVIEW

This chapter studies the key growth strategies such as new product launches, agreements, and partnerships adopted by key market players between 2012 and 2014 in order to expand their global presence and increase their market shares in the global FSA market.

FIGURE 38 COMPANIES ADOPTED AGREEMENTS, ACQUISITIONS, NEW PRODUCT DEVELOPMENTS, AND NEW CONTRACTS AS THE KEY GROWTH STRATEGIES DURING THE YEARS 2012-2014

	ORGANIC GROWTH STRATEGIES		INORGANIC GROWTH STRATEGIES	
	New Product Launches	New Contracts	Mergers & Acquisition	Partnerships/Agreements/Collaborations
ACCENTURE	- Accenture Multichannel Platform - Customer Insight Software Solution		Accenture Completes Acquisition of Vivere Brasil, a Leading Brazilian Mortgage-Processing Technology Company	Accenture and Fundtech Team to Help Banks Strengthen Liquidity Management

FIGURE 41 BATTLE FOR MARKET SHARE: NEW PRODUCT DEVELOPMENT WAS THE KEY STRATEGY ADOPTED BY PLAYERS DURING THE LAST 3 YEARS

organic growth through new product developments was the key strategy followed by the companies offering financial services. It accounted for 39% of the total strategic developments in the FSA market. Companies such as FIS, Fiserv, Oracle, and Temenos have adopted these strategies to serve reputed clients across the globe and to mark their presence in the respective regional markets.

The key market players such as Accenture, FIS, Fiserv, Misys, and Temenos have also adopted agreements, partnerships, and collaborations as an eminent strategy to expand their client bases and enter into new market spaces with improved solution capabilities. This strategy accounted for 19% of the total strategic developments in the FSA market.

Companies such as Accenture, FIS, and Misys have adopted the strategy of mergers and acquisitions which has enabled them to improve their product portfolio and meet the demands of the new-age financial sector. This strategy accounted for 8% of the total strategic developments in the FSA market.

12.2.1 NEW PRODUCT DEVELOPMENTS

The strategy of new product development accounted for the highest share of 39% of the total strategic developments in the FSA market. Companies have adopted this strategy to improve their product portfolio and meet the demands of the new-age BFSI requirements. Accenture, FIS, Fiserv, Misys, Oracle, SAP AG, TCS, and Temenos are some of the leading companies who have adopted this strategy.

TABLE 67 NEW PRODUCT LAUNCHES, 2012–2014

Date	Company Name	Development
October 2013	Accenture (Dublin, Ireland)	Accenture introduced loan origination software to help mortgage lenders prepare for regulatory changes on the ability to repay and qualified mortgage rules.
April 2013	Accenture (Dublin, Ireland)	Accenture announced enhanced Accenture software solutions designed to help banks to create stronger customer relationships through multichannel interactions and personalized offerings and increase internal efficiencies.
December 2012	Accenture (Dublin, Ireland)	Accenture launched customer insight software solution to help banks to increase sales and efficiencies.
April 2012	Accenture (Dublin, Ireland)	Accenture introduced two new software products—Accenture Multichannel Platform and Accenture Product and Fee Factory—to help banks quickly and efficiently integrate customer channels, such as mobile, branch and online banking, and streamline product development and pricing.
May 2014	FIS (Jacksonville, U.S.)	FIS' Early Risk Manager is an innovative and unique Enterprise Risk Management (ERM) solution that enables financial institutions to proactively identify and mitigate risk. ERM is a secure, cloud-based, and next-generation solution containing an extensive prepopulated library of risk scenarios, KRIs, KPIs, risk metrics, and more.

May 2014	FIS (Jacksonville, U.S.)	FIS Instant Card is a secure, cloud-based, and instant issuance solution for EMV-compliant credit and debit cards. It integrates EMV, core data, and personalized images, and synchronizes with central mail re-issues when cards expire, so customer cards remain the same no matter the source is.
April 2014	FIS (Jacksonville, U.S.)	FIS launched GenNOW that allows financial institutions to provide customers real-time access to funds via mobile or prepaid cards. A turnkey, brandable solution, GenNOW allows financial institutions to compete effectively against alternative financial service providers.
April 2014	FIS (Jacksonville, U.S.)	FIS can now provide access to Visa EMV technology for its NYCE Payments Network participants. The agreement furthers the U.S. payments industry-wide goal of adopting EMV along with supporting key business flexibilities for NYCE Network participants.
December 2013	FIS (Jacksonville, U.S.)	FIS' e-learning suite is the first in the industry to cover the myriad of Consumer Financial Protection Bureau (CFPB) rules becoming effective in January 2014. New CFPB Regulation Z contains a provision for banks and credit unions to train Mortgage Loan Originators (MLOs) on state laws beginning in January 2014.
October 2013	FIS (Jacksonville, U.S.)	FIS launched its first cloud-based real-time banking utility utilizing award-winning FIS profile in Central and Eastern Europe. Service will enable mid-tier banks to leverage real-time banking capabilities along with controlling costs through a Software-as-a-Service (SaaS) model.
September 2013	FIS (Jacksonville, U.S.)	The FIS Active Analytics suite helps financial institutions to tap into new revenue streams through more precise segmentation, and new revenue streams through dynamic cross-sell capabilities driven purely by actionable insights. This new analytics suite underscores FIS' commitment to lead the industry in delivering innovative solutions that drive new revenue, expanded wallet share, expense efficiencies, and create deeper, more profitable relationships for its clients.
April 2013	FIS (Jacksonville, U.S.)	New ChexAdvisor risk assessment offering provides more intelligent scoring of the 60 million financially underserved U.S. consumers. A new offering within the ChexSystems Solution Suite, ChexAdvisor enables lenders to make better decisions while advocating consumer financial responsibility.
October 2012	FIS (Jacksonville, U.S.)	FIS announced the launch of PayNet, the industry's first global real-time payments network for domestic and international money movement for both retail and commercial trade.
October 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced the launch of Popmoney for Disbursements, a new service that streamlines and speeds the currently check-dominated process used by businesses to send payments to consumers.
October 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced that the Comparalytics module within the LoanComplete suite of product solutions, which already completes the standard document-to-system data comparison, now compares documents to any and all other documents associated with the loan file, regardless of the type of document.
September 2014	Fiserv (Wisconsin, U.S.)	Fiserv redesigns Corillian Online Banking to deliver a simplified, tablet-inspired user experience.
May 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced that TradeFlow, its post-trade processing solution, has been enhanced with block-level support for SWIFT's Global Electronic Trade Confirmation (GETC) solution.

April 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced new real-time electronic payments monitoring capabilities to prevent fraud. The solutions protect clients from the ever-increasing threat of payments fraud, covering both international and domestic payments for Automated Clearinghouse (ACH) and wire (Fed and SWIFT), and complement the enhanced SWIFT sanctions screening capabilities now available on the Financial Crime Risk Management Platform (FCRM) from Fiserv.
February 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced the availability of Device Manager: Terminal Connect, which enables direct connection of self-service terminals—ATMs, kiosks, passbook printers, cash recyclers, and smart safes—to Device Manager, the device monitoring, performance measurement, and service dispatch and management solution from Fiserv.
February 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced that AdvisorVision, a goal-based financial planning application, has been enhanced with cash-flow-based financial planning and progressive tax analysis.
January 2014	Fiserv (Wisconsin, U.S.)	Fiserv announced that its Vantage Risk and Budgeting Manager application is available as a hosted SaaS solution via the Intelligent WorkplaceSM web portal.
December 2013	Fiserv (Wisconsin, U.S.)	Fiserv launched next-generation of financial crime risk management platform.
December 2013	Fiserv (Wisconsin, U.S.)	Fiserv unveiled Frontier Reconciliation: Account Certification, its latest offering to ensure timely completion of the reconciliation process and increase control and transparency through the automated escalation of exceptions.
November 2013	Fiserv (Wisconsin, U.S.)	Fiserv announced that it has redesigned its award-winning online banking solution, Corillian Online, incorporating new digital money movement capabilities into a simplified, task-focused design.
November 2013	Fiserv (Wisconsin, U.S.)	ConnectedTeller from Fiserv enhances in-branch customer interactions.
October 2013	Fiserv (Wisconsin, U.S.)	Fiserv announced the availability of CorPoint Mobile, a mobile application, which allows merchants already using CorPoint: Order Manager from Fiserv to now use their tablet or smartphone to order cash from their financial institution, increasing ease of accessibility and use.
October 2013	Fiserv (Wisconsin, U.S.)	Fiserv introduced Reporting Module to give asset managers an insightful model portfolio data.
September 2013	Fiserv (Wisconsin, U.S.)	Fiserv unveiled FATCA Monitoring and Control Solution on its Financial Crime Risk Management Platform.
September 2013	Fiserv (Wisconsin, U.S.)	Fiserv announced the availability of Predictive Scores, a new predictive modeling solution for customer behavior. It leverages insights from multiple, complex data sets (so-called “Big Data”) to provide timely, actionable information that enhance the success of marketing and performance management strategies within financial institutions.
April 2013	Fiserv (Wisconsin, U.S.)	Fiserv announced that its ARP/SMS positive pay and account reconciliation solution is now available in an outsourced deployment model.

February 2013	Fiserv (Wisconsin, U.S.)	Fiserv announced the launch of Intelligent Workplace SM, a web-based portal that gives financial institutions a simpler and more cost-effective way to access financial performance and financial risk management applications.
September 2012	Fiserv (Wisconsin, U.S.)	Fiserv unveiled SpotPay, a mobile card reader solution for financial institutions to offer their small business customers that enable merchants to accept card and check payments anywhere, anytime.
December 2014	Misys (London, U.K.)	Misys launched Misys FusionRisk Limits to make it possible for financial institutions to see all exposures, breaches, and limit utilization across their entire operations. Traders, treasurers, and corporate bankers can now act on complete and timely risk information.
November 2014	Misys (London, U.K.)	Misys announced the launch of its digital channels solutions to the U.S. market based on a SaaS model.
September 2014	Misys (London, U.K.)	Misys launched integrated corporate banking platform to enhance sales and service with a single view of the client.
July 2014	Misys (London, U.K.)	Misys launched transformative, modular core banking solution with “outside-in” approach, to accelerate digital and core systems modernization.
September 2013	Misys (London, U.K.)	Misys launched Global Back Office to streamline operations and ensure bank-wide consistency.
June 2013	Misys (London, U.K.)	Misys has unveiled its new trading systems offering, named Misys Capital Markets Fusion. This new agile platform protects and extends a bank’s existing technology infrastructure.
June 2013	Misys (London, U.K.)	Misys launched Misys Risk Insight, a new way of visualizing and managing risk across the organization.
May 2013	Misys (London, U.K.)	Misys announced the release of Sophis VALUE v5, its flagship buy-side solution. The new version offers an increased level of transparency for traditional and alternative asset managers in their operations from pretrade activity, through portfolio and risk management, to back-office processes.
April 2013	Misys (London, U.K.)	Misys has launched a new version of its commercial lending solution for financial institutions, which enables more cost-effective operations, as well as increased transparency and analysis of the data most critical to sound credit and asset management decision making.
November 2012	Misys (London, U.K.)	Misys has launched a new generation of collaborative risk management solutions, under the name of Misys Global Risk. The solution’s best-in-class risk, regulatory, and workflow modules collaborate with a firm’s in-house or third-party systems in a single enterprise risk technology environment for the first time.
October 2014	Oracle (California, U.S.)	Oracle FLEXCUBE on Oracle’s SPARC T5 servers demonstrates superior performance for banks.
September 2014	Oracle (California, U.S.)	New Oracle Financial Services Revenue Management and Billing Cloud Service offers faster access to transaction pricing, improved invoice creation and revenue management, and increased efficiency. Oracle extends the industry’s broadest and most advanced cloud portfolio with new cloud service for financial services institutions.

September 2014	Oracle (California, U.S.)	Oracle Financial Services Lending and Leasing Cloud Service offers complete lifecycle processing for asset-based lending and leasing.
March 2014	Oracle (California, U.S.)	Financial institutions leverage metadata-driven modeling capability built on the Oracle R Enterprise Platform to accelerate model deployment and streamline governance.
March 2014	Oracle (California, U.S.)	Oracle Financial Services Analytical Applications help organizations to jumpstart efforts to meet compliance deadline of BCBS 239: BIS Principles for effective risk data aggregation and risk reporting.
February 2014	Oracle (California, U.S.)	Oracle launched new Oracle marketing cloud solution which will help organizations to improve marketing performance and efficiency.
February 2013	Oracle (California, U.S.)	Oracle financial services introduced new ERM applications.
October 2012	Oracle (California, U.S.)	Oracle financial services launched governance and compliance management, and operational risk analytics.
October 2012	Oracle (California, U.S.)	Oracle Insurance announced availability of Oracle Insurance Policy Administration 9.5.
September 2012	Oracle (California, U.S.)	Oracle financial services introduced Oracle financial services analytical applications for customer insight.
September 2012	Oracle (California, U.S.)	Oracle announced the availability of the Oracle Banking Platform, a comprehensive suite of business applications for large global banks. Oracle Banking Platform is designed to help banks to respond strategically to today's business challenges and progressively transform their business models and processes, driving productivity improvements across both front and back offices, and reducing operating costs.
August 2012	Oracle (California, U.S.)	Oracle Financial Services introduces Oracle Financial Services Enterprise Stress Testing and Capital Planning Analytics.
May 2012	Oracle (California, U.S.)	Oracle Financial Services introduces Oracle Financial Services Currency Transaction Reporting.
April 2012	Oracle (California, U.S.)	Oracle Financial Services Loan Loss Forecasting and Provisioning enables financial institutions to effectively predict credit losses under multiple scenarios.
February 2012	Oracle (California, U.S.)	Oracle introduced Oracle FLEXCUBE multichannel solution on direct and mobile channels for the financial services industry.
March 2014	SAP SE (Walldorf, Germany)	SAP SE today announced a new rapid-deployment solution that integrates reporting processes of International Financial Reporting Standards (IFRS) and Financial Reporting (FINREP) to meet new European Banking Authority (EBA) FINREP requirements.
June 2013	SAP SE (Walldorf, Germany)	To enable insurers to quickly offer the right insurance offerings to clients and help to reduce complexity of regulatory compliance. SAP today announced the market's first cloud-based solution for tracking and analyzing Insurance Service Office (ISO) Circulars.

December 2014	TCS (Mumbai, India)	Launch of TCS BaNCS digital platform to help banks to deliver hyper-connected, personalized experience to customers.
January 2014	TCS (Mumbai, India)	TCS announced the launch of the Digital Software and Solutions Group, a new business unit designed to help customers to undergo critical digital transformations through modular, fully integrated, industry-tailored licensed software and solutions. Initial industries served will be retail, communications, and banking and financial services.
November 2013	TCS (Mumbai, India)	TCS announced that TCS BaNCS for insurance has expanded its support for personal and commercial lines of business through its proposed integration of ISO Electronic Rating Content, such as automated updates to loss costs, rules, and policy form attachment logic into the TCS BaNCS rating engine.
November 2014	Temenos (Geneva, Switzerland)	Temenos announced the launch of two new products within its BI portfolio—Insight Analytics and Insight Mobile—enabling financial institutions to leverage data to build greater customer intimacy and win the battle to retain their best customers.
October 2014	Temenos (Geneva, Switzerland)	Temenos announced the availability of its Temenos Connect Mobile Banking solution for retail banks—the first retail mobile banking solution to be underpinned by a User Experience Platform (UXP) that drives multidevice banking solutions.
September 2013	Temenos (Geneva, Switzerland)	Temenos announced the availability of the Temenos T24 core banking system on the Azure Infrastructure-as-a-Service (IaaS) from Microsoft Corp. enabling all customers to run their T24 system in the cloud.
September 2013	Temenos (Geneva, Switzerland)	Temenos announced a new dawn in global payments processing with the launch of its new payments hub, Temenos Payment Suite (TPS).
July 2013	Temenos (Geneva, Switzerland)	Temenos announced the global launch of SocialComply, its solution for social media monitoring and compliance. SocialComply enables financial services firms to monitor social media channels and to engage more actively with their social media audience and at the same time managing and mitigating the associated risks.
May 2013	Temenos (Geneva, Switzerland)	Temenos showcased Temenos DataSource at FIMA Market Data 2013. DataSource, formerly known as ProDB, is an Enterprise Data Management solution that improves the quality of a financial institution's market and reference data on an automated basis. It thereby reduces the costs and risks connected with the management of a constantly growing volume of data.
February 2013	Temenos (Geneva, Switzerland)	Temenos announced at the Finovate Europe conference that it will launch LiveDesigner, a dynamic user experience designer. LiveDesigner is an editor within edgeConnect, Temenos' User Experience Platform, which underpins Temenos' new and revolutionary approach to channel management in financial services.
October 2012	Temenos (Geneva, Switzerland)	Temenos announced the launch and availability of a suite of front office products, Temenos Connect. The launch capitalizes on Temenos' recent acquisition of edge IPK, market leader in User Experience Platform (UXP) technology.
May 2012	Temenos (Geneva, Switzerland)	Temenos unveiled the latest release of its core banking product, TEMENOS T24 R12. Investing in best-of-breed, "out of the box" technology and functionality is at the heart of Temenos' product strategy as it consistently provides innovative banking products to its global client base.

January 2012	Temenos (Geneva, Switzerland)	Temenos showcased the latest version of WealthManager, an industry leading front-office platform designed to deliver a holistic approach to wealth management.

12.2.2 NEW CONTRACTS

New contracts accounted for 34% of the total strategic developments incorporated by the top companies in the FSA market. The players are using this strategy to expand their customer base and enhance their technological capabilities. The market players such as Accenture, Fiserv, Misys, TCS, and Temenos adopted this strategy.

TABLE 68 NEW CONTRACTS, 2012–2014

Date	Company Name	Development
July 2014	Accenture (Dublin, Ireland)	State Bank of India launched new digital online and self-service banking solutions with support from Accenture.
May 2014	Accenture (Dublin, Ireland)	Liberbank and Accenture entered into a strategic agreement to transform the bank's core banking applications.
March 2014	Accenture (Dublin, Ireland)	Suruga Bank launched next-generation platform developed by Accenture to deliver more personalized products and services to its customers.
February 2014	Accenture (Dublin, Ireland)	Summit Credit Union chooses Accenture to streamline operations, increase efficiency of mortgage processing, and simplify borrowing for customers.
April 2013	Accenture (Dublin, Ireland)	UniCredit and Accenture teamed up to enhance and manage the bank's invoice-management processes.
December 2012	Accenture (Dublin, Ireland)	United Bank of India awarded Accenture a 2-year management consulting agreement to support its strategic transformation program.
November 2012	Accenture (Dublin, Ireland)	BBVA and Accenture announced a landmark technology systems upgrade at BBVA Compass, giving the Spanish bank's U.S. subsidiary one of the first real-time processing systems in the U.S. banking industry.
June 2012	Accenture (Dublin, Ireland)	Wing Lung Bank selected Accenture to plan and oversee its core banking transformation program.
December 2014	FIS (Jacksonville, U.S.)	Fifth Third has selected the FIS C2P Open Payments Platform to generate a consistent corporate customer experience across multiple payment types. Built on the FIS C2P Open Payments Platform, the solution enables corporate customers to manage any type of payment through one single platform.
December 2014	FIS (Jacksonville, U.S.)	Muthoot Finance Ltd. selected FIS for a fully managed ATM services and switching solution. This agreement allows Muthoot Finance to place its branded ATMs across India, bringing banking and financial opportunities to underserved people across India, particularly in rural areas.
October 2014	FIS (Jacksonville, U.S.)	Bandhan, one of India's newest proposed banks, has outsourced all technology operations for its new banking operation to FIS.

September 2014	FIS (Jacksonville, U.S.)	The Bank of Bennington has selected FIS as its new core banking provider. FIS will also provide online and mobile banking solutions.
September 2014	FIS (Jacksonville, U.S.)	EverBank selected FIS People Pay to deliver Person-to-Person (P2P) payment capabilities. FIS People Pay eliminates funding risks as all transactions instantly debit funds from a sender's account. P2P delivers new payments capabilities for EverBank clients while delivering new revenue opportunities for the bank.
November 2014	Fiserv (Wisconsin, U.S.)	Educational Community Credit Union selected DNA and integrated surround solutions from Fiserv.
November 2014	Fiserv (Wisconsin, U.S.)	Illinois-based bank selected the Premier Bank Platform for account processing with additional Fiserv solutions. Accel Debit Payments Network, CheckFree RXP, and Popmoney are among the comprehensive, integrated Fiserv solutions selected.
November 2014	Fiserv (Wisconsin, U.S.)	Ohio-based bank selects Precision Bank Platform and an array of additional Fiserv solutions. Popmoney, Mobiliti, CheckFree RXP, and Accel Debit Payments Network are among the comprehensive, integrated Fiserv solutions selected.
September 2014	Fiserv (Wisconsin, U.S.)	Freedom Mortgage selected LoanServ and LoanLink from Fiserv for real-time mortgage servicing.
March 2014	Fiserv (Wisconsin, U.S.)	TD Bank enhanced its online money movement services with the addition of Popmoney and TransferNow from Fiserv.
February 2014	Fiserv (Wisconsin, U.S.)	Associated Bank enhanced its mobile banking and payment services and launched new tablet app with Mobiliti from Fiserv.
January 2014	Fiserv (Wisconsin, U.S.)	Geneos Wealth Management selected the unified wealth platform from Fiserv.
September 2013	Fiserv (Wisconsin, U.S.)	Pinnacle Bank selected Precision from Fiserv to provide integrated, end-to-end banking solution.
November 2014	Misys (London, U.K.),	Misys announced that Ethiopia's second largest private bank, Awash International Bank ("Awash"), has successfully implemented Misys FusionBanking Essence for core and branch banking.

13.2.5 SWOT ANALYSIS

FIGURE 44 ACCENTURE: SWOT ANALYSIS

Sources: Company Website, Annual Reports, and SEC Filings

13.2.6 MNM VIEW

Accenture provides end-to-end solutions which include solutions at every step of transformation to their clients through wide set of assets, technologies, operations, and industry capabilities. Its business model is dependent upon the company's global delivery network which is majorly concentrated in India and Philippines. This could greatly expose the company to major operational risks due to natural disasters or political instability in the regions. Accenture has signed a 4-year agreement to maintain and enhance core banking applications for the Chile division of Banco Bilbao Vizcaya Argentaria (BBVA). BBVA's strong position in Chile, across LA and around the world will help Accenture to grow its customer base in LA. This has helped Accenture to trigger its growing coverage of solutions in the Latin American region by various folds. For the years to come, it aims on expanding its businesses in the regions of MEA and APAC.

13.3 IBM CORPORATION

13.3.1 BUSINESS OVERVIEW

International Business Machines Corporation abbreviated as IBM was founded in 1911, and it is headquartered in New York, U.S. IBM has been an established player and a globally renowned vendor for providing dedicated hardware, software, and related services. 14.3 INTRODUCING RT: REAL-TIME MARKET INTELLIGENCE

Revenue Tree (RT) is an interactive platform that systematically helps the user to enhance revenue by identifying high-potential growth markets and track the same on a real-time basis on a competitive, customer-centric and ecosystem level.

The in-built intelligence of the tool auto-identifies the competitors, allied markets, market value, and customers, and helps the user identify tangible hotspots of revenue growth, both in existing and new markets. The unique feature of RT is the Ecosystem, which is linked across a wide range of industries and markets.

Features and benefits of RT:

- Visual presentation of market data
- Real-time information on market trends and developments
- Information specific to an application, type, or geography
- Competitive intelligence (by tracking developments of major players)
- Forward integration in value chain to find potential clients
- Comparison of two or more markets
